

- ◆ Automatic MAN DOWN alert
- ◆ Manual Alarm function
- ◆ Track & Trace
- ◆ Web-based portal
- ◆ Seamless integration with SM14 and TB14

BCom Man Down

BCom's intelligent **Man down application** for Android keeps track of all your employees while closely monitoring man down conditions such as a sudden impact and sustained periods of non-movement.

The app was purposely built to integrate with our **SM14 series ruggedized smartphones** and **TB14 series tablets**. Low power consumption ensures man down protection during 8 hour work shifts and the dedicated alarm button enables swift response to emergencies.

BCom Man Down builds on the strong foundations of MobileTrack, supporting track & trace and automatic alert forwarding to Emergency services.

Track & Trace

- ◆ Track employees in real-time
- ◆ Follow-me function
- ◆ Visual and audible alarm
- ◆ Location history
- ◆ Administration portal
