Description of Equipment or Protective System

I.S. LED Cluster Types DA*171 and DA*172 are designed as panel mounted indicators and contain a number of coloured LED's mounted on a p.c.b. with associated electronic components. The p.c.b. is housed in a small plastic enclosure with customer terminals at the rear and an appropriately coloured lens within either a plastic or metal bezel at the front.

The DA*171 and DA*172 LED Clusters are fitted with up to five LED's connected either in series or in parallel and may contain optional current regulator, adjustable voltage regulator, bridge circuit, voltage suppressor and alternative types of LED.

The third letter in the type number denotes the colour of the LED Cluster (R for Red, O for orange etc.) and the sixth digit is either 1 or 2 which denotes either a plastic or metal bezel around the lens.

The enclosure provides a Degree of Protection IP20 and the exposed surface of the lens is treated with a durable antistatic coating.
