CATALOGUE OF ZPAS GROUP PRODUCTS

SOLUTIONS FOR CONNECTIONS

DEAR CUSTOMERS,

this catalogue gives you modern, versatile and technologically advanced solutions for data communications, telecommunications, power engineering and automation.

In no small part thanks to you and your suggestions, we have improved functionality of the well-known products and solutions to face up to ever more stringent standards and constantly changing needs.

We give you a range of new products and solutions such as next-generation SMART multimedia kiosks, closed-profile bolted SZE3 industrial cabinet with unlimited possibilities for expansion and built-ins, as well as the quiet, efficient and energy-saving PWS2 roof fan.

We are confident that with our knowledge, extensive experience and respect for the work of human hands on every level of product creation, the solutions offered by the ZPAS Group are of the highest, world-class quality.

A handwritten signature in blue ink, which appears to read 'Piotr Baranowski'.

Piotr Baranowski
President of the
Management Board

”

*Sometimes when I consider
what tremendous consequences
come from little things ...
I am tempted to think ...
there are no little things.*

Bruce Barton

CUSTOMERS · INDUSTRIES

TELECOMMUNICATIONS

It is difficult to imagine social and economic development without continuous investment in telecommunications. To meet the market demand, ZPAS Group offers products that are dedicated to this economy sector. We supply investors who expand and create new telecommunications networks with all types of enclosures and accompanying equipment.

For more information see page 27

DATA COMMUNICATION

In the current decade, constant data expansion remains the biggest challenge of the data communication industry. To meet these requirements, ZPAS creates innovative solutions for 19" data communication cabinets. Our comprehensive range includes also structured wiring components, optical distribution frames and active devices, consoles, KVM switches, and UPS units.

For more information see page 29

DATA CENTRES

The continuity of corporate business and maintaining services at the highest level depends on uninterrupted operation of computational units and active devices found in data centres. To ensure access to information, you must follow the highest standards of quality for systems that affect company operation.

For more information see page 31

POWER INDUSTRY

With the growing demand for electricity, the energy sector has been undergoing profound changes in recent years. See what interesting ZPAS has in offer for this economy sector.

For more information see page 33

AUTOMATICS

In today's world, manual control of industrial processes is a thing of the past. ZPAS Group has prepared products dedicated to this technology branch to provide possibilities for installing control devices, as well as ready-to-use solutions for manufacturing process control.

For more information see page 35

PUBLIC SECTOR

The unique combination of plant production capacity with highly-skilled workers of design departments forms solid foundation for development of many non-standard products which go to the public sector along with the standard offer.

For more information see page 37

ZPAS GROUP

solutions for connections

Catalogue communication is based on three colours. Grey colour marks all information about entire ZPAS Group consisting of two interconnected and cooperating companies.

ZPAS

for your connections

Blue colour in the catalogue marks departments, products and services provided by ZPAS, ranging from standard, mass-produced enclosures, through special versions of products to complex projects.

ZPAS

connections for you

Red colour marks departments, products and services of ZPAS-NET which deals mainly in the production of outdoor cabinets, dispatch desks and matrix boards, and also in electrical installation, production and sale of structured cabling components.

FUTURE IS TODAY

ZPAS is a future-oriented company that puts people, product quality and the environment first.

We are driven by the motto that is continuous development and providing comprehensive solutions developed together with our partners.

Being fascinated about the latest technologies and driven by innovation, we give attention to detail in the broad sense.

Thanks to such a vision, our server rooms, solutions for telecommunications, automatics and energy meet the changing trends of the future.

The growing satisfaction of our Partners, reflected by the turnover dynamics, is a proof that we have chosen the right path.

Let this catalogue we give you be the harbinger of the new standard of cooperation.

GROWTH AND EXPANSION

ZPAS GROUP

With its 40-year experience, ZPAS Group meets the demands of the future and combines comprehensive solutions

of ZPAS S.A. and ZPAS-NET sp. z o.o. which provide the market with a wide range of products by complementing each other.

ZPAS specializes in the production of data communication and industrial enclosures, whereas ZPAS-NET deals in manufacturing of networking and energy solutions. This combination is driven by the "solutions for connections" idea that responds to the needs of the market.

ZPAS Group has more than 17 000 m² of production space based in three locations. The head office of the managing board of ZPAS Group and ZPAS S.A. is located in Przygórze where special, individual and small-series products are manufactured. Nowa Ruda - Stupiec is the location of the warehouse and production hall for series and standard products of ZPAS S.A. In Drogosław, production facilities and offices of ZPAS-NET, a ZPAS S.A. subsidiary, are located.

ZPAS Group is not all about the highest-quality products that meet the requirements of modern high-tech technologies. It is also a staff of skilled people who provide technical assistance and advice when choosing products. Providing professional help, we try to come up with the best solutions for you.

We want our partners to know that we are open to their needs, which is why we provide training and organize presentations in order to introduce our offer and functionality of our products.

We do not stand in one place; on the contrary, we are constantly working on new solutions. We rely on modern technology, young, educated crew and dynamic actions.

With implementation of the quality and environment management system, our products have world-wide recognized certificate. The technology solutions that we use ensure special protection of the environment and the workers. To prove that, we have been awarded ISO 9001 and ISO 14001 certificates.

ZPAS Group is a brand that reflects commitment, passion, aspirations and reliability.

ZPAS PRODUCT PORTFOLIO

ZPAS products include mainly high-tech and thus easy-to-use, enclosures, accompanying equipment and infrastructure that are used mainly in data communication and power industry.

From simple support structures to complex installations for data centres. From single cabinets to fully equipped power structures. Regardless of their size and intended use, whether you take them in your hands or walk inside them, for smooth integration you always need only your intuition with a little bit of our support.

The main domain of our business gives us with nearly 40 years of experience which we successfully use, serving diverse industries. Also our engineering staff has necessary knowledge and experience. It is a team willing to face any challenge.

Advanced 3D design support software allows us to present the finished product that is still under construction. We can give a preview of the project in the form of technical documentation and a virtual model that accurately reflects its appearance.

ZPAS product range is not limited to European dimensions – it is a world-class range.

Anticipating the needs of our customers, we follow a growth strategy that ensures constant high standard of production methods at all stages.

Numerically controlled machines guarantee high and consistent quality. They are also a manifestation of using the most modern and innovative production methods, while maintaining high standards of worker safety and environmental protection.

By using high-tech manufacturing processes, we can optimize costs even for individual orders, while maintaining the highest quality, which is the basis of our offer.

INFORMATION KIOSKS

INDUSTRIAL ENCLOSURES

CONTROL DESKS

ZPAS

Originally a small experimental production facility, we evolved to the leading manufacturer of enclosures with an established position in the market. Currently, production is run in two large manufacturing facilities. In the headquarters in Przygórze, we manufacture customized products for individual customer needs. In Słupiec, mass and standard production is run. This is also the location of our main warehouse for finished products. By implementing a number of interesting projects, we are constantly expanding manufacturing space and modernizing our machinery. All this would not happen without the enormous commitment of our employees who took care of continued development while becoming the owners of the company.

ZPAS S.A. portfolio covers enclosures for indoor and outdoor use, in assembled version and for self-assembly, with protection class ranging from IP 20 to IP 65. Each enclosure that meets all these requirements has a separate production process.

Before a finished product gets delivered into your hands, it must undergo a long way. The whole process begins with determining all parameters of the enclosure for the constructor to be able to make right drawings for your approval. Next, the technologist prepares documentation and software for our machines. A well-planned organization of all manufacturing processes gives us the ability to fully utilize our production capacity.

A metal sheet undergoes punching, laser cutting, bending and welding. Next, there is manual bench work to prepare the material for the next operation, i.e. powder coating. Depending on the size of the series, a semi-finished product goes to the fully automated paint shop, or semi-automated paint shop in case custom colours are demanded. Items that require a higher degree of protection are sealed by pouring seals in the right places. The complete finish of products is overseen by manufacturing foremen who organize and supervise the production stages. This is how cabinet components, frame, mounting profiles, doors, shelves and other are made. Next, assembly stage takes place. This is when enclosures are put together. For structures intended for self-assembly, individual elements or subassemblies are put into separate packages.

Before they are ready for sell, products undergo quality control. Once the product is green-lit, it goes to the warehouse for finished goods, waiting for your order.

Years of experience have taught us that you can always improve certain processes and perform your tasks better to constantly improve the competitiveness of your products.

ZPAS-NET PRODUCT PORTFOLIO

ZPAS-NET sp. z o.o. was established on 1 June 2004 as a result of separating it from ZPAS S.A. structure.

The company is based in Nowa Ruda - Drogosław, in the sub-zone of Wałbrzych Special Economic Zone. ZPAS-NET facility has an office area of 800 m² and the production area of 2500 m².

The company manufactures products needed to create modern network infrastructure and monitoring and control systems, as well as products dedicated for the power industry that uses intelligent IT solutions. ZPAS-NET sp. z o o was created to meet expectations of our partners for integration, equipment and turnkey solutions.

Seeking innovative solutions, we meet the requirements of modern technologies in the sectors in which we operate. Our brand brings to mind high quality, professional and reliable implementation of projects that meet the standards of advanced technical solutions.

Thanks to our experienced engineering staff, we achieved a leading position in the Polish market of manufacturers of outdoor cabinets and mimic boards.

Through the first years of operation as ZPAS S.A. and now making our own brand, we do a lot of work related to construction of power and telecommunications facilities.

ZPAS-NET products have been recognized not only in Poland but also in Europe and beyond.

ZPAS-NET

In the modern business environment that is subject to constant changes and modifications, our range has an important place

when it comes to demanding solutions. We strive to deliver not only products but most of all the ability to create solutions for both individual needs and complex projects.

Outdoor cabinets manufactured by ZPAS NET are made of aluminium, stainless steel or aluminium-zinc sheet. Structures are assembled on the production floor. With these materials, we make cabinets ready to face severe weather conditions.

If the customer wishes so, outdoor enclosures can be equipped with electrical equipment produced by us. We equip also the cabinets supplied to us by ZPAS or other manufacturers of indoor and outdoor enclosures. If necessary, modular expansion and free use of reserve space is possible.

We also specialize in making control desks produced on the basis of final documentation or according to individual client guidelines. Our engineering department works on the project details in consultation with the client. The effect of this work is presented in the visualization that is to show appearance and location of the desktop. After making corrections and approving the project, we begin assembly, creating products with high quality materials.

An important safety feature for trouble-free operation of communication systems is the reliability of the cabling infrastructure. With 40 years of industry experience, we take pride in cooperating with proven and trusted suppliers that are recognized in the market. They supply us with high quality products certified by independent certified laboratories.

Seeing the dynamic growth of the number of fibre-optic network users, we have developed the OptiTel product family that allows for flexible configuration of optical links, switching reserve links, adding new devices and a number of measurements.

Meeting customer expectations, we specialize in providing complex services. These include design development, making necessary arrangements, legal services, cabinet prefabrication, delivery and installation of cable routes, manufacture and assembly of dispatcher control panel and mimic boards, constructing power lines and transformer stations with equipment, carrying out commissioning and measurement works and providing warranty and post-warranty repairs.

Today's globalization of all business processes makes continuous development of telecommunications inevitable – transmission of all kinds of information over a distance with appropriate pre-processing and protection against unauthorized access.

For telecommunication systems to work, one must install various types of electronic and fibre-optic equipment which allows for processing information to signal, sending it (possibly with gain) and finally receiving the signal and re-processing it to the information.

The necessary equipment is installed in collective enclosures called telecommunications cabinets that ensure well organization and proper working conditions. ZPAS Group's offer includes cabinets for installation inside buildings, as well as cabinets suitable for outdoor use when there is not enough space and equipment must be installed close to the end customer (enclosures made of corrosion-resistant materials and ensuring adequate thermal insulation). In case of all telecommunication cabinets we offer also necessary equipment: all kinds of mechanical components (shelves, plinths, masking panels, supporting structures, blanks, etc.), electrical equipment (distribution panels, connector panels, surge protection, power supply), systems for adequate weather conditions (heating, ventilation, air conditioning, monitoring) and fibre-optic components (distribution frames, pigtails, patch cords). The company has also capacity to provide full-scale services: cabinet installation, splitting devices, grounding, connecting power supply, etc.

The ongoing computerization of telecommunications systems on the one hand, and the use of advanced technologies in information systems on the other requires better and better 19" data communication cabinet solutions.

We have open and closed enclosures for wall-hung and floor installation. Each product meets the highest requirements in terms of use and safety. By controlling all stages of product manufacturing, we provide a solution that meets the highest quality requirements. Through the use of the latest technological and construction solutions, we create an easy-to-use compatible product. Using ZPAS solutions gives you efficiency and economy.

Our data communication products are essential in all server systems, IT networks, disk arrays and data transmission safeguards. Our product range includes also structured wiring components, optical distribution frames and active devices, consoles, KVM switches as well as UPS units. ZPAS products are also recommended for use on production lines, in A/V recording studios and for an individual user.

In the era of globalised business process information, appropriate protection against business and operating risks is vital to secure company's uninterrupted operation. Unlimited and complete 24/7/365 access to information is currently becoming one of the most valuable business resource. In many cases, data stored in corporate data centres represent the most precious assets of the enterprise. Hence, important data require a suitable level of protection and security. A server room with adequate power systems, cooling systems, access control and detection of various types of threats ensures comfort and safety of operation and the right level of corporate data security.

ZPAS Data Center system is a complete solution which includes: server cabinets, Data Box, cold or hot aisle system, precision air-conditioning systems, backed-up and standby power supply systems, power management systems, fire extinguishing systems, ITrooms cabins, access control and burglary alarm system, climate monitoring system.

ZPAS S.A. provides also full-scale implementation of Data Centre structures. Basing on the experience of our specialists, we support our customers at every stage of the project, starting from the preparation of the concept, design and implementation of the appropriate solution tailored to the needs of the company and its customers.

Given the current demand for electricity, development and reliability of power systems is a priority in the modern world. Power industry can be divided into two sectors. First one – generation, meaning power plants, combined heat and power stations that produce energy. Second one – transmission grids which transfer generated electricity for consumption. Since the very beginning, our company has been developing devices and systems for utility industry. Our offer is dedicated to both sectors presented.

Our products include typical electric switchgears and power distribution cabinets for specific projects, manufactured on the basis of our own industrial enclosures SZE2, SZE3 and SWN. We also produce mimic matrix boards used in many control rooms for mapping patterns of transmission grids, monitoring and control systems and all kinds of processes and dispatch desks used for continuous operation of controllers. More and more different applications for the power industry are made in outdoor enclosures which are described in more detail in a separate section.

Many years of experience in the industry make our company a trustworthy and reliable partner who offers support at every stage of the manufacturing process. From design to the final product implementation at the customer's facility. Our own Design Department allows us to adjust the solution to even the most demanding customers. We would be delighted to establish collaboration with you.

Please have a closer look at what we have on offer for the power sector.

ZPAS Group offers industrial automation services based on our own devices, as well as the devices of all renowned manufacturers.

We have solutions for: power stations, sewage treatment works, water treatment plants, pumping stations, factories of ceramic building materials, mines, coking plants, heating plants and control rooms of all industrial plants.

We offer you our own devices for constructing automation systems: mimic matrix boards for process visualization, PDM and HW dispatch desks, PSL control desks, SZE2, SZE3 and SZB enclosures for automation equipment, climate monitoring system and control access system for enclosures, server rooms, switchrooms, etc.

We also prefabricate power and control sets for all industries and for a number of uses – from controlling machine tools to controlling production lines. Depending on customer preferences, in our applications we use controllers and power and control equipment offered by most of the companies operating in the European market, including: Apator, ABB, Beckhoff, Eaton, J. Muller, Legrand, Schneider, Siemens, GE, Pokój, Phoenix Contact, Wago, Weidmüller, Dehn, Relpol, Finder, etc.

Our applications are based on 40 years of experience. Each, even the most demanding customer will find something in our solutions for themselves.

We always make sure that our products are state-of-the-art, reliable and perfectly safe. As part of our ongoing commitment to client satisfaction, we are pleased to implement any solutions suggested by our customers.

We are looking forward to doing business with you.

TOLL GATES

SELF-SERVICE PARCEL MACHINES

MULTIMEDIA KIOSKS
pages 480-507

The unique combination of plant production capacity with highly-skilled workers of design departments forms solid foundation for development of many non-standard products intended for the public sector.

The emergence of a new product is brought about by needs reported by our customers combined with new technical advancements in electronics, electrical and mechanical industries. Examples of such collaboration include electronic information kiosks that are commonly known as infokiosks or infomats. Depending on their intended use, we fit them with additional devices: printers, code and card readers, scanners, coin validators, etc. Often they function as specialized equipment in laboratories or on production lines.

They can be used even for constructing self-service parcel machines, ticket machines, vehicle charging stations or toll gates. The devices can serve as vending machines for products or services. They can also provides services such as giving data, printing documents, providing forms to fill out, etc., supporting operation of public buildings.

The development of such products is supported by EU funds.

- Offered in 32 size variations (see the chart on page 45), of which 10 variations are in constant sale from our warehouse.
- Individual configuration:
 - multiple door, panel, roof options for maximum flexibility,
 - possibility to join cabinets in a row,
 - levelling feet, castor or plinth options,
 - multiple alternative cable entry options (brush, foam),
 - 21" mounting profiles also possible (in 800 mm wide cabinets),
 - individual configuration using simple coding.
- Wide range of supplementary accessories: shelves, drawers, fan units, power strips, blanking plates etc.
- Flexibility in manufacturing tailor-made cabinets.

SCOPE OF DELIVERY

Cabinet in basic configuration*
(cat. no. WZ-SZB-xxx-17AA-11-0000-011):

- frame,
- safety glass front door,
- two side panels,
- steel rear door shortened with 3 U module panel with brush strip, lockable,
- standard roof, raised, with perforated sides,
- 2 pairs of 19" mounting profiles,
- earthing bar and cables,
- cabinet placed on levelling feet.

*) Other configurations - see page 45.

SZB cabinet in the basic configuration, 800 mm wide

TECHNICAL DATA

Material:

Frame, side panels, solid steel door, roof, mounting profiles, C-profiles - sheet steel
 Door with glass - sheet steel, acrylic glass
 Glass door - mineral safety glass
 Glass door with metal sides - mineral safety glass, sheet steel
 Outriggers - zamak casting.

Protection degree:

IP 20 in accordance with EN 60529
 (does not apply to brush cable entries).
 On request, IP 41 can be achieved.

Surface finishing:

Frame, roof, panels, doors, plinth - powder paint, light grey (RAL 7035). All other colour options on request.

Mounting profiles, C-profiles - Al-Zn coated.

Maximum load capacity: see chart on page 43.

WZ-SZB-xxx-17AA-11-0000-011)..
 - Lead time of other cabinets to be agreed upon with ZPAS Sales Department.

CATALOGUE NUMBER OF SZB CABINET

WZ-SZB - XXX - XXXX - XX - XXXX - 011

Reference number
specifies the cabinet's overall dimensions (see reference chart). Zeros should be added before single-digit or double-digit numbers.

F | R | LS | RS

F | R | LS | RS

F - FRONT | R - REAR | LS - LEFT SIDE | RS - RIGHT SIDE |

Configuration of plinth's sides:
Four digits which specify plinth side type.
Four zeros (0000) should be entered for cabinet without any plinth.

Each side can be:

- 1 - solid
- 2 - with perforation
- 3 - with double perforation*
- 4 - with a brush opening
- 5 - with two brush openings*
- 6 - with a brush opening and perforation*

*) Only for plinths 200 mm in height.
For a detailed descriptions of plinths, see pages 104-105.

F - FRONT | R - REAR | LS - LEFT SIDE | RS - RIGHT SIDE |

Door or panel type:

- 0 - without door or without panel
- 1 - glass door with single-point locks
- 2 - solid steel door with single-point locks
- 7 - solid steel, shortened door with single-point locks + 1 piece of 3 U module panel with brush strip, mounted under the shortened door
- G - steel door with glass and three-point rod-latch lock with swing handle*
- H - solid steel door with three-point rod-latch lock with swing handle*
- I - perforated steel door (type A) with single-point locks
- L - perforated steel door (type A) with three-point rod-latch lock with swing handle*
- (LL) - perforated double-wing steel door (type A) with three-point rod-latch lock with swing handle*
- P - perforated steel door (type C) with single-point locks**
- S - perforated steel door (type C) with three-point rod-latch lock with swing handle**
- Z - glass door with metal sides and three-point rod-latch lock with swing handle*
- A - solid steel panel with single-point locks
- U - perforated steel panel (type A) with single-point locks
- Y - perforated steel panel (type C) with single-point locks**

*) Only as a front or rear door for cabinets higher than 18 U
**) Only for 42 and 45 U cabinets
Perforation types (A, C) - see page 47

Base type:

- 0 - without any base (cabinet set directly on bottom plate)
- 1 - levelling feet
- 2 - castors - type 150 (see page 106)
- 3 - castors - type 300 (see page 107)
- 4 - plinth 100 mm
- 5 - plinth 100 mm with levelling option
- 6 - plinth 200 mm
- 7 - plinth 200 mm with levelling option

Roof type:

- 0 - without roof
- 1 - standard roof
- 2 - roof with extra perforation
- 3 - tight roof IP 41
- 4 - roof with opening for blanking/cable entry plate

For a detailed description of roof types, go to page 48.

Examples:

- The cat. no. **WZ-SZB-018-1AAA-14-2422-011** means SZB cabinet, usable height 42 U, width 800 mm, depth 600 mm. The cabinet is equipped with front glass door, two removable side panels and removable rear panel. The top is covered with the standard roof. Cabinet is situated on 100 mm plinth. Rear side of the plinth with brush opening for cable entry, all other sides are perforated. Doors, panels and roof are earthed. Cabinet interior is equipped with four mounting profiles installed to the frame by means of 8 outriggers.
- The cat. no. **WZ-SZB-022-(LL)(LL)AA-11-0000-011** means SZB cabinet, usable height 42 U, width and depth 600 mm. The cabinet is equipped with perforated double-wing front door, perforated double-wing rear door and two solid side panels. The top is covered with the standard roof. Cabinet is set on levelling feet.

Note:
The delivery of a standard SZB cabinet (except for elements listed in cat. no.) includes the following: four mounting profiles, earthing bar and earthing cables for doors and panels.

SZB 19" NETWORK CABINET

DOOR TYPES

[1] Glass door with single-point locks

[2] Solid steel door with single-point locks

Note

The table above lists selected cabinet versions only, which are immediately available from the warehouse. When ordering cabinets with different overall dimensions or a different configuration of components (items available on demand), please use the coding system provided on page 53.

INSTRUCTIONS FOR ORDERING SZB SE 19" CABINETS

- When ordering a SZB SE cabinet, please provide the appropriate **catalogue number according to the above chart or configuration system on page 53** which specifies overall dimensions of the cabinet, types of doors, panels, roof and base, the layout of mounting profiles or angles, and the colour.
- The next step is to specify **catalogue numbers of supplementary accessories** (such as shelves, blanking plates, power strips, fan units etc.). Supplementary accessories are delivered in separate packaging together with fixing hardware.

MAXIMUM LOAD CAPACITY FOR SZB SE CABINETS

Base type	Maximum weight of equipment mounted in cabinet
levelling feet	1360 kg*
castors - type 300	500 kg
plinth	1360 kg*

*) Declared carrying capacity is valid if maintaining the maximum distance between mounting profiles within the cabinet. If the cabinet is set on feet, for ensuring carrying capacity you must also tighten jam nuts to the bottom plate.

CATALOGUE NUMBER OF OTS1 CABINET

WZ-OTS1 - XXX - XXXX - 11 - 0000 - XXX

INSTRUCTIONS FOR ORDERING OTS1 CABINET

- When ordering the OTS1 cabinet, please provide the appropriate **catalogue number according to the above information**.
- The next step is to specify catalogue numbers of supplementary accessories (such as: plinth, castors, middle mounting profiles, shelves, blanking plates, power strips, fan units etc.). Supplementary accessories are delivered in separate packaging including fixing hardware.

MAXIMUM LOAD CAPACITY FOR OTS1 CABINETS

Base type	Maximum weight of equipment mounted in cabinet
levelling feet	1000 / 1360** kg
castors, type 150*	150 kg
castors, type 300*	500 kg
plinth*	1000 / 1360** kg

*) Supplementary accessories

**) For loads from 1000 to 1360 kg, the cabinet must be retrofitted with an additional pair of C-profiles (page 117). Another condition for ensuring declared carrying capacity, applicable also for loads up to 1000 kg, is to maintain maximum distance between mounting profiles within the cabinet, and for feet, tighten jam nuts to the bottom plate.

SZB DO MANAGEMENT CABINET SYSTEM

SZB DO management cabinets have been designed to increase space in server cabinets. Using the system, an extra space of 300-600 mm can be obtained within a server cabinet to allow room for installation of non-standard sized or additional equipment (e.g. power strips, ducts or holders mounted to the dedicated mounting plate). Our range of products includes a system of management cabinets installed between server cabinets arranged in rows or installed in front of or behind a server cabinet.

MANAGEMENT CABINET INTALLED BETWEEN SERVER CABINETS OR NEXT TO SERVER CABINET

1 - server cabinet, 2 - management cabinet

- Fixed to cabinet's side wall.
- Fitted with a set of C-profiles for installation of accessories.
- Bottom and top plates provided with cable entries.
- Complete front and rear panel provided with single-point locks.
- Lack of side panels; management cabinet fully compatible with ZPAS server cabinets; available server cabinet side panels.

DSR 19" COLOCATION CABINET

DSR cabinets bayed together

ALLOWS FOR PLACING MULTIPLE INDEPENDENT SERVERS IN ONE CABINET

MAIN FEATURES

- Front and rear door made of perforated sheet steel, offered in 3 standard heights of 47 U, 23 U, 11 U. The rear of the cabinet can be also fitted with perforated sheet.
- Colocation cabinets come with steel perforated side panels, these side panels can double up as cabinet dividers when cabinets are bayed together.
- Doors and panels are fitted with standard single point locks; multiple point locks can be applied on request.
- Individual compartments are separated with horizontal dividers that are fixed directly to the frame. Each compartment has its own set of 19" mounting profiles and split cable ducts. These ducts are on both sides of the cabinet. Cable entry points are possible from either the top or bottom of the cabinet.
- Both top and bottom plate have 380x210 mm opening that might be used either for a fan unit or cable entry. These access points can be covered using various blanking plates. Additionally there are 2 slim, side cable openings. For top cable leading it is necessary to use roof with cable openings instead of the solid roof.

Colocation cabinets are typically used for indoor applications. They are specially designed to protect equipment installed inside and provide it with appropriate ventilation. There is one standard overall dimension with 6 different combination options for the colocation cabinets.

When designing DSR cabinets, ZPAS applied unique design principles normally found in tailor made cabinets with ventilation systems.

TECHNICAL DATA

Material:

Sheet steel

Protection degree:

IP 20 in accordance with EN 60529

Surface finishing:

Frame, roof, panels, doors, plinth - powder paint, light grey (RAL 7035). All other colour options on request.

Mounting profiles and cable ducts - Al-Zn coated.

Maximum load capacity:

The maximum weight of equipment mounted in DSR cabinets is 600 kg.

SCOPE OF DELIVERY

Cabinet in standard configuration* (cat. no. WZ-DSR-00x-x600-11-011):

- frame,
- horizontal dividers (quantity dependent on number of compartments within the cabinet),
- individual front door for each compartment,
- rear single panel for the full height of the cabinet,
- 2 pairs of 19" mounting profiles for each compartment,
- cable ducts (does not refer to cabinet without any compartments),
- solid roof,
- levelling feet,
- earthing cables.

*) Other configurations - see instructions on page 67.

COLOCATION CABINET **DSR 19"**

DSR cabinet with two compartments

DSR cabinet with four compartments, cable ducts lead from the bottom

DSR cabinet with four compartments, cable ducts lead from the top, roof with cable openings

Supplementary accessories: 1 - self-adhesive insert
2 - cable opening cover

Supplementary accessories: 3 - blanking plate for cable opening

COLOCATION CABINET **DSR 19"**

CATALOGUE NUMBER OF DSR CABINET

WZ-DSR - 00X - XXXX - XX - 011

Split of cabinet's interior:

Note:
Height of horizontal dividers is 1 U. Each compartment has individual 19" mounting profiles.

Type of base:

- 1 - levelling feet
- 2 - 100 mm plinth
- 3 - 100 mm plinth with levelling option
- 4 - 200 mm plinth
- 5 - 200 mm plinth with levelling option

Note:

For a detailed description of plinths, see pages 104-105.

Type of roof:

F - FRONT | R - REAR |
Split of front and rear door/panel:

Notes:
Split of front and rear door/panel does not have to match with interior split of the cabinet. Normally doors are fitted with single point locks without handle. On request it is possible to use handle locking system. As a standard, doors and panels have perforation with 30% clearance (perforation type A). Perforation with larger clearance is available on request (types B or C – see page 52).

LS - LEFT SIDE | RS - RIGHT SIDE |

Type of side panel:

INSTRUCTIONS FOR ORDERING DSR CABINET

1. When ordering the DSR cabinet, please provide the appropriate **catalogue number according to the above information**, which specifies the interior split of the cabinet, as well as type of doors, panels, roof and base.
2. The next step is to specify **catalogue numbers of supplementary accessories** (such as: blanking plates, power strips, fan units etc.). Supplementary accessories are delivered in separate packaging including fixing hardware.

SUPPLEMENTARY ACCESSORIES

Cable opening cover for DSR divider - page 127

Self-adhesive insert of DSR divider - page 127

Blanking plate of cable opening - page 127

Earthing bar - page 120
Set of fixing/spacer bolt - page 120

SZE2 PC 19" COMPUTER CABINET IP54

DESIGNED FOR COMPUTER EQUIPMENT REQUIRING ANTIDUST PROTECTION

- Designed for protection of computer equipment used in industrial areas.
- The design enables selective admission of access to each section of the cabinet through use of locks with different cylinders.
- Design based on modified frame of the SZE2 cabinet.
- Easy baying in rows with SZE2 and SZE2 PC cabinets.
- Possibility of using supplementary accessories designed for SZE2 cabinets (page 286-317) and equipment for 19" installations.
- Possibility to manufacture cabinet frame, door, panels, supplementary roof and plinth of stainless sheet steel (on individual request).
- Non-standard versions on customer's request.

SCOPE OF DELIVERY

- sframe set on 100 mm plinth,
- 2 pairs of 19" mounting profiles,
- 2 flushed side panels,
- double front door with 3-point (rod-lath) lock and patent cylinder (upper door with glass, lower door solid),
- door for keyboard part with single-point lock (cam lock),
- rear panel,
- universal drawer for keyboard,
- solid blanking plate for top including sealing gasket,
- sliding gland plates for adjustable cable entry.

TECHNICAL DATA

Material:

Frame, side panels, solid steel door, plinth, mounting profiles - sheet steel
 Door with glass - sheet steel, acrylic glass

Protection degree:

IP 54 in accordance with EN 60529

Surface finishing:

Frame, door, panels, plinth - powder paint with thick structure, light grey (RAL 7035). All other colour options on request.

Mounting profiles - Al-Zn coated.

Maximum load capacity:

The maximum weight of equipment mounted in SZE2 PC cabinets is 600 kg.

Roof - supplementary accessories (see page 288)

SZBK 19" CABINET COMPATIBLE WITH EMC REQUIREMENTS

SZBK cabinet 600 mm wide

SHIELDED CABINET FOR APPLIANCES WHICH REQUIRE PROTECTION FROM HIGH ELECTRO-MAGNETIC INTERFERENCE

- Cabinet designed for indoor usage in rooms with working appliances which emit electromagnetic waves.
- Compatible with EMC requirements.
- Cabinet has received independent certification which acknowledges its shielding protection effectiveness:
 - certificate of Institute of Telecommunication and Acoustic, Polytechnic of Wrocław,
 - certificate the Agency of Security, Warsaw.
- Cabinet can be equipped with optional ventilation and power cabling system, EMC protected.
- Cabinet can be equipped with some elements of supplementary accessories of SZB cabinets - plinths or castors, shelves, power distribution units etc.
- Non-standard versions on customer's request - see pages 72-73.

SCOPE OF DELIVERY

- frame,
- solid steel front door,
- two side panels,
- rear panel,
- standard roof,
- blanking plates for top and bottom plate of the frame,
- 2 pairs of 19" mounting profiles,
- earthing bar and cables,
- set on levelling feet,
- doors, panels, and roof fitted with a special conductive EMC seal.

TECHNICAL DATA

Material:

Sheet steel

Protection degree:

IP 61 in accordance with EN 60529.

Surface finishing:

Frame, roof, panels, doors, plinth
- powder paint, light grey (RAL 7035).
All other colour options on request.

Mounting profiles, C-profiles - Al-Zn coated.

Maximum load capacity:

As given for SZB cabinets – see chart on page 43.

SJB 19" NETWORK CABINET

SJB 15 U cabinet finished in RAL 9005

CABINET FOR OFFICE APPLICATIONS

- SJB cabinets are perfect solution for small network systems installed in offices.
- The design of the cabinet is based on a self-supporting body with no frame.
- Desktop made of furniture board gives the cabinet a sophisticated look and allows it to blend in with the existing interior decor.

TECHNICAL DATA

Material:

Body, rear panel, mounting angles - sheet steel

Door - safety glass

Desktop - MDF board

Protection degree:

IP 20 in accordance with EN 60529.

Surface finishing:

Body and rear panel – powder paint, RAL 7035 or RAL 9005.

Other colour options available on request.

Mounting angles – Al-Zn coated.

Desktop colour:

As a standard option, cabinets are supplied with desktops

made of Calvados-laminated MDF board. Other desktop

colours or materials are available on request.

View of the bottom plate in the SJB cabinet. At the rear panel, there is a cable opening covered with knock-out blanking plate which can be replaced with a brush strip (supplied together with the cabinet).

SCOPE OF DELIVERY

- cabinet body with safety glass door and removable rear panel,
- desktop made of furniture board,
- 2 pairs of mounting angles spaced at 19",
- levelling feet,
- rear panel earthing cable,
- brush strip for the cable opening (instead of knock-out blanking plate).

SUPPLEMENTARY ACCESSORIES (ORDERED SEPARATELY)

- earthing strip (page 94),
- shelves, drawers, power strips etc. (pages 93, 111-116, 122-123, 130-147, 260-261, 263),
- desktop elevation kit.

DESKTOP ELEVATION KIT FOR SJB CABINET

The kit makes it possible to elevate the desktop by 19 mm over the top plate, thus increasing air flow through the cabinet, and enables fan mounting to the top plate.

Scope of delivery:

Set: 4 screws M6x30, 4 washers, 4 spacing sleeves

Package	Catalogue number
1 set	WZ-3987-90-00-000

SZU 19"/21" TELECOMMUNICATION CABINET

SZU 21" cabinet with metal perforated door

UNIVERSAL TELECOMMUNICATION CABINET

- Designed according to the ETS 300 119-2 and IEC 917-2-1 standards.
- Depending on mounting profiles used, it makes it possible to install equipment in 19" or 21" spacing.
- Application of 21"-19" adapters allows installation of both 19" and 21" appliances in one cabinet.
- Possibility to set the cabinet on adjustable feet hidden in the bottom plate of the frame. Adjustment range 15 mm.
- Insertion of cables into the cabinet from the top and from the bottom through maximally enlarged openings in the top and bottom plate.
- Side panels additionally protected from the inside against disassembly from the outside.

SCOPE OF DELIVERY

- cabinet's frame
- mounting profiles in 19" or 21" spacing. In cabinets 800 and 600 mm deep there are two pairs of mounting profiles; with just one pair in cabinets 300 mm deep.
- two side panels
- front door
- rear door or rear panel
- eight cable bars
- earthing bar
- two perforated blanking plates (in the top and the bottom plate)
- ESD antistatic earthing band

Available types of front and rear door:

- glass door with two single locks
- metal perforated door with three point lock
- rear door can be changed for rear panel

TECHNICAL DATA

Material:

Steel sheet

Surface finishing:

Frame, panels, metal door - powder painted in RAL 7035. Application of other colours on request.

Mounting profiles and blanking plates in the top and bottom plate - Al-Zn coated

Maximum load capacity:

The maximum weight of equipment mounted in SZU cabinet is 250 kg

Supplementary accessories ordered separately

(see page 128):

- adapters for fixing 19" appliances on 21" mounting profiles
- lifting eyes

SD2 19" WALL-MOUNTED NETWORK CABINET

SD2 cabinet 12 U with safety glass door

DOUBLE-SECTION CABINET

- Designed for indoor applications.
- Available in 5 usable heights (see reference chart).
- Consists of two basic parts:
 - 19" part with safety glass or steel door,
 - wall-mounted part with removable rear panel.
- A standard cabinet is equipped with two easily adjustable mounting angles spaced at 19".
- The steel door and rear panel are provided with earthing cables.
- The wall part of the cabinet has two cable openings. One cable opening is completed with a brush strip, the other is covered with knock-out blanking plate.
- The door opening direction and cable opening layout can be easily changed by rotating the cabinet by 180°.
- Wide range of supplementary accessories: shelves, drawers, fan kit, power strips, blanking plates, earthing bar etc.
- Cabinet can be equipped with additional rear adjustable 19" mounting angles or mounting profiles.

SD2 cabinet - rear view

TECHNICAL DATA

Material:

Body, rear panel, mounting angles - sheet steel
 Door - safety glass or sheet steel

Surface finishing:

Powder paint, light grey (RAL 7035).
 All other colour options on request.
 Mounting angles - Al-Zn coated.

Protection degree:

IP 20 in accordance with EN 60529
 (does not apply to brush cable entries).

SCOPE OF DELIVERY

Cabinets are packed in cardboard boxes. In the packing there is a template for drilling holes in the wall.

BASE

Simple plinth 200 mm high with solid covers

Simple plinth

- For cabinets: SZB, OTS1, SZB SE, DC, DSR, SZBk.
- Possibility of fixing into the room's floor.
- Possibility of adding rubber vibro-shock absorbers.
- It consists of the following elements ordered separately:
 - Plinth 100 mm high: 4 simple corners 100 mm high, 4 side panels (each may be solid, perforated or with brush opening), 4 vibro-shock absorbers (option).
 - Plinth 200 mm high: 4 simple corners 200 mm high, 8 side panels (each may be solid, perforated or with brush opening), 4 vibro-shock absorbers (option).

100 mm plinth with perforated cover at the front and cover with brush opening at the rear

Plinth with levelling option

- For cabinets: SZB, OTS1, SZB SE, DC, DSR, SZBk.
- Levelling by means of feet.
- It consists of the following elements ordered separately:
 - Plinth 100 mm high: 4 corners 100 mm high with levelling option (with feet), 4 side panels (each may be solid, perforated or with brush opening).
 - Plinth 200 mm high: 4 corners 200 mm high with levelling option (with feet), 8 side panels (each may be solid, perforated or with brush opening).

Plinth with pull out stabiliser, 100 mm high

Plinth with pull out stabiliser

- For cabinets: OTS1, SZB SE, DC.
- Equipped with a stabiliser that protects the cabinet from tipping during the ejection of servers or other heavy devices installed on moving guides.
- Used where the cabinet cannot be attached to the floor.
- It consists of the following elements ordered separately:
 - Plinth 100 mm high: 4 simple corners 100 mm high, 3 side panels (each may be solid, perforated or with brush opening), 1 assembly consisting of pull out stabiliser.
 - Plinth 200 mm high: 4 simple corners 200 mm high, 7 side panels (each may be solid, perforated or with brush opening), 1 assembly consisting of pull out stabiliser.

Assembly consisting of pull out stabiliser

It consists of a stabiliser with two guides.
The assembly height is 100 mm.
It can also be used for 200 mm plinths.

Material:

Stabiliser - sheet steel, powder painted in light grey (RAL 7035) or black (RAL 9005).

Guides - sheet steel Al-Zn coated

Scope of delivery:

Assembly consisting of pull out stabiliser with fixing accessories.

Plinth corners

They are available in two types:

- Simple corners – they can be fixed to the room's floor and provided with rubber vibro shock absorbers.
- Corners with levelling option – with feet.

Material:

Corners: sheet steel powder painted in light grey (RAL 7035). Levelling feet: see page 108.

Scope of delivery:

Set of 4 corners include fixing accessories for plinth side panels and assembling a plinth to the cabinet. Corners with levelling option are delivered with adjustable feet.

ACCESSORIES FOR CABINETS AND OPEN RACKS

EARTHING ELEMENTS

Earthing bar

Fixing/spacer bolt

Earthing bar

For free-standing cabinets.

In the following cabinets: SZB, OTS1, SZB SE and DC the earthing bar is screwed to threaded bushings placed in the bottom of the cabinet frame.

In DSR cabinet, the earthing bar is fixed onto the frame's post/profile using 2 fixing/spacer bolts.

Material:

Copper

Scope of delivery:

Earthing bar with screws for assembling in the cabinet.
Two fixing/spacer bolts for mounting the earthing bar in DSR cabinet are to be ordered separately.

Product name	Package	Catalogue number
Earthing bar Cu 15x5x375 mm	1 pc.	WZ-3393-11-00-000
Fixing/spacer bolts for mounting the earthing bar in DSR cabinet	1 pc.	WZ-2645-15-00-000

Earthing cables

Earthing cable set

Insulated copper cables for joining removable elements of the cabinet with earthing bar.

Equipped with contact eyes Ø 6 mm.

Material:

Copper cables 6 mm²

Scope of delivery:

Earthing cables are sold in sets in accordance with the chart below.

Description of set	Package	Catalogue number
Cable 300 mm long - 4 pcs. Cable 400 mm long - 2 pcs. Cable 600 mm long - 1 pc. Fixing accessories	1 set	WZ-SB12-00-01-000
Cable 300 mm long - 2 pcs. Cable 400 mm long - 2 pcs. Cable 600 mm long - 1 pc. Fixing accessories	1 set	WZ-SB12-00-02-000

ACCESSORIES FOR CABINETS AND OPEN RACKS

BAYING CABINETS IN ROWS

Baying bolt for cabinets: SZB, OTS1, SZB SE

For quick and easy baying SZB, SZB SE or OTS1 cabinets in rows. In order to join 2 cabinets, a total of 4 baying bolts are required.

Material:
Galvanized steel

Scope of delivery:
Baying bolt - 1 pc. with nuts and washers.

Baying bolt

Baying of SZB cabinets

Set of elements for baying DC server cabinets

A set of elements for baying DC server cabinets with one another or baying DC server cabinets with management cabinets, side heat exchangers or row heat exchangers. One set is intended for baying two cabinets.

It consists of clamp connectors for joining cabinet frame's profiles and screws, nuts and washers for joining bottom and top plates. In order to ensure good electrical conductivity between cabinet frames, one of the screws is provided with contact washers instead of standard ones.

M8 screw with nut and flat washers

M8 screw with nut and contact washers

Clamp connector

Description of set	Package	Catalogue number
Clamp connector - 4 pcs. Screw M8 - 4 pcs. Hexagonal nut M8 - 4 pcs. Flat washer - 8 pcs. Contact washer - 2 pcs.	1 set	WZ-2565-13-02-000-DC

USE OF CLAMP CONNECTOR

Baying cabinets without side panels

Baying cabinets with side panels

1. clamp connector, 2. left cabinet frame's profile, 3. right cabinet frame's profile, 4. left cabinet side panel, 5. right cabinet side panel

ACCESSORIES FOR CABINETS AND OPEN RACKS

MASKING ITEMS

Blanking plate for DSR cable opening

For concealing unused cable openings in the top and bottom plate of DSR colocation cabinet.

One cable opening (580 x 40 mm) accommodates four blanking plates.

Material:

Al-Zn coated sheet steel

Scope of delivery:

Blanking plate complete with self-tapping screw for fixing to the top or bottom plate of the cabinet.

Dimensions [mm]	Package	Catalogue number
145 x 70 x 6	1 pc.	WZ-2645-12-01-000

Cable opening cover for DSR divider

For covering unused cable openings in the horizontal divider of DSR colocation cabinets.

One blanking plate is designed for covering one or two cable openings.

Material:

Sheet steel powder painted in light grey (RAL 7035).

Scope of delivery:

Cable opening cover with self-tapping screw for fixing to the divider.

Dimensions [mm]	Package	Catalogue number
300 x 46 x 23	1 pc.	WZ-2645-11-01-011

Self-adhesive insert of DSR divider

The self-adhesive insert is used to seal horizontally between the dividers and the side panels within DSR colocation cabinets. This prevents foreign objects passing between compartments.

Material:

Polyurethane gasket 30 x 30 mm

Scope of delivery:

One 2 m length is sufficient for sealing 3 dividers within colocation cabinet.

Package	Catalogue number
2 m	WZ-2645-09-00-000

ACCESSORIES FOR CABINETS AND OPEN RACKS

SUPPLEMENTARY ACCESSORIES FOR SZU CABINETS

Adapters for installing 19" appliances on 21" mounting profiles

Material:

 Maximum load as in the table below
 Network interface Ethernet RJ45 (10/1000 BaseT)
 Protocols TCP/IP, HTTP, SNMP, SMTP, Syslog, DHCP
 Protection degree IP 20
 Supply cable 3 m (other lengths within of 2-5 m scope, available on request), white or black, conductor section: 1,5 mm² (16 A strips), 2,5 mm² (3 x 16 A strips) or 4 mm² (32 A and 3 x 32 A strips)

SCOPE OF DELIVERY:

Power strip with brackets, set of fixing accessories.

Note: For installation in vertical position additional elements needed, must be ordered separately - see pages 140-141

POWER SUPPLY SYSTEMS

MPSM-S1 Microprocessor Power Control Panel

The most important factors that determine the correct operation of modern automation, electronics, industrial computers and other devices are the correct power supply and the appropriate climatic conditions. These are necessary to ensure ongoing operation of priority infrastructure equipment – server room, data communication, power engineering.

MPSM-S1 is a programmable 19" panel for power supply, control, monitoring and recording. It provides voltage, power and current measurement for each socket, and also temperature and humidity measurement. The device is equipped with an unparalleled set of features that make it indispensable in data communication infrastructure. Also, MPSM-S1 is equipped with a 4 GB internal memory used for storing the measurement results, events, alarms which lasts for about 24 months of continuous recording.

USABLE FEATURES

- **SOFT-START – soft start of servers, cabinets, automation components, etc.**
Allows for defining individual power-up delays for individual panel sockets after power supply recovery or after activation of the SLAVE sockets. This allows you to set a dedicated power-up scenario for the entire set of devices powered from the MPSM-S1 panel.
- **MASTER-SLAVE – energy conservation**
Automatic shut-off of SLAVE sockets (devices) when the MASTER device (socket) is powered down. The level of energy consumption for the MASTER socket is constantly monitored by the power supply panel and when it exceeds the user-defined threshold, the SLAVE sockets are re-powered up. Powering up and down has also user-defined time delay. Each socket in MPSM-S1 panel can work in MASTER, SLAVE or NONE mode (excluding MASTER-SLAVE functionality). With this solution, you can change the configuration of the set powered from the MPSM-S1 panel without having to physically plug the devices to dedicated sockets (continuity of operation).
- **PDU-THERMOSTAT – multi-stage control of fans, heaters and air conditioners**
Each panel socket can be activated by the temperature on the basis of being above or below the user-defined value. Individual socket can also be activated by a signal below or above different set temperatures.
- **PDU-HYGROSTAT – multi-stage control of humidifiers and air dryers**
Each panel socket can be activated by humidity levels on the basis of being above or below the user-defined value. Individual socket can also be activated by a signal below or above set values.

- **Output control**
Allows for powering down any panel socket regardless of its mode and time.
- **Indication of alarm states:**
 - exceeded set value for current or underload of individual sockets
 - exceeded set value for current or underload of the entire set of connected receivers
 - grid voltage above or below the setpoints
 - ambient temperature above or below the setpoints
 - humidity above or below the setpoints
- **Device settings:**
 - hysteresis (ΔT) for thermostat
 - hysteresis (ΔH) for hygostat
 - time delay for the MASTER-SLAVE function
 - load display mode power (VA) or current (A)
 - reset to factory defaults
- **On-line monitoring of:**
 - current and power for individual slots
 - current and overall joined power
 - mains voltage
 - temperature and humidity
- **Internal database for:**
 - recording of measurements, events, alarms
 - clock, calendar with battery backup
 - even 24 months of continuous recording
- **Ethernet Interface:**
 - data read and write via network (LAN/WAN)
 - remote on-line management and monitoring
 - SNMP, SNT, DHCP
 - Windows® management application
- **Display settings**
Choosable content of display.

Thanks to the special technique used for creating the device software, all functions are executed in parallel. It means that while we're in menu editing settings, the device is working in the background, performing its status tasks and immediately responds to changes which have just be done or received measurements. After a power loss, the device will remember the last saved configuration. The clock and the calendar work even during prolonged power failure.

POWER SUPPLY SYSTEMS

MPSM-S1 MICROPROCESSOR POWER CONTROL PANEL

SCOPE OF DELIVERY

Product name	Package	Catalogue number
MPSM-S1 Microprocessor Power Control Panel		
Accessories supplied with the panel: power supply cable, temperature and humidity sensor with 1.8 m cable, two brackets for mounting the panel in a 19" cabinet along with fixtures (screws, washers, cage nuts), four rubber feet, cable management tray with a complete set of cable clips and fasteners, software with operating manual on a CD.	1 set	WZ-4994-01-00-161
Temperature and humidity sensor with 1.8 m cable (spare part)	1 pc.	T1Z-01-0045

TECHNICAL SPECIFICATIONS

Power input	Supply voltage	85-260 V AC	
	Power consumption	30 W	
	Frequency	50 Hz	
	Maximum overall sockets current	16 A	
Power output	Output voltage	85-260 V AC (supply voltage dependent)	
	Maximum current for a single socket	10 A	
Protections	Current	i(max) = 20 A continuous for 150 % i(max) shut-down in 1 h, for 200 % i(max) shut-down in 5–25 sec. for 300 % i(max) shut-down in 1.6–4.8 sec., parameters for the working temperature of 25 °C	
Measurements	Voltage	Measuring range: 85-260 V AC Resolution: 1 V	Class: 2.5% (for sine waves) Frequency of measurements: 1/sec.
	Socket currents 1-8	Measuring range: 0-16 A (sum), 0-10 A (socket) Resolution: 0.01 A Class: 5 % (for sine waves) ± 100 mA Frequency of measurements: series of 8 measurements/sec.	
	Temperature	Measuring range: 0–85 °C Resolution: 0.1 °C	Measuring error: typical ± 0.3 °C Frequency of measurements: 1/sec.
	Humidity	Measuring range: 0-100 %RH Resolution: 0.1 % RH	Measuring error: typical ± 2 % RH Frequency of measurements: 1/sec.
	Frequency of measurements	One series of measurements/sec. (11 measurements/sec.)	
Working conditions	Working temperatures	5-45 °C	
	Working humidity	10-85 % (no condensation)	
Casing	Dimensions	19" x 1U x 190 mm	
	Weight	2.5 kg	
	Protection class	IP 20	

Note:

Due to the continuous construction development and changes of technical requirements, ZPAS S.A. reserves the right to change these parameters.

SOFTWARE FEATURES

In the era of globalization, data communication devices and people who manage them are often miles apart, while the devices themselves are scattered over great areas, creating locally smaller and larger systems. To make remote managing of data communication infrastructure with MPSM-S1 devices as convenient as possible, we created Windows-dedicated software. Using a built-in address book, the software connects to a specific MPSM-S1 device to perform configuration, retrieve and save data. This way, you can manage and control large systems from a single location. The application consists of tabs containing all the functions of the MPSM-S1. The first tab – DASHBOARD – is the instrument panel which contains the key parameters measured by the device. The panels include also the ARCHIVE tab with filters that you can use to download and view historical data, such as measurements, events, alarms, configuration changes.

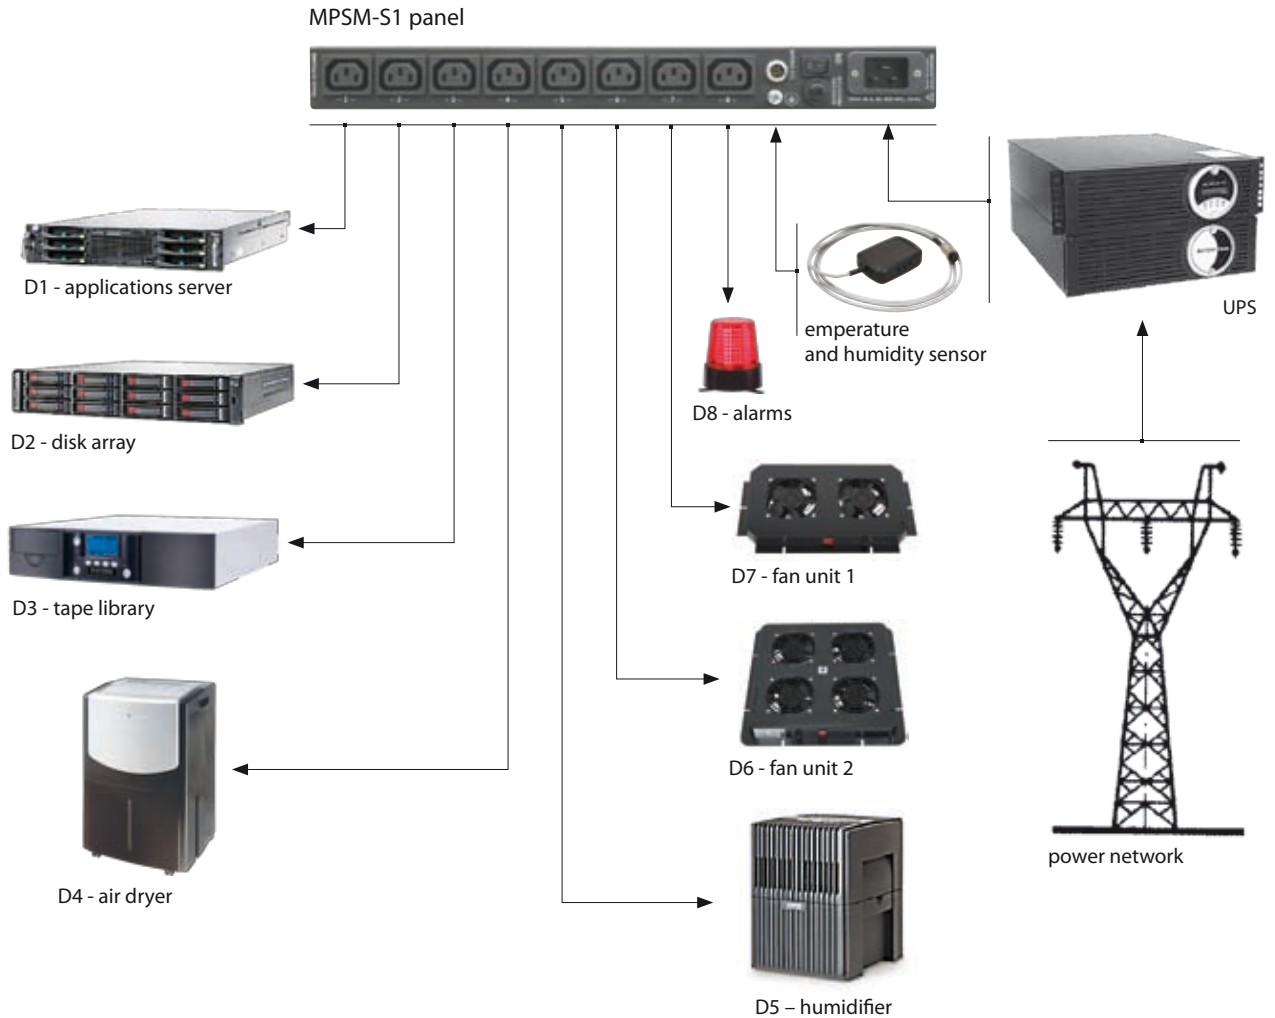

You can generate as many windows with historical data as you want so you can compare the data in various configurations based on selected filters. Data can also be exported to a CSV file and then imported into Excel, for example. The application has a "back to the past" feature where you can select any point on the archives diagram to go back to that moment in time to see measurements, events, alarms and configuration. The data will be presented in the main application as if they were happening right at this moment. MPSM-S1 supports SNMP protocol in read mode. The software comes with an SNMP tree model as a MIB file which can be imported into your control systems. The device also supports TRAP, meaning it sends alarm and event notifications to predefined servers. Codes and descriptions of TRAPS are included with the software.

POWER SUPPLY SYSTEMS

MPSM-S1 MICROPROCESSOR POWER CONTROL PANEL

APPLICATION SCENARIO

Example of programming the panel functions:

SOFT-START

Scenario for starting the devices after power supply recovery:

Time	Action
0 s	Power start
2 s	D6
4 s	D7
6 s	D8
8 s	D4
10 s	D5
12 s	D3
14 s	D2
90 s	D1

MASTER-SLAVE

Scenario for powering up Slave devices after powering up the Master device:
 D1 - Master
 D2, D3, D4 - Slave
 T = 5 s (delay time for powering down and up the Slave devices)
 I = 0,5 A (current drawn from the Master slot; below this value, the Master device is regarded as powered-down)

THERMOSTAT/ HYGROSTAT

Scenario for powering up cooling, humidifying and drying devices in the case of exceeding programmed temperature and humidity thresholds:
 D4: RH_{max} = 80 %
 D5: RH_{min} = 20 %
 D6: t_{max} = 25 °C
 D7: t_{max} = 27 °C
 D8: t_{max} = 32 °C
 RH_{min} = 15 %

INTERNAL ALARMS

Load alams
 D1: I_{min} = 0,1 A
 Temperature alams
 T_{max} = 35°C
 Voltage alams
 U_{max} = 250 V
 U_{min} = 207 V
 If the current, temperature or voltage values are outside preset thresholds, the internal panel alarm will be signalled (sound signal and a flashing message on the display).

POWER SUPPLY SYSTEMS

MIKROPROCESOROWY PANEL STEROWANIA MOCĄ MPSM-S1

SCENARIO DESCRIPTION

The MPSM-S1 device supports the cabinet holding set of devices operating within one logical solution, UPS, main ventilation panel, auxiliary ventilation panel, humidifier, air dryer and alarms. The logical solution should be understood as a set of interdependent devices, each of which is necessary for proper operation of the whole. In such a case, the appropriate set power-up scenario is extremely important. For example, when the server is turned on faster than the disk array, then it will not detect the disk array at the time of checking the readiness of individual devices and thus the entire system may fail to start. In this scenario, the server is switched on as the last the device with an additional time delay. Then you can be sure that all of its peripherals (disk array, tape library, etc.) are ready to work and will return ready-to-use during data bus scanning. Furthermore, when the main device of the system is turned off, the other devices do not have to be working any longer.

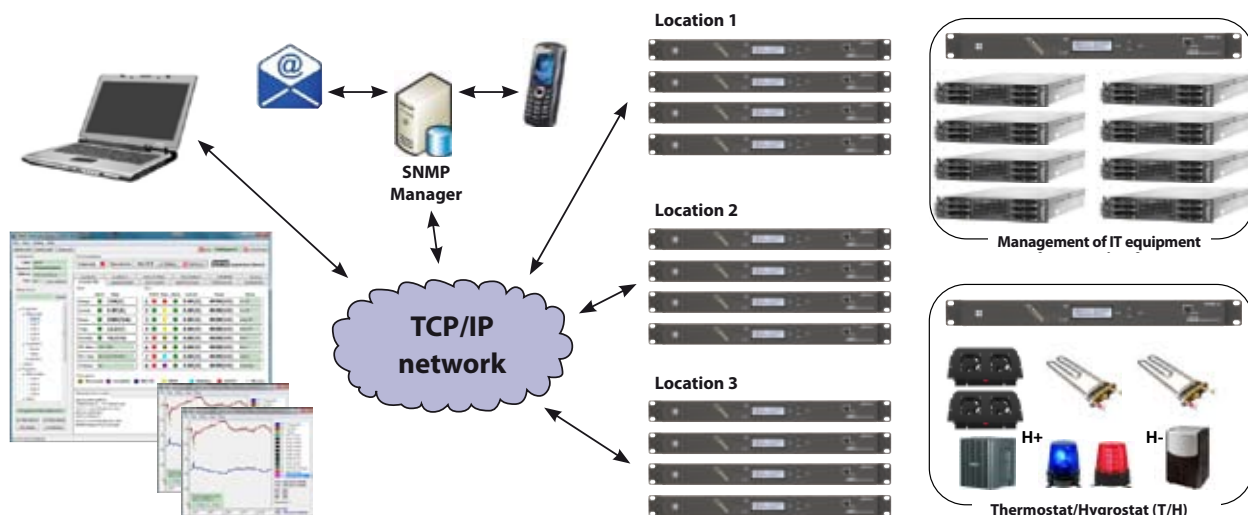

In this configuration, the MPSM-S1 ensures the following:

- correct scenario for powering up the devices
- a device dependent on the master server is disconnected after the DeltaMS time, when the server is remotely or physically switched off
- maintaining constant temperature by controlling the ventilation panel, and in the next step, when the temperature continues to rise, powering up the auxiliary ventilation panel
- maintaining constant humidity in a room by switching the humidifier on when RH humidity drops below 20 %, and switching the air dryer on when RH humidity rises above 80 %
- MPS M-S1 alarm and external alarm (alarm lamp) when the MPS M-S1 have exhausted all measures and is no longer able to maintain the correct ambient temperature or humidity
- MPSM-S1 alarm when the server is disconnected or shuts down by itself due to a failure or other actions
- supply voltage level control and MPSM-S1 alarm when the value of this voltage exceeds the allowable limits
- on-line visualization of temperature, humidity, supply voltage or currents on each of the slots, and their overall values from all slots; all on the LC D display

Note:

The parameter values used in the scenario are merely illustrative and may vary from those in specific real systems.

MONITORING AND CONTROL SYSTEM BASED ON MPSM-S1 DEVICES

POWER SUPPLY SYSTEMS

**PDU-1
switched power distribution unit**

8-port power strip suitable for installation in a 19" rack server cabinet. The strip takes up 1U in height. It has a 10/100Mbit network interface for remote monitoring of power consumption, and alerting in the event of exceeding selected states by means of sending an e-mail or SNMP. With this power strip you can remotely switch on/off each socket separately (via web interface), **and change power supply parameters, including the total power consumption (for the entire strip).**

The strip has a sound system to alert personnel in the case of system overload. Also, a digital indicator to inform about total power consumed by connected servers is installed in the front section. The maximum load for the entire strip is 16 A.

Package	Colour	Catalogue number
1 pc.	RAL 9005	T1Z-01-0025

GENERAL DESCRIPTION OF THE POWER STRIP

- Power parameters meter..... digital measurement with display, True RMS
- Installationrack – horizontal 19" 1U, support for 8 service outlets
- Remote monitoringWeb, SNMP, included software
- Audible alarm2-phase, warnings and overloads
- Types of alarms.....e-mail, Trap SNMP, sound
- Safeguards.....16 A fuse
- Protocols.....http, https, SNMP, DHCP, UDP
- Outlet controlallows for controlling each outlet separately (switching on/off)
- Allows for defining sequential switching on/off.
- It has an SSL certificate and provides for call encryption.
- Load control: global for the entire device.
- Defined alarm levels.

GENERAL DESCRIPTION OF THE DEVICE

- Server output 8 x IEC 320 C13
- Strip input..... 1 x Type F (Unischuko)
- Safeguard 1 x fuse 16 A
- Network connectors..... 1 x RJ45 Ethernet
- Power consumption info.....3-digital indicator, range: 0 A ~ 20 A
- Current and voltage measurement. . . 0.1 A resolution, +/-2% accuracy
- Operating voltage.....230 V
- Frequency.....50/60 Hz full range
- Max. output current 16 A
- Temperature0–40°C
- Humidity.....0%–90%
- Dimensions 90 x 432 x 44 mm
- Weight.....3 kg

POWER SUPPLY SYSTEMS

**PDU-2
switched power distribution unit**

8-port power strip suitable for installation in a 19" rack server cabinet. The strip takes up 1U in height. It has a 10/100Mbit network interface for remote monitoring of power consumption, and alerting in the event of exceeding selected states by sending an e-mail or SNMP. With this power strip you can remotely switch on/off each socket separately (via web interface), **and change power supply parameters (including power consumption) for each port separately.**

The strip has a sound system to alert personnel in the case of system overload. Also, a digital indicator to inform about total power consumed by connected servers is installed in the front section. The maximum load for the entire strip is 16 A.

GENERAL DESCRIPTION OF THE DEVICE

- Server output 8 x IEC 320 C13
- Strip input 1 x Type F (Unischuko)
- Safeguard 1 x fuse 16 A
- Network connector 1 x RJ45 Ethernet
- Optional connector 1 x temperature and humidity sensor
- Power consumption info 3-digital indicator, range: 0 A ~ 20 A
- Current and voltage measurement ... resolution: 0.1 A, +/-2% accuracy
- Operating voltage 230V
- Frequency 50/60 Hz full range
- Max. output current 16 A
- Temperature 0-40°C
- Humidity 0%-90%
- Dimensions 215 x 432 x 44 mm
- Weight 4.5 kg

Package	Colour	Catalogue number
1 pc.	RAL 9005	T1Z-01-0068

GENERAL DESCRIPTION OF THE POWER STRIP

- Power parameters meter digital measurement with display, True RMS
- Installation rack – horizontal 19" 1U, support for 8 service outlets
- Remote monitoring Web, SNMP, included software
- Audible alarm 2-phase, warnings and overloads
- Types of alarms e-mail, Trap SNMP, sound
- Safeguards 16 A fuse
- Protocols http, https, SNMP, DHCP, UDP
- Outlet control allows for controlling each outlet separately (switching on/off)
- Load control for each particular outlet, and global for the entire device
- Allows for defining sequential switching on/off.
- It has an SSL certificate and provides for call encryption.
- The device has Auto PING function for device check, web presence and restarting.
- It counts electricity consumption in kWh.
- Allows for linking outlets into groups and managing them.
- Action calendar for outlets and groups.
- Defined alarm levels.
- Optional ambient temperature and humidity sensor.

Temperature and humidity sensor for PDU-2

GENERAL DESCRIPTION OF THE DEVICE

- Colour RAL 9005
- Connection cable with a plug RJ11
- Temperature measurement 0-125°C
- Temperature measurement resolution 0.5°C
- Temperature measurement accuracy (+25°C) 1°C
- Humidity measurement 5-95%
- Humidity measurement resolution 1% RH
- Measurement accuracy (+25°C) 5%
- Response time (+25°C 90%) 1 minute
- Dimensions 65 x 47 x 26 mm
- Weight 150 g

ACCESSORIES FOR UPS BATTERY BACKUPS

SNMP card

Catalogue number:

T-SO-910-399 (SNMP card for RA UPS)

T-SO-910-400 (SNMP card for RM and RT UPS)

SNMP InsightPower card is an interface between the UPS and the computer network. The card makes it possible to obtain information about the operating status of the device and execute control commands remotely. Users can easily control the operation of the device using their Internet browser or tools based on SNMP, a popular network management protocol.

The system is complemented by the InsightPowerClient software compatible with the SNMP card. In the event of prolonged power outage, the software automatically shuts down computers working under Windows operating systems. A simpler software version called SNMP ShutdownAgent is capable of working with a wide array of popular system platforms.

Properties and functionalities:

- In-built SNMP agent and HTTP server for UPS monitoring
- Configuration through a terminal or via telnet
- Management of different user rights levels
- Firmware updating option
- UPS monitoring and control
- Recording events and parameters in the card's memory
- UPS starting, restarting and testing programme
- "Wake On LAN" feature for automatic PC start
- Sending e-mail messages and SNMP traps in the event of alarms
- Cooperation with the InsightPower Client software – the Windows platform
- Cooperation with the Shutdown Agent software for shutting down operating systems automatically (support for many leading system platforms).

Sensor of environmental conditions

Catalogue number:

T-SO-910-412 (sensor for RA UPS)

T-SO-910-401 (sensor for RM and RT UPS)

The sensor of environmental conditions makes it possible to monitor climatic conditions inside cabinets:

- temperature
- humidity
- door opening
- possibility of smoke sensor connection

All exceeded parameters are registered in the computer system and visualised on a local or remote computer through the Internet.

Connection of the sensor to the computer requires an SNMP card (see above).

The sensor connected to the SNMP card enables remote monitoring of the state of current parameters of the environment in the cabinet or in the room in which it is installed. Values of different parameters are available after connection via the Internet browser. In the same location, it is possible to preset permitted values of environmental parameters (temperature, humidity) and the status of the remaining sensors (smoke, fire, flooding, access) for the monitored room. If preset values are exceeded, an alarm is triggered.

Sensor for RM and RT UPS

Sensor for RA UPS

POWER SUPPLY SYSTEMS

HIGH-PERFORMANCE UPS

UPS Power Rack o mocy 120 kVA

Power Rack 20-480 kVA power supplies

Power Rack are high-performance server power supplies installed in the 19" rack cabinets. Power Rack's modular design allows replacing live parts and N+X redundancy. Power Rack is a low-cost solution, in both investment and operation. Among double-conversion modular power supplies (true on-line), Power Rack is a state-of-the-art solution, setting a new benchmark for UPS tasked with protecting sensitive equipment.

Monitoring and control of the power supply is implemented via integrated large LCD panel, GSM/SMS module and standard user-friendly management/monitoring software. All components of the power supply mounted in a rack cabinet allow you to configure the UPS as a fully redundant system that makes expansion of UPS power possible. The basic components of the power supply are power modules, system controllers, bypass modules and distribution blocks.

RELIABLE

- Supplying 20 -480 kVA power take-offs (in parallel circuits).
- Modules and systems redundancy.
- Replacement of live parts ensures continuous operation even during maintenance.
- Duplicated power and control systems provide higher reliability.
- Built-in bypass UPS switches - service and emergency one.

MULTI-PURPOSE

- Modular design allows for easy expansion and ensures easy maintenance.
- LCD display supporting several languages.
- Standard communication protocols (SNMP, RS232, Modbus), smart expansion slots, relay volt-free inputs/outputs.
- Allows for adding external battery cabinet to extend the power-up time.

ECONOMIC

- High input power factor (pf > 0.99) and low harmonic distortion (iTHD < 3%).
- Lower installation cost due to the compact size and modular design.
- Energy-efficient operation with maximum performance of 94% reduces operating costs.

POWER SUPPLY SYSTEMS

HIGH-PERFORMANCE UPS

POWER SYSTEM MANAGEMENT SOFTWARE

- remote or local power supply management,
- real-time monitoring, recording and analysis
- programming and planning of activities (e.g. battery test),
- creating reports,
- archiving of all events and actions of users in the database,
- supports RS232, RS485, SNMP, USB, depending on the type of software and solution,
- multilingual interface.

20-120 kVA → 240 kVA → 360 kVA → 480 kVA

CENTRALIZED MANAGEMENT APPLICATIONS:

- Data center solutions
- Telecommunication systems
- Industrial systems
- Computer networks
- Alarm and security systems
- Laboratories
- Medical equipment

Note:

UPS solutions for high-power systems are selected individually. Our offer also includes UPS in free-standing housing, as well as modular UPS with powers of 10 kVA and 25 kVA.

POWER SUPPLY SYSTEMS

POWER GENERATORS

Power generators

We offer VISA power generators: stationary, mobile, without enclosure or housed in enclosures or containers with sound proofing and resistant to weather conditions, with power ranging from 9 kVA to 2000 kVA. The power generators have diesel engines from Perkins, Deutz, Volvo, John Deere or Mitsubishi and alternators from Marelli or Stamford.

The power generators are equipped with fault-proof automatic systems which activate the generators in the event of power outage in the municipal (industrial) power supply network, as well as accessories enabling the generators to start in any weather conditions. The wide range of power generator accessory options includes remote panels of potential-free contacts, GSM control panels, software enabling control via the Ethernet, RS232, as well as the RS485 port in the Modbus protocol.

The power generators have digital panels with large legible LCD displays in a range of options: for manual start-up, for automatic start-up compatible with an outside automatic transfer switching equipment (ATSE) system, for automatic start-up compatible with a dedicated automatic transfer switching equipment (ATSE) system, panels for power generator synchronization with the network and for synchronization of two power generators. Additional equipment options for the engine and the compressor increase the power generator's stability, helping to maintain constant rotational speed regardless of increase in load (i.e. keep up the frequency). AVR and AVR+PMG voltage regulators stabilize the power generator's output voltage and are resistant to sudden load surges from 0 to 100 %.

Additionally, expanding the standard internal tank of the power generator is also possible. This way, without building costly external fuel installations, the generator's operating time can be extended up to 24 hours (depending on the generator's power rating). Obviously, even the expanded fuel tank has a limited volume, being an internal tank placed on the power generator's frame.

We complete power generating systems, as well as any other additional installations required (ventilation, exhaust evacuation and fuel systems with extra fuel tanks).

TABLE LISTING POWER RATINGS OF VISA POWER GENERATORS, DEPENDING ON ENGINE TYPE

POWER SUPPLY SYSTEMS

POWER GENERATORS

General description of power generators

TECHNICAL SPECIFICATIONS

VISA power generators have diesel engines from Perkins, Deutz, Volvo, John Deere or Mitsubishi and alternators from Marelli or Stamford, mounted on an anti-vibration frame. The power generators can be fully automated to enable a quick start and automatic switching of users in the event of failure in the industrial network. The power generator achieves its rate parameters within 5-15 seconds from the start. The generators can be used as emergency power supply and are compatible with uninterrupted power supply (UPS). The generators can be supplied in sound-proof enclosures. The noise level for power generators housed in sound-proof enclosures is 70-80 dB(A). The power generators also come with:

- Guard Evolution Manual control panel for starting the generator manually,
- system for charging the start-up battery during downtime to ensure full readiness for engine start-up at any time,
- integrated internal fuel tank,
- Industrial-type exhaust gas damper,
- start-up batteries,
- oil and coolant,
- electronic rotational speed regulator (depending on engine type).

EXTRA ACCESSORIES

- **Automatic transfer switching system.** Dedicated system for network monitoring and automatic switching of load supply between the network and the power generator.
- **Residential-type exhaust gas damper.** It reduces the noise level by ca. -30 dB(A) from the power generator's own noise level.

- **Coolant heater.** The device heats up the engine block to make sure it starts in any conditions. Supplied with single-phase alternating voltage, the heater has an automatic system built in the control panel.
- **Fuel system.** The majority of power generators have an integrated internal fuel tank. Available are internal tanks of varying capacity featuring automatic or manual filling systems (option: fuel pump) and, if necessary, top/bottom level limit switches (option: 2-contact fuel sensors).
- **Water-tight and sound-proof containers.** All power generator models can be provided with separate water-tight and sound-proof container enclosures. They can be delivered in variants similar to standard containers. Moreover, models with extra sound proofing (up to ca. 50 db(A)/1m) for special applications, e.g. in hospitals, residential districts, etc. are also possible.

ENCLOSURE TYPES

- **C (Cover)** – featuring light sound-proofing and resistant to weather conditions, reducing the noise level by approx. -8 dB(A) from the power generator's own noise emission level and conforming to applicable EU standards.
- **S (Silent)** – sound-proofed and resistant to weather conditions, reducing the noise level by approx. -15 dB(A) from the power generator's own noise emission level and conforming to applicable environmental protection standards.
- **SS (Super Silent)** – extra sound-proofed and resistant to weather conditions, reducing the noise level by approx. -20 dB(A) from the power generator's own noise emission level and conforming to applicable environmental protection standards.

Guard Evolution control panel

Advanced microprocessor and digital control panels for power generators with manual or automatic start-up. The panels make it possible to monitor key power generator parameters such as: voltage, current, frequency, number of hours in operation, oil frequency, battery status etc.

Guard Evolution Manual

Standard manual operating mode with remote control

Guard Evolution Automatic

Standard automatic operating mode with remote control

Guard Evolution Sync

Automatic synchronization of up to 8 power generators operating in parallel as basic or back-up power supply.

POWER SUPPLY SYSTEMS

Voltage distribution panel

Voltage distribution panel

Universal 19" enclosure for modular devices. In the standard version equipped with DIN rail and housing with 402.5 x 45.5 mm opening.

Dimensions:

- height:..... 133 mm (3 U),
- width:..... 19" (internal width: 446 mm),
- depth: 60 mm

Capacity of panel - maximum number of built-in S-type modules (width of module 17.5 mm): 22 pcs.

Material:

Sheet steel textured powder painted in light grey (RAL 7035) or black (RAL 9005).

Scope of delivery:

- In the standard version, panels are sold as empty enclosures, complete with:
- mounting base,
 - DIN rail,
 - housing,
 - fixing accessories.

Package	Colour	Catalogue number
1 pc.	RAL 7035	WZ-PS3U-00-00-011
	RAL 9005	WZ-PS3U-00-00-161

On individual request, the panel can be fitted with electrical equipment in accordance with technical documentation prepared by ZPAS or by the customer.

FIRE EXTINGUISHING SYSTEMS AND IT-ROOMS

FIRE EXTINGUISHING SYSTEMS AND IT-ROOMS

FIRE EXTINGUISHING SYSTEMS

Panel FK-RACK - widok z przodu

FK-RACK panel - rear view

FK-RACK fire extinguisher

DESIGN

FK-RACK is designed as a single monolithic 19" panel, 3 U in height, made up of:

- central fire-extinguishing and fire detection unit
- two optical smoke detectors
- main manifold
- one or two tanks containing 1 kg of fire-extinguishing gas
- solenoid valve
- pressure switch
- fire supply 230 V AC / 24 V DC
- two 12 V batteries
- sounder
- pressure gauge

OPERATION

FK-RACK, a single-zone automatic fire alarm control panel, is designed for fire detection and control of the fireextinguishing process via the solenoid valve fitted in the main manifold connected to tanks containing FE-36 extinguishing gas. The panel can be fitted in RACK-type server cabinets or automatic control cabinets with a maximum volume of 3 m³.

The panel is equipped with two optical smoke sensors, each in a separate fire detection line, which analyse air transparency. Following detection of aerosols such as smoke, they activate an appropriate procedure.

An activation of one sensor triggers a sounder and a red LED (PREALARM) lights up in one of the detection lines. An activation of the other sensor causes the red alarm LED to light up (the PREALARM LED goes out) and the in-built clock starts counting down to the release of the FE-36 extinguishing agent. After 30 seconds, the solenoid valve in the main manifold is opened, releasing FE-36 gas. Throughout the entire process, the user controls the operation of the panel by means of a range of LEDs and a pressure gauge indicating the pressure level in the manifold. Additionally, pressure is controlled by means of pressure switch placed on the manifold. Any pressure drop makes the orange LED light up.

All electrical circuits of the sensors, solenoid valve and pressure gauge are monitored for continuity. Any interruption of circuit continuity causes a corresponding LED to light up, signalling the fault of a specific element. In the event of failure of the basic power supply, the central control unit is provided with a battery (2 x 12 V).

Product name	Package	Catalogue number
Fire extinguisher FK-RACK-2 Master with 2 kg of the FE-36 extinguishing agent	1 pc.	T-SO-990-151
Fire extinguisher FK-RACK-2 Slave with 2 kg of the FE-36 extinguishing agent	1 pc.	T-SO-990-154
Cylinder for the fire extinguisher with 2 kg of FE-36, complete with manifold and valve	1 pc.	T-SO-990-156

Fire extinguishing systems and IT-Rooms	EXTINGUISHING SYSTEM FOR A SINGLE CABINET
DATA COMMUNICATION COMPONENTS AND SOLUTIONS	

FIRE EXTINGUISHING SYSTEMS

FIRE EXTINGUISHING SYSTEMS FOR SERVER ROOMS

We offer complete fire protection infrastructure for large and small server rooms. Our services comprise fire extinguishing system design (selection and optimum adjustment to the area being protected), delivery and complete assembly of equipment for fire detection and extinguishing, as well as service and maintenance of the system.

FM-200-based fire extinguishing system

A fire extinguishing system based on FM-200 gas is a decisive element ensuring appropriate fire safety of the premises being protected. Consequently, it should be operated and maintained according to applicable technical construction regulations, standards in place, principles of technical knowledge and relevant documentation.

Components of the fire extinguishing system

1. Smoke detector central unit
2. FM-200 gas cylinders
3. Extinguishing nozzles
4. Fire detectors
5. Smoke extraction system
6. Mechanism for manual deactivation of fire extinguishing
7. Mechanism for manual activation of fire extinguishing

Sample server room fire extinguishing system

FM200 is stored in cylinders with special quick opening gas valves. The available range of cylinders holding between 5 and 180 l makes it possible to adjust the required volume of gas in the smallest possible cylinder. Cylinders can be combined into sets connected with a gas manifold. Cylinders are fastened to the wall or another permanent structure with clamps.

Side effects of gas release

The following phenomena accompany the release of FM-200:

- **Blast** – release of several dozen kilograms of gas within a period not exceeding 10 sec. Blast results in strong air currents capable of moving around free-standing office equipment.
- **Noise** – gas release produces noise of relatively high intensity, though without damage to hearing.
- **Mist** – gas release results in the formation of mist around the nozzles, which reduces visibility and disappears a moment after total gas release.

NOVEC 1230-based fire extinguishing system

NOVEC 1230 is stored as liquid and released during emergency as gas. It is a fast-acting extinguishing agent thanks to the combined effect of physical absorption of heat and chemical influence on flames.

Safe

Independent research has shown that Novec 1230 poses no risk to humans staying in the premises in which the agent is released at the fire extinguishing concentration. In addition, NOVEC 1230 ensures up to 100 % safety margin – much higher than any other pure extinguishing reference agent used in terms of reference.

Effective

NOVEC 1230 extinguishes fire very quickly, before damage is caused. This is possible due to the fact that the extinguishing concentration is achieved within a maximum of 10 seconds. It is very efficient in extinguishing class A and B fires, as well as fires affecting live equipment.

Pure

NOVEC 1230 is released as a clear, non-conductive and non-corrosive gas. It leaves no remains, which eliminates the problem of removing deposits.

IT-ROOMS

In cooperation with our partners, we deliver complete data processing and storage facilities (data centres, server rooms), including:

- IT-Room booths,
- guaranteed power supply,
- precise air-conditioning,
- electronic security systems,
- fire extinguishing systems

IT-ROOM – SAFETY AND SECURITY FOR SERVER ROOMS

The central element of such facilities is the so-called secure storage unit (IT-Room). The design and basic parameters of IT-Rooms are regulated by the Polish Standard PN-EN 1047-2 (a translation of the corresponding European standard). Key parameters ensuring the safety of data and equipment are:

- elimination of electromagnetic emanation,
- protection against electromagnetic and ionizing radiation,
- fire resistance (maintaining the temperature inside the IT ROOM below 70 °C during a fire outside the booth),
- fire resistance (keeping the humidity level inside the IT ROOM below 85 % during a fire outside the booth),
- burglary protection/access control.

As a complete unit, the booth was certified according to the PN-EN 1047-2 standard specifying the stability of operating conditions for ICT equipment during a fire outside.

Parameters offered by the booth are much better than those laid down in the standard: the booth maintains the temperature below 30 °C and humidity below 67 % during a fire with a duration of at least one hour.

Safe IT booths have the following basic elements and features:

- structural elements (walls, ceiling, floor, security door, cable ducts, ventilation valves) certified for fire resistance rating of 120 minutes,
- IP 65 protection rating – dust-tight and protected against fire extinguishing water.

SERVER ROOM CABINET INSTALLATION CONCEPTS

SERVER ROOM CABINET INSTALLATION CONCEPTS

EXAMPLES OF SERVER ROOMS PROJECTS WITH ZPAS CABINETS

Data Box in the server room of ZPAS S.A. facility in Przygórze

SZB DC cabinets installed in the server room of ATM S.A. in Warsaw

SZB DC cabinets installed in the server room of ATM S.A. in Warsaw

ZPAS manufactured Data Box installed in server room of Volkswagen Motor Polska company, Polkowice, Poland

ZPAS Data Box installed in eM-I.T. in Bad Ischl, Austria

SERVER CABINETS **DC 19"**

Intended for use in Data Box and row systems

- The cabinet frame features openings for fixing of the roof and slide door of the cold or hot aisle. The side panels are envisaged with openings for arranging the cabinets in rows.
- Offered in 12 different overall dimensions.
- Expanded configuration system:
 - possibility to join cabinets in a row,
 - easy coding system enables quick configuration of the cabinet.
- Possibility of controlling ventilating air flow by application of proper type of doors as well as additional air flow management solutions (see pages 176-180).
- Complete range of accessory equipment for server cabinets.

TECHNICAL DATA

Material:

Frame, side panels, steel doors, mounting profiles, C-profiles, plinth - sheet steel
 Glass door with metal sides - mineral safety glass, sheet steel

Protection degree:

IP 20 in accordance with EN 60529
 (does not apply to brush cable entries).

Surface finishing:

Frame, roof, side panels, doors, plinth - powder paint, light grey (RAL 7035) or black (RAL 9005).
 All other colour options on request.
 Mounting profiles, C-profiles - Al-Zn coated
 Outriggers - zamak casting

SCOPE OF DELIVERY

Acc. to the configurator to be found on page 165

INSTRUCTIONS FOR ORDERING DC 19" CABINETS

1. When ordering a DC cabinet, please provide the appropriate **catalogue number according to the system on page 165**, which specifies overall dimensions of the cabinet, types of doors, side panels, roof and base, the layout of mounting profiles or angles, and the colour.
2. The next step is to specify **catalogue numbers of supplementary accessories** (such as blanking plates, power strips, air flow management items, access control elements etc.). Supplementary accessories are delivered in separate packaging together with fixing hardware.

MAXIMUM LOAD CAPACITY FOR DC CABINETS

Base type	Maximum weight of equipment mounted in cabinet
levelling feet	1360 kg
plinth	1360 kg

DC 19" SERVER CABINETS

DATA BOX - COLD/HOT AISLE

Due to greater capacity densities of data centers, increased heat generation is observed, resulting in a higher demand for more energy-efficient cooling systems. The majority of data centers provides sufficient cooling capacity but does not have the infrastructure to effectively deliver the cooling medium to high density areas. ZPAS offers cabinet systems with slide doors and roof, making it possible to deliver a data center in the "cold aisle" or "hot aisle" technology. Such solutions physically separate hot air from cold air, thus ensuring efficient cooling for IT equipment.

In "cold aisle" systems, cold air is flown through the access floor into a 120-cm-wide established between rows of cabinets. In the hot aisle system the heat generated by active devices is dissipation to the aisle's space and cold air is provided from the outside of Bata Box. Data Box solution creating space where cold air is completely separated from hot air generated by active devices. Front and rear part of cabinet should have 80 % perforation to provide the best air flow through cabinet. In the Box designed by ZPAS company is possibility to install row heat exchanger. This solution allows for cooling devices with very high power density. Using Data Box solution we raise the safety factor. Your server environment can be protected with electronic access control system, with all the events registered by master PC (see page 210).

Recommended server cabinet configurations for Data Box

In order to ensure proper air circulation inside the cabinet, the front and rear doors should be provided with perforation with clearance of 80%, as well as with additional accessories that prevent air from being dissipated within the cabinet i.e.: blanking plates, vertical masking panels, horizontal brush strips (pages 123-125, 177).

Cabinet configuration:

- front and rear doors with perforation featuring 80%,
- bottom plate and top plate of the cabinet with openings for routing cables and feeding cooling air,
- cabinet dimensions, door handle type and colour to be specified according to the following table and coding system.

 O – steel door with perforation type C and access control*
 S – double-wing steel door with perforation type C and access control*
 *) Door with access control is equipped with EsH12 electronic swing handle and holes for mount access terminal. Access terminal is ordered separately - see page 211

Cabinet's colours:

011 – RAL 7035 (light grey) 161 – RAL 9005 (black)

Layout of mounting profiles or mounting angles inside the cabinet:

1 – two pairs of 19" mounting profiles and one pair of middle mounting profiles
 2 – two pairs of 19" mounting profiles
 3 – two pairs of 19" mounting angles

| F - FRONT | R - REAR | LS - LEFT SIDE | RS - RIGHT SIDE |

Configuration of plinth sides

Four digits which specify plinth side type.
 Four zeros (0000) should be entered for cabinets without a plinth.

Each side can be:

1 – solid
 4 – with a brush opening

Base types:

0 – without any base 3 – plinth, 100 mm high
 1 – levelling feet

Roof types:

0 – without any roof For a detailed description of roofs, see page 124
 1 – standard roof

| LS - LEFT SIDE | RS - RIGHT SIDE |

Side panel types:

0 – without any panel
 1 – solid steel panel
 2 – solid steel panel with openings for baying cabinets in rows
 Elements for baying cabinets should be ordered separately - see page 121

Note:
 All front and rear doors are fitted with a rod-lath lock and swing handle.

DATA BOX - COLD/HOT AISLE

Slide door system for Data Box aisle

A Data Box can be accessed through a double-wing sliding door. Mounted on one or both sides of the Data Box aisle, they ensure safety and physical separation of cold/hot air flows. Slide door is available in three versions: without lock, with machanical lock, and with machanical lock + electronic access control (see page 210). The door is fitted with glass panes for improved control over Data Box interior events..

Material:

Sheet steel powder painted, mineral safety glass

Scope of delivery:

Two-wing sliding door, top guide, two bottom guides, two side panels of the cabinet, fixing accessories.

SERVER CABINETS IN ROWS

Server cabinet configuration with cold/hot air separation

Increasing capacities of data centers generate demand for efficient energy performance in HVAC systems. The greatest challenge in designing data centers is to ensure an optimum operating temperature of IT equipment located in server cabinets along with protection against thermal damage.

The correct temperature in a server room can be achieved by preventing cooling air from mixing with hot air generated by the active equipment running in server cabinets. An easy and efficient remedy to such problems is placing cabinet rows parallel to one another. Opposite cabinets should face one another. Cold air is delivered via the access floor and blown directly in front of server cabinets to create the so-called “cold air zone”.

In order to ensure proper air circulation inside the cabinet, the front and rear door should be provided with perforation with clearance of 80%, as well as with additional accessories that prevent air from being dissipated within the cabinet i.e.: blanking plates, vertical masking panels, horizontal brush strips – see pages 123-125, 177.

SERVER CABINETS IN ROWS

CABINET CONFIGURATION:

- front and rear doors with perforation featuring 80%,
- solid side panels,
- bottom plate and top plate of the cabinet with openings for routing cables and feeding cooling air,
- cabinet dimensions, door handle types, base types and colour to be specified according to the following table and coding system.

REFERENCE CHART OF DC CABINETS

Reference number
specifies the cabinet's overall dimensions (see reference chart). Zeroes shall be added before single-digit or double-digit numbers.

Front door types:
5 – steel door with perforation type C
9 – steel door with perforation type C and access control*
*) Door with access control is equipped with ESH12 electronic swing handle and holes for mount access terminal. Access terminal is ordered separately - see page 211.

Rear door types:
7 – steel door with perforation type C
L – double-wing steel door with perforation type C
O – steel door with perforation type C and access control*
S – double-wing steel door with perforation type C and access control*
*) Door with access control is equipped with ESH12 electronic swing handle and holes for mount access terminal. Access terminal is ordered separately - see page 211.

Cabinet's colours:
011 – RAL 7035 (light grey) 161 – RAL 9005 (black)

Layout of mounting profiles or mounting angles inside the cabinet:
1 – two pairs of 19" mounting profiles and one pair of middle mounting profiles
2 – two pairs of 19" mounting profiles
3 – two pairs of 19" mounting angles

Configuration of plinth sides
Four digits which specify plinth side type.
Four zeros (0000) should be entered for cabinets without a plinth.
Each side can be:
1 – solid
4 – with a brush opening

Base types:
0 – without any base 3 – plinth, 100 mm high
1 – levelling feet

Roof types:
0 – without any roof For a detailed description of roofs, see page 124
1 – standard roof

Side panel types:
0 – without any panel
1 – solid steel panel
2 – solid steel panel with openings for baying cabinets in rows
Elements for baying cabinets should be ordered separately - see page 121

Note:
All front and rear doors are fitted with a rod-lath lock and swing handle.

CLOSED-CIRCUIT COOLING

Server cabinet configuration for closed-circuit cooling

Evolving data center technologies lead to a wider use of blade servers and other high power density systems. High energy demand is in almost direct relation to the volume of heat produced by server rooms, and results in the formation of the so-called “hot-spots”. With varied level of generated heat, uniform cooling distribution systems are incapable of providing sufficient performance.

As an alternative, cold air distribution systems are used and their cooling capacity adjusted to the load of a given server cabinet. Side heat exchangers are perfect for such applications. Installed to the side of a server cabinet, they ensure air circulation and deliver cold air directly in front of the active device (side heat exchangers – see page 192).

Recommended server cabinet configurations for applications with the use of side heat exchangers:

In order to ensure proper air circulation inside the cabinet, the front and rear door should be provided without perforation and with all the accessories that prevent air from being directed to certain areas within the cabinet i.e.: blanking plates, vertical masking panels, horizontal brush strips (see pages 123-125, 177).

Server cabinet with a side heat exchanger. Cabinet width: 800 mm, heat exchanger width: 300 mm. Cabinet door with mineral safety glass

CLOSED-CIRCUIT COOLING

Cabinet configuration:

- steel front door solid or with mineral safety glass,
- steel rear door,
- solid side panel,
- top plate and bottom plate of the cabinet with openings for routing cables and feeding cooling air,
- cabinet dimensions, front door and door handle types, base types and colour to be specified according to the following table and drawing.

REFERENCE CHART OF DC CABINETS

Note:
All front and rear doors (exception of doors type 1) are fitted with a rod-lath lock and swing handle.

AIR FLOW MANAGEMENT IN SERVER CABINETS

With increasing power densities of data centers, air flow management in server cabinets is gaining importance. Cooling IT equipment consists in feeding cold air into a cabinet, supplying it to active devices and discharging it out of the cabinet. If hot air being discharged is drawn in and mixed with cold air at device inlets, the cooling air becomes warmer. As a result, overheating-related damage in computer devices may potentially occur. To prevent such issues, it is recommended to use proper blanking plates, masking panels, brush strips and air flow facilitation items.

List of elements

1. Vertical masking panel with cable entries (page 177)
2. Horizontal brush strip (page 177)
3. Cold air deflector (page 179)
4. Air flow guide vane (page 178)
5. Vertical hot air duct (page 179)
6. Blanking plate (pages 125)

AIR FLOW MANAGEMENT IN SERVER CABINETS

Horizontal brush strips

The horizontal brushes are fitted under and over the working surface of the mounting profiles. They are intended for limiting cold air circulation outside the working zone of the mounting profiles and preventing recirculation of hot air into the cold air inlet.

Material:
Plastic

Scope of delivery
Brush strip – 1 pc.

For cabinet width [mm]	Package	Catalogue number
600	1 pc.	WZ-5367-45-01-000
800	1 pc.	WZ-5367-45-02-000

Vertical masking panels

The vertical masking panels are intended for sealing the space between the mounting profiles and the side panel. They prevent hot air from being fed back into the cold air inlet.

VERSIONS AVAILABLE

For cabinets wide 800 mm:

1. Vertical masking panels with cable entries and openings for fixing cable clamps
2. Vertical solid masking panels with openings for fixing cable clamps

For cabinets wide 600 mm:

3. Vertical solid masking panels

The cable entries in masking panels for 800 mm cabinets are covered with a brush and their edges are protected with an edge seal. All three masking panels types are provided with a brush that, once assembled to the cabinet, fits tight to the side wall.

Material:

Sheet steel powder painted, plastic.

Scope of delivery

A set of 2 vertical masking panels of a given type with fixing accessories.

AIR FLOW MANAGEMENT IN SERVER CABINETS

Air flow guide vane

Located at the back of a cabinet, it facilitates the natural flow of hot air generated by an active device towards the top of the cabinet. The vane should be used with “a vertical hot air duct” located on the top plate of the cabinet in order to feed hot air out of the cabinet (via a separate duct) to the air conditioning unit.

Material:

Sheet steel powder painted

Scope of delivery

Vane with fixing accessories.

For cabinet width [mm]	Catalogue number

Package: 1 pc.

AIR FLOW MANAGEMENT IN SERVER CABINETS

Vertical hot air duct

Located on the top plate of the cabinet. It forms a channel for hot air flowing between the cabinet and the hot zone. Its modular design allows for height adjustments within a range of 750-1360 mm.

Material:

Sheet steel powder painted

Scope of delivery

Vertical duct with fixing accessories.

Package	Colour	Catalogue number
1 pc.	RAL 7035	WZ-5367-35-00-011
1 pc.	RAL 9005	WZ-5367-35-00-161

**Cold air deflector**

The deflector is located on the bottom plate of the cabinet in a spot where cold air is fed from the access floor. It directs the cold air stream towards the front of the cabinet (an area between the front door and the front of active devices). It is suitable for use with cabinets of 600 mm or 800 mm in width and 1000 mm or 1200 mm in depth.

Material:

Sheet steel powder painted

Scope of delivery

Deflector with fixing accessories.

Package	Colour	Catalogue number
1 pc.	RAL 7035	WZ-5367-40-00-011
1 pc.	RAL 9005	WZ-5367-40-00-161

AIR FLOW MANAGEMENT IN SERVER CABINETS

Air flow guides

Given their design and configuration options, active devices with lateral air flow require special approach in terms of the cool air flow. Special design of elements directing air flow and server racks adapted to the technical specifications of active devices and the manufacturer's instructions ensure optimum working environment.

Once we have the specification of network devices with lateral air flow to be installed in our cabinet, we will provide you with the best solution.

47U 1000x1200 mm server cabinet with Cisco NEXUS network device and air flow guides

VENTILATION AND AIR-CONDITIONING SYSTEMS

VENTILATION AND AIR-CONDITIONING SYSTEMS

VENTILATION SYSTEMS

Fan units are equipped with fan mode switch:
 I - continuous work,

VENTILATION SYSTEMS

PWS2 fan mounted on SZB SE server cabinet

PWS2 roof fan

The PWS2 fan is designed for high-ventilation demand cabinets installed in areas with low noise level requirements.

It emits more than one third less noise and saves up to 60 % of energy when compared with PWD-4W four-fan ventilation roof panel.

Mechanically, it is adapted for mounting in 380 x 380 mm standard hole which is located in the top plate of SZB, OTS1, SZB SE, DC and SZE2 cabinets. The fan can be connected directly to the 230 V AC grid or via a speed controller which can adjust air flow and thus the noise. The fan is covered with a steel grille as standard. Optionally, it can be fitted with a discharge stack for connecting it to the customer's air ducts.

Design:

Rotor and the fan plate are made of RAL 9005 sheet steel. The fan uses a single-phase asynchronous motor with built-in thermal protection.

PWS2 fan can be controlled with:

- KTS thermostat (see page 189)
- ARO 0.6 speed controller (see page 186)
- MPSK G0 microprocessor panel for fan control (see page 187)
- MPSM-S1 microprocessor power control panel (see page 142)

Technical data:

Supply 230 V, 50 Hz
 Power 0.088 kW
 Maximum speed 1350 RPM
 Operating parameters at maximum speed:
 Efficiency 3600 m³/h
 Compression 58 Pa
 Noise 64 dB
 Ambient humidity 20 up to 85 %
 Permissible temperature of forced air -20 up to +80 °C
 Motor protection class IP 44
 Body protection class IP 20
 External dimensions (H x W x D) 182 x 405 x 405 mm

Scope of delivery:

Fan with power cord without plug, protective grille and fixing accessories for mounting on top of a cabinet, installation and operating instructions.

PWS2 roof fan	1 pc.	RAL 9005	WZ-6647-30-00-161

VENTILATION SYSTEMS

PWS2 FAN EFFICIENCY AND NOISE LEVEL

Noise is generated in fans both mechanically and aerodynamically. The mechanical method mainly depends on the fan rotational speed.

Noise level is a derivative of speed. By reducing the speed of the rotor, you can limit the noise emission significantly. PWS2 fan with max. efficiency of 3600 m³/h at rated speed of 1350 RPM emits noise of 64 dB. By reducing the rotational speed, let us say, by half, you get air flow of approximately 1800 m³/h and noise emissions below 38 dB, making the device virtually inaudible.

The actual noise generated by the fan increases logarithmically. The increase in noise by one decibel is, in fact, an increase of 26 % compared to the previous state. So noise increases twofold average every 3 dB. By slowing the fan down to the minimum speed, the noise generated is almost inaudible. This fan is ideal for office applications.

The scale of noise with sample sound sources:

- 0 dB – threshold of audibility
- 10 dB – leaves rustling in a mild breeze
- 20 dB – whisper
- 30 dB – very quiet street with no traffic
- 40 dB – murmur in the house
- 50 dB – noise in offices
- 60 dB – vacuum cleaner
- 70 dB – inside a loud restaurant, tearing a paper, inside a car

NOISE EMISSION

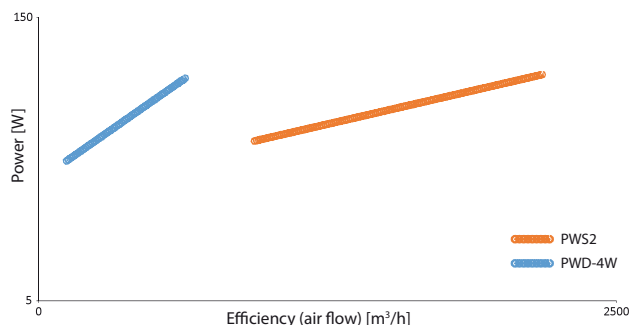

PWS2 fan emits more than one third less noise than the PWD-4W ventilation panel.

PRESSURE

Compared to PWD-4W ventilation panel, PWS2 fan generates as much as twice higher pressure with airflow being 5 times higher.

ENERGY CONSUMPTION

With more than twice higher air flow, PWS2 fan saves up to 60 % energy.

VENTILATION SYSTEMS

Server cabinet with ventilated rear door

Ventilated door

Ventilated door effectively enhance heat dissipation from server cabinets with the use of three fans. Given their intended use, ventilated door is mounted on the back of the server cabinet, and for safety reasons fans are located in a special enclosure, discharging air to the top.

Enclosure material:

Powder-painted steel sheet

Scope of delivery:

Complete door with a set of fans.

Package: 1 pc.

ARO 0,6 speed controller

ARO 0.6 autotransformer controller is used to manually adjust speed of the PWS2 fan. It has 2nd insulation class and IP-52 protection class, max. ambient temperature is 40 °C, whereas thermal insulation class B (130 °C).

It has five-step transformer speed control so you can adjust the fan speed and also the noise generated by the PWS2 fan. The first 4 control steps are designed to achieve a compromise between performance and noise, while with the 5th step you can make use of fan's full power. The controller is very well matched to supply network and the fan (no adverse impact on the grid). It has a resettable thermal switch (90 °C).

Made in line with PN-EN 61558-2-13. To be mounted on a mounting plate or on the DIN rail. The controller can be mounted on 19" mounting profiles with PS-3U panel (see page 156; PS-3U panel not included in the controller's scope of delivery).

TECHNICAL DATA

MPSK G0 microprocessor panel for fan control

Application:

Microprocessor panel for fan control is designed for measurement, control and automatic cabinet temperature maintenance at the pre-set threshold in 19" cabinets.

Principle of operation:

Panel temperature sensor continuously monitors and compares current temperature with pre-set threshold value, and causes switch on the fans of alternating current in four sequences.

Function possibilities:

- continuous temperature measurement,
- automatic fan selection for maintenance of pre-set parameters,
- possibility of service from PC by using RS 232 interface (data transmission in both directions),
- memory storage of pre-set parameters in case of power supply interruption.

Scope of delivery:

Microprocessor panel for fan control, temperature sensor with 2 m cable, fixing accessories.

Software for communication with the MPSK G0 panel via a serial port can be downloaded from our web site at www.zpas.pl

MPSK G0 mikroprocessor panel for fan control

Product name	Package	Colour	Catalogue number
MPSK G0 microprocessor panel for fan control with temperature sensor	1 set	RAL 7035	WZ-SB66-00-00-011
		RAL 9005	WZ-SB66-00-00-161

TECHNICAL DATA:

Temperature measurement:

- measurement range from +5 °C to +80 °C,
- indication resolution ± 1 °C,
- measuring accuracy ± 1 °C.

Setting parameters:

- control range of pre-set temperature threshold value from ± 5 °C to +80 °C,
- tolerance range from the temperature threshold value from +1 °C to +10 °C,
- delay range of switching on/off fans from 1 s to 99 s,
- recovery time from the setting function to measurement: 10 s.

Displaying of measuring parameters:

Two-digit module LED:

- digits' height 14 mm,
- green colour,
- improved quality.

Housing form:

- 19" panel 1 U height, light grey colour (RAL 7035) or black (RAL 9005).

Communication protocol with computer:

Parameters of RS 232 interface:

- transmission speed rate 9600 b/s,
- 8 bits, without even parity bit,
- 1 stop bit.

Temperature sensor:

Miniature, fixed to metal structure by means of latch, cable length - 2 m.

Fan connections:

- number of inputs - 4 mikroprocesorem,
- power supply - 230 V, 50 Hz,
- input's power carrying capacity - 100 W.

Power supply of the panel: 230 V; 50 Hz

Max. power consumption: 2 W

VENTILATION SYSTEMS

MFR 012i hygrostat

Scope of delivery:

- hygrostat MFR 012i,
- DIN rail,
- two holders,
- two screw clampse.

Hygrostat

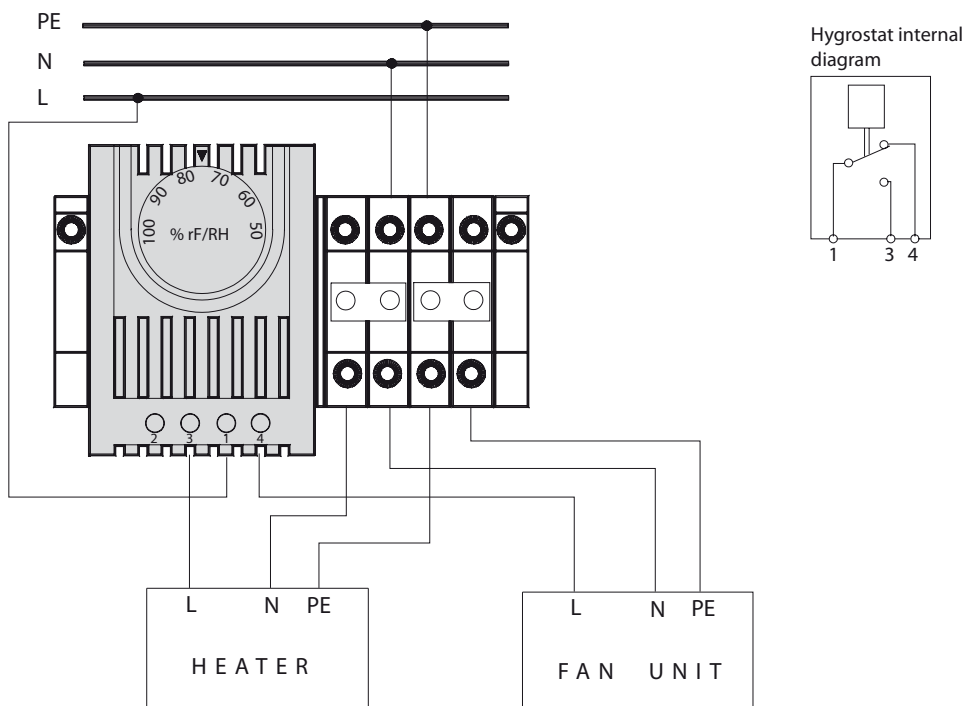

Electric regulator of humidity controls air humidity, switches on fans, heaters or air conditioning units.

TECHNICAL DATA

- Measuring range:
50-100 % of relative humidity
- Measuring accuracy:
±3% of relative humidity
- Operating range:
50-90% of relative humidity
- Deviation of switching referred to 50 % of relative humidity:
about 4% of relative humidity
- Maximum voltage:
250 V AC.
- Minimum load:
100 mA 20 V DC/AC
- Maximum load:

AIR-CONDITIONING SYSTEMS

In Data Center facilities the right temperature, humidity and quality of air delivered by precision cooling devices are the most important factors ensuring operational continuity of computational units. Precision air conditioning is essential for providing proper microclimate 24 hours a day throughout the year.

ZPAS precision air conditioning portfolio can be divided according to air flow concepts and cooling agent. Our offer encompasses both air conditioners for single cabinets, as well as precision air-conditioning cabinets for server rooms.

Separate air-conditioning units

Separate air-conditioning units make up a group of air-conditioning equipment designed for RACK type cabinets. Separate air-conditioning units make additional devices delivering air into the cabinet unnecessary.

PROTHEM
Air-conditioning unit mounted on the cabinet's side panel Cooling capacity ranging from 330 to 4000 W

SLIM
Air-conditioning unit mounted on the cabinet's door or side panel Cooling capacity: from 500 to 3000 W

MODULE
Air-conditioning unit intended for cooling more than one cabinet. Mounted on the side of a system of combined cabinets. Cooling capacity ranging from 5800 to 10000 W

TOP
Rooftop air-conditioning unit Cooling capacity ranging from 330 to 5200 W

AIR-CONDITIONING SYSTEMS

Precision air-conditioning cabinets

Precision air-conditioning cabinet is a proven traditional approach to server room cooling. We offer systems based on R410A coolant and chilled water. Every precision air-conditioning cabinet comes with:

- EC / AC fans (up to 20 kW),
- condenser (if R410A coolant selected),
- steam humidifier,
- heater,
- PLC,
- user panel.

With the extensive range and individual approach, we select precision air-conditioning cabinets to match your specific needs.

AIR-CONDITIONING SYSTEMS

Closed circuit
 - cooling with side heat exchanger
 - more information on page 174

Side and row heat exchangers

Nowadays, data centres are usually cooled by means of cool air inlets running under the access floor or through direct blow of cold air into the room, which can lead to mixing of cold and hot air, thus, compromising the air conditioning efficiency. Uneven distribution of equipment in terms of generated heat can also create hot spots. By using row or side heat exchangers, you can avoid these problems and provide an optimal environment for electronic equipment.

KEY FEATURES AND FUNCTIONAL PROPERTIES:

- Easy mounting without any interference inside the cabinet.
- Constant, even flow of air.
- Shortening the path that cold air travels to active devices.
- Direct removal of hot air from active devices.
- Exchanger redundancy N+1 easily achieved.
- Cooling agent supply from the top or from the bottom of the heat exchanger.
- Heat exchangers suitable for 42, 45 and 47 U cabinets as well as for cabinets of 1000 mm and 1200 mm in depth.
- Possibility to replace filters "on the fly".
- Allows for collecting condensate and removing it outside mechanically using a condensate extraction pump.
- Inputs for hydraulic connections making it possible to connect at the top or at the bottom of the heat exchanger.
- Temperature and humidity measurement.
- Advanced controller that controls various modes of exchanger operation.
- Communication via Ethernet.

Open circuit
 - cooling with row heat exchangers
 - more information on page 168

* NOTE: for RWC-DX and BWC-DX units cooling capacity depends on external condenser selected.

** NOTE: if you add the condensate extraction pump to RWC-CW and BWC-CW units, the hydraulic circuits connection at the top of the heat exchanger (HTOP) should be changed.

AIR-CONDITIONING SYSTEMS

Water chiller units

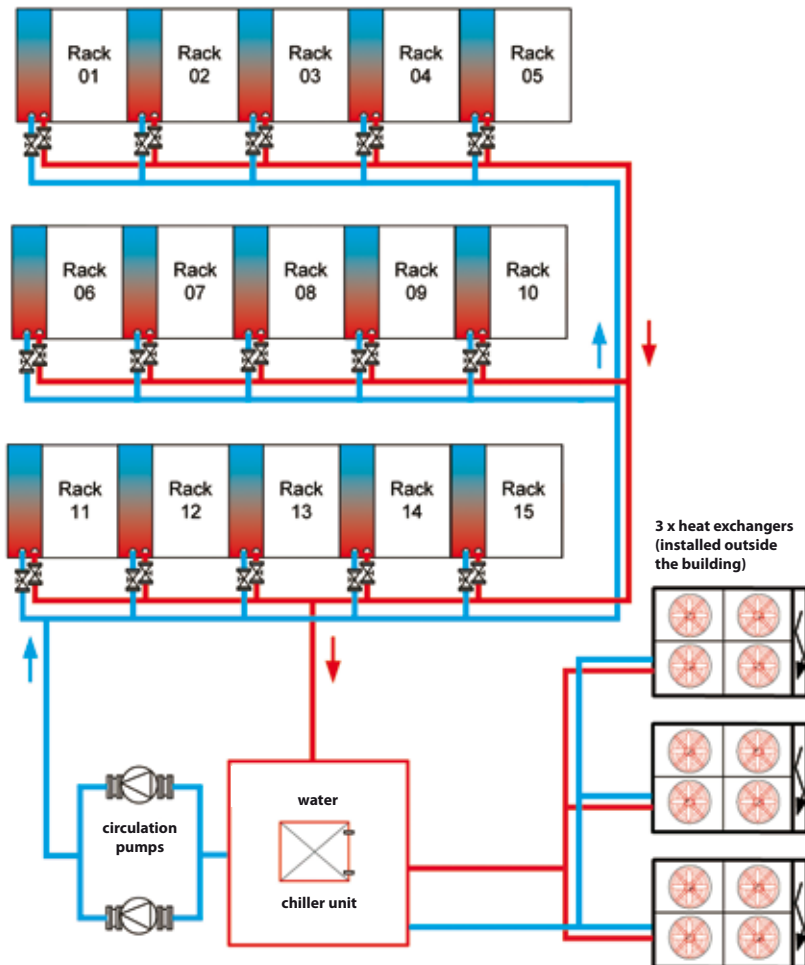

ZPAS Group offers a broad choice of water chiller units. Depending on the required cooling capacity, we offer units ranging from 5 to 200 kW. Water chiller units can be equipped with free-cooling, which enables the use of cold atmospheric air for cooling server rooms, thus reducing air conditioning costs. Depending on your needs, the units are designed for external or internal installation.

Due to the wide range of available solutions and various configuration options, we lend each project client-specific approach.

Sample server room air-conditioning system using side heat exchangers

The cooling agent is supplied from an appropriate chiller unit whose power output, redundancy potential and installation method need adjustment to specific working conditions. Our product range includes chiller units with different power rating, both for outside and inside applications.

For systems that make use of a chiller unit existing in the building and in order to provide cooling water circulation, as well as water temperature adjustment, we deliver complete cooling water distribution units. They are made up of circulation pumps, a heat exchanger and a control unit. Distribution units prevent water condensation in the heat exchanger and guarantee stable operations in heat abstraction.

CONSOLES AND KVM SWITCHES

CONSOLES AND KVM SWITCHES

CONSOLES

KVM consoles are devices designed for network administrators managing multiple servers. The consoles are equipped with 17" or 19" LCD displays with an TFT Active Matrix, ultraslim keyboard and touchpad. A single console occupies a height of 1 U in a 19" rack-type cabinet. The consoles secure the highest quality of image, and are compatible with dedicated KVM MER, VEN and MAR switches.

MONITORING AND ACCESS CONTROL SYSTEMS

MONITORING AND ACCESS CONTROL SYSTEMS

MONITORING AND ACCESS CONTROL SYSTEMS

OVERSEE

MONITORING SYSTEM FOR EQUIPMENT OPERATION CONDITIONS

The basic element of the monitoring system is ST-50 the controller. It allows you to read measurements from the 1-Wire sensors (Dallas Semiconductor technology), and access them via Ethernet. It analyses entered alarm conditions and can react by turning digital binary outputs on and off, depending on the measurement threshold. It can also send e-mails. It is able to independently connect to a data collection centre in order to report an emergency. The construction of this unit allows you to build autonomous monitoring systems, independently of the monitoring centre. It also allows for load reduction by reducing it to just "listening out" for alarms reported by the controller. The ST-50 controller works with the following measuring sensors: temperature T1, temperature and humidity THP110, with ILO880 input module and ILO004 output module.

ST 50 CONTROLLER

Parameters:

- Power supply: 12 V ~ 200 mA
- Communication interfaces:
 - 1x Ethernet – RJ45 port with status indication (2x LED)
 - 2x 1-Wire – RJ45 port
 - 1x RS232 – 2x5 rack and panel connector
- Memory settings: EEPROM non-volatile memory
- Modular enclosure for DIN 35 mm strip

Sensors:

- Allow for connecting up to 24 1-Wire devices.
- 1-Wire type sensors (including humidity, temperature, digital binary input, voltage meters).
- Continuous reading of measurements from connected sensors.
- Length of the line including sensors: up to 100 m
- 1-Wire lines use RJ-45 port, they provide power to devices (5V/1A).

Communication:

- with measurement devices on the 1-Wire line,
- in Ethernet network (RJ45 output), with the master system using ModBus RTU protocol and UDP/IP protocol,
- with GSM modem via RS232 port to send SMS messages.

Alarms:

- You can set 24 independent alarms.
- Responses to emergency situations:
 - sending e-mails,
 - possibility to change status of the 1-Wire switch (binary output),
 - setting relay outputs in the ILO004 module.
- Defining message content of user's choice.

1-WIRE TEMPERATURE SENSOR (T1)

Parameters:

- Range of measured temperatures: from -55 °C to 125 °C
- Accuracy: 0,1 °C
- Output: 1-Wire RJ 45
- Dimensions: 42 x 58 x 26 mm

OVERSEE

MONITORING SYSTEM FOR EQUIPMENT OPERATION CONDITIONS

1-WIRE TEMPERATURE AND HUMIDITY SENSOR (THP110)

Parameters:

- Range of measured temperatures: from -55°C to 125°C
- Range of measured humidity: from 10% to 90%
- Accuracy: 0.1°C, 1%
- Output: 1-Wire RJ 45
- Dimensions: 60 x 65 x 27 mm

ILO 880 METER

Parameters:

- 8 inputs in the form of low-voltage keys 0-10 mA
- 16 memory pages, 256 bits each
- 32-bit counters without overflow
- 2 1-Wire RJ45 ports
- Supply from the 1-Wire 5 V DC line
- Dimensions: 58 x 88 x 17 mm

ILO 004 OUTPUT MODULE

Parameters:

- Number of relay outputs: 4
- Type of relay outputs: NO/NC
- Load capacity of relay contacts: 8 A / 250 V AC
- Power supply: logic section from the 1-WIRE bus, 12 V DC / 13.2 V AC executive section from an external source
- Relay status controlled by hardware
- Relay status indication: LEDs on the enclosure, by system

OVERSEE

MONITORING SYSTEM FOR EQUIPMENT OPERATION CONDITIONS

Application scenario

We connect THP110 temperature and humidity sensor to ZPAS ST-50 controller. ILO004 output module was connected as the executive module. Planned logic provides for setting 4 alarms, two for switching outputs on, and the other two for switching outputs off. Fans and heaters with a capacity of not more than 2 kVA can be connected to outputs of the ILO004 module.

OVERSEE

MONITORING SYSTEM FOR EQUIPMENT OPERATION CONDITIONS

Software

Monitoring software allows you to collect, process and visualize data collected by the hardware layer. The user receives a comprehensive monitoring system operated via web browser. The software also allows you to build any visualization and select just the measurements you need, both current as well as archived. This allows you to adjust the settings to suit individual needs of each client connecting remotely. It also has an extensive alarm handling mechanism. The mechanism for controlling access to data collected by the monitoring system distributes user rights both in terms of users' roles in the system, as well as in terms of access to monitored facilities. Archived data can be viewed using tables and charts. All system data can be printed. An additional advantage of the system is the fact that the number of system users is not licensed. Because of its use in monitoring systems, the system is based on two main communication protocols: SNMP (communication with power stations, network devices and UPS) and ModBus RTU (communication with energy meters, power parameters analysers, data hubs). However, with the ability to add drivers, it can work with any devices that use other communication protocols. The software works very well with data hubs which can provide communication buffer between other systems, such as fire protection, climatic conditions, access control or power supply parameters.

Example of server room monitoring visualization

ZPAS Access Control

ROOMS AND DATA COMMUNICATION CABINETS ACCESS CONTROL SYSTEM

The basis of the ZPAS Access Control system is the network made up of access terminals connected to the electromechanical components (e.g. electric strikes or servos), data buffering control panels and the system operator station. What makes the ZPAS AC system different from other unauthorized access restriction systems is its construction. First of all, there are access terminals storing in their memory a database of 120 users. Secondly, each of the control network elements communicates with buffering control panels and the operator via RS485 bus. Thirdly, the system has advanced and free software that allows the administrator to easily manage even large numbers of users and protected areas. One of specific application of the system is protection of data communication cabinets. The main elements of such protection include the ESH12 electronic door lock and an access terminal. In the thinnest version, the control may cover one cabinet, protecting it with the terminal operating autonomously. Depending on the terminal version, the lock in the cabinet door opens after entering correct access code or using an authorised proximity card. If PRK12 or PRK12-BK terminals are used, the system can be expanded by connecting it to the operator's external computer station.

Example of configuration of the server cabinets access system with a buffer control panel and a communication interface

ZPAS Access Control

ROOMS AND DATA COMMUNICATION CABINETS ACCESS CONTROL SYSTEM

Available types of access terminals

- **PRK6** - an external digital lock with 55 user codes, provided with one relay output and two transistor outputs.
- **PRK12** - an extended external access controller equipped with a keyboard and in-built reader for cards or proximity keyrings. Additional functionalities include alarm signalling, notification of forced entry and working with the network access control system. Memory capacity for 120 users together with an access time schedule.
- **PRK12-BK** - PRK12 terminal version without keyboard for entering PIN codes.

If the PRK12 or PRK12-BK terminals operate in the network mode, their functionality is significantly extended. It is possible to divide users into access groups and assign them appropriate time schedules. You can also define special time schedules that will control user identification mode and door mode (door armed and door disarmed).

Access solutions provided by the PRK 12 access terminal

ESH12 electronic lock

Since the lock incorporates a motor mechanism (instead of electric strike), it does not generate strong magnetic field, which eliminates unnecessary danger from the inside of the cabinet. Another advantage of the solution is the fact that it is not easily amenable to wear and tear. The possibility of opening the lock with a key, e.g. in the event of a power failure, is an important feature of the device. Lock status signals are transmitted via the terminal to the operator. As a result, any such event is reported and cannot go unnoticed. Furthermore, the operator can distinguish correctly closed lock from open or even from inadequately closed lock.

COMPACT DATA CENTER

COMPACT DATA CENTER

COMPACT DATA CENTER FOR OFFICES

COMPACT DATA CENTER FOR OFFICES

SOLUTIONS FOR SMALL BUSINESS

We would like to introduce compact infrastructure that supplies comprehensive solution which meets increasing requirements placed on modern institutions and business customers. Offered integrated management platform allows you to combine and automate all processes and tasks realized by the users with the latest technologies and innovative solutions. Thank to using high-quality components and carefully selected and tested configuration, it ensures high reliability of equipment and security of data.

Servers NTT Tytan Advanced

- Assure users high efficiency and quality of components - admitted and tested.
- Intended for rack mounting with usable high 1U.
- Thank to single-processor platform it's cost-effective and multifunctional solution for business needs.

Recommended server configuration:

Server NTT Tytan 1104S35 Advanced

Motherboard	single-processor, max 32 GB RAM (6 connectors)
Processor	Intel® Xeon® 3450
Graphics card	integrated
Network card	Integrated 2x10/100/1000, RAM 4 MB DDR3 ECC
RAID controller	integrated hardware controller SAS 2.0/SATA LSI 2008, RAID 0,1,10, service CLI
Hard disc	147 GB SAS 15k RPM
Drive	DVD-RW SLIM
Enclosure	1U enclosure (2x400 W), 4 x 3.5" hot-swap
Warranty	3 years warranty door-2-door

UPS battery backup Partner GM

- Assures guaranteed protection and continuous work of servers, active equipment and electronic devices, installed in compact server room.
- Keeps appropriate parameters of output voltage, protects connected devices from damaging surges and spikes.
- Offers long battery backup time during power outages.

For more information see pages 148-151

COMPACT DATA CENTER FOR OFFICES

SOLUTIONS FOR SMALL BUSINESS

For more information see page 196

MPSM-S1 Microprocessor Power Control Panel

- Programmable power panel with eight 230 V sockets, temperature and humidity sensor, as well as Ethernet interface.
- Scenarios can be programmed for enabling or disabling sockets and remote sockets management.
- Thermostat / humidity regulator features for controlling fans, heaters or humidifiers.
- Monitoring of currents, voltage, temperature and humidity.

For more information see page 76

SJB SILENT cabinet

SJB SILENT one-section cabinet with desktop is perfect solution for small network systems installed in offices. Desktop made of furniture board gives the cabinet noble look and allows it to blend in with the existing interior decor. Interior of the cabinet is covered with acoustic foam which reduces emission of noise with 8 dB, that effectively isolates uncomfortable noise emitted by devices installed in a cabinet.

Dimensions:

- Height: 18 U
- Width: 600 mm
- Depth: 600 mm

Switch ES4324 / L2 Web Smart Gigabit Ethernet

- Ensures high efficiency of network with minimum configuration time.
- Thank to using Gigabit Ethernet ports, including 4 fibre optic ports SFP, it's suitable for environment that uses applications which require high capacity.
- Friendly internet interface allows quick and easy network configuration.

Main features:

- ports 20 x 1000Base-T + 4 x Gigabit Combo (RJ-45/SFP)
- handling standard Rapid Spanning Tree (RSTP)
- Smart Quality of Service function (layer 2/4)
- Smart Security function
- non-blocking switching
- transmission speed 35.7 Mp/s
- switching efficiency 48 Gb/s
- easy management via interface WWW
- function save-energy up to 53.6 %

The benefits of using

ZPAS compact server room:

- central gathering place of all processes and tasks realized in the office,
- comprehensive infrastructure with possibility of adapting to individual needs,
- data security ensured by continuous monitoring,
- safe access to information, even during a momentary power outage,
- increased comfort and work efficiency of its users, compact infrastructure is cost-effective for its owner.

COPPER CABLING COMPONENTS

COPPER CABLING COMPONENTS

COPPER CABLING COMPONENTS

ZPAS-NET TELECOMMUNICATION INFRASTRUCTURE

Reliability, security, confidence

In modern business environment, influenced by constant changes and modifications, it is very important to secure work of communication systems and reliability of cable and wire infrastructure. It can be achieved through choosing solutions, which belong to companies with huge trade experience, recognized on the market, offering high quality products legitimized by certificates issued by independent laboratories.

Full security of data and cable infrastructure can only be assured by a system installed by professional and authorized installers with highly developed skills confirmed by the producer.

The authorized contractors of ZPAS-NET are the best installing companies. The company takes care of their appropriate qualifications; offering advanced training programs and technical support.

ZPAS-NET co-operates only with trusted, authorized partners. We are convinced that once you decide to order their services they will confirm their professionalism during installation works.

The warranty of safety for user of cable system includes not only high quality products and professional service but also warranty of the system. The procedure of obtaining ZPAS-NET warranty of the system is not complicated and it is the customer who decides on the period of guarantee duration. The guarantee embraces installations performed by companies authorized by ZPAS-NET The longest possible period of duration is "life time" guarantee, the shortest period is 5 years.

The Powerlink Structured Cabling system consist of 5 subsystems:

- PowerLink system UTP category 5e.
- PowerLink TX system UTP category 6.
- PowerSafe System STP category 5e
- PowerSafe TX System STP category 6.
- PowerVS - telephone system.

PowerLink 5e system, 5e category, UTP

PowerLink 5e system, 5e category, UTP - this is a cable system compatible with trade standards defining all technical parameters for 5e category, that is EIA/TIA 568B.2, ISO11801, EN 50173.

The basis for the system is a universal IDC (insulation displacement contact) connection compatible with 110 and LSA connections. These connections are placed in distribution panels and telecommunication outlets.

Unshielded 5e category, UTP cable is of special construction providing increased resistance against mechanical damages.

Accessible in PVC and LSOH coatings, telecommunication outlets are realized through universal modules. These are keystone RJ45 UTP, 5e category transmission modules placed in front plates 22.5 x 45 mm with anti-dust shutter. ZPAS-NET also offers systems of frames and wall-mounted boxes as well as electrical sockets to be applied in dedicated supplying installations.

In smaller wall-mounted installations single and dual superficial sockets may turn out to be necessary. These are RJ45 UTP, 5e category with RJ connection without anti dust shutter.

Distribution panels in 1 U height with 24 RJ45 ports and in 2 U height with 48 RJ45 ports are constructed on the basis of specially designed printed circuits providing 5e category at maximal density of connections.

Patch cords are made of cable of "stranded type" at the section of 26 AWG what causes their flexibility and practically full resistance against mechanical damages. Smaller section of patch cords provides greater possibilities of them being placed in "ordering panels" in a distribution cabinet.

ZPAS-NET TELECOMMUNICATION INFRASTRUCTURE

PowerLink TX system, 6 category, UTP

PowerLink TX system, 6 category, UTP - this is a cable system compatible with EIA/TIA 568B.2 norm, specifying parameters for 6 category, dedicated for application in transmission systems compliant with 1000 Base-TX protocol.

Unshielded UTP, 6 category cable has a special construction providing increased resistance against mechanical damages and improving transmission parameters. It is equipped with special plastic divider separating single pairs. Available in PVC and LSOH coatings.

Telecommunication sockets are realized on the basis of universal modules. These are keystone RJ45, UTP, 6 category placed in front plates 22.5 x 45 mm with anti-dust shutter. The offer also includes sockets in „Polish“ standard of fixing.

Distribution panels in 1U height with 16 or 24 RJ45 ports realized on the basis of modular patch panels and RJ45 UTP, 6 category modules.

The characteristic feature of patch cords is application of special type RJ45 plugs fixed on the cable by means of molding technology. This solution improves transmission parameters of patch cords and protects cable's connection through modular pin.

**PowerSafe system, 5e category, STP**

PowerSafe system, 5e category, STP - this is a shielded cable system compatible with trade standards defining all the technical parameters for 5e category, that is EIA/TIA 568B.2, ISO11801, EN 50173. The offer includes two versions of shielding: fully shielded and with continuity of screening.

Shielded FTP cable, 5e category has an additional grounding wire parallel to conductor's pairs. It also has two layers of braid of artificial and aluminum foil. Available in PVC and LSOH coating.

Telecommunication outlets are realized on the basis on universal transmission modules. These are keystone RJ45 STP, 5e category fully shielded and continuous screen transmission modules, placed on front plates 22.5 x 45 mm with anti-dust shutter. The offer also includes „Polish“ standard of fixing.

16 and 24 port distribution panels in 1 U height are realized on the basis of modular blank patch panels and keystone RJ45 STP, 5e category modules fully shielded and with continuity of shielding.

Patch cords are made of stranded type cable at the section of 24 AWG with exceptional as for STP flexibility. Available in four colours.

Power VS - telephonic system

Power VS is a system of 10 pair telephonic terminal blocks based on ID connection of LSA type. The system includes disconnect modules in dry and gel version, connecting modules and accessories such as grounding elements, descriptive fields, single and multi-pair protections against overvoltage, test cables and mounting boxes.

Wall-mounted rails for fixing terminal blocks and panels of terminal blocks in 19" standard supplement the offer.

PATCH PANELS CATEGORY 5e

- 19" standard.
- The basis of cat. 5e network system, designed for main and through distribution points of fast telecommunications systems.
- UTP panels are constructed on the basis of specially designed boards with compensation circuit.
- Equipped with universal IDC (Insulation Displacement Contact), compatible with 110 and Krone connectors in 568A/B standard.
- The drawer type STP patch panel is equipped with grounding strip providing connection of the cable shield to panel shield.
- Place for cable labels.
- Convenient use and reconfiguration.
- The all panels, in addition to T-SO-900-048, includes cable ties and assembly hardware.

Patch panel UTP 19" x 1 U, cat. 5e, 24 ports
 grey (RAL 7035) with cable management bar - cat. no. WNK-805-114
 grey with cable management tray and cover - cat. no. T-SO-900-035
 black with cable management tray and cover - cat. no. T-SO-900-025

Patch panel UTP 19" x 2 U, cat. 5e, 48 ports
 black (RAL 9005) - nr kat. T-SO-900-048

Sample configuration of user outlet

Outlet with 2 mosaic-type faceplates

To configure complete subscriber point for 2 faceplates in 22.5 x 45 mm standard the following elements should be applied:

- Wall-mounted box for 2 faceplates, cat. no. T-SO-828-111 - 1 pc.
- Support for 2 faceplates cat. no. T-SO-828-711 - 1 pcs.
- Box cover 45 x 45 mm for 2 faceplates, cat. no. T-SO-828-811 - 1 pc.
- Faceplate 22.5 x 45 with shutter for keystone cat. no. T-SO-828-050 - 2 pcs.
- Keystone module - 2 pcs.
- Instead of 2 faceplates electrical socket 45 x 45 mm can be used.

User outlet with 4 mosaic-type faceplates

To configure complete user outlet for 4 faceplates in 22.5 x 45 mm standard the following elements should be applied:

- Wall-mount box for 4 faceplates, cat. no. T-SO-828-112 - 1 pc.
- Support for 4 faceplates cat. no. T-SO-828-712 - 1 pc.
- Box cover 90 x 45 mm for 2 faceplates cat. no. T-SO-828-812 - 1 pc.
- Faceplate 22.5 x 45 with shutter for keystone cat. no. T-SO-828-050 - 4 pcs.
- Keystone module - 4 pcs.
- Instead of 2 faceplates electrical socket 45 x 45 mm can be used.

User outlet with 6 mosaic-type faceplates

To configure complete user outlet for 6 faceplates in 22.5 x 45 mm standard the following elements should be applied:

- Wall-mounted box for 6 faceplates, cat. no. T-SO-828-113 - 1 pc.
- Support for 6 faceplates cat. no. T-SO-828-713 - 1 pc.
- Box cover 135 x 45 mm for 2 faceplates cat. no. T-SO-828-813 - 1 pc.
- Faceplate 22,5 x 45 with shutter for keystone cat. no. T-SO-828-050 - 6 pcs.
- Keystone module - 6 pcs.
- Instead of 2 faceplates electrical socket 45 x 45 mm can be used.

BOXES AND FACEPLATES

Faceplate 22.5 x 45 mm for keystone module
- cat. no. T-SO-828-050

Faceplate for keystone module

- Possibility of configuration of complete user outlet using keystone sockets:
UTP RJ11 and UTP, STP RJ45 cat. 5e, 6 or 6A.
- Designed to fit places in boxes and universal panels.
- Faceplate are snap fastened (tools are not required).
- Faceplate are equipped with anti-dust shutter.

Catalogue number	Dimensions [mm]			Weight [kg]
	Width	Height	Depth	
T-SO-828-050	22,5	45	10	0.004

Material: thermoplastic ULV94V0

Blind faceplate 22.5 x 45 mm - cat. no. T-SO-828-030

Blind faceplate

- Designed for masking of unused fields in faceplates and universal panels.
- Snap fastening (tools are not required).

KEYSTONES AND SOCKETS

Transmission modules cat. 5e UTP, STP

- Keystone modules RJ45 cat. 5e are designed for user outlet, as well as patch panels.
- The connection match the TIA/EIA 568A/B norm and cat. 5e requirements.
- The keystones are terminated using universal IDC (Insulation Displacement Contact) with punch-down cap for quick installation.
- Modules T-SO-831-918 are built using monolithic construction from ABS.
- Restant modules are built using printed circuit board.
- List of mounting accessories available on page 233 (See configuration of user outlet).
- Available in versions: STP cat. 5e fully shielded (360°).

POWER VS TELEPHONE SYSTEM

Telephone patch panel

- 19" panel 50 x RJ45 is designed for termination of vertical cabling and accepts multi-pair unshielded telecom cables or 4 pairs twisted cable.
- Ensures transmission parameters required for telephone applications, easy and convenient mounting, high durability of wires and easy cross connections.
- High density of cross connections (double pair modular RJ45 sockets).
- The T-SO-807-138 and T-SO-807-158 panels includes assembly caps, cable ties and duct markings.
- In the back panel these is a shelf to provide easy cable management.

Surface finish: none

- 1) Mount frame for telephone modules 19" x 1 U, for 6 modules**
- cat. no. WNK-803-160
- 2) Mount frame for telephone modules 19" x 3 U, for 15 modules**
- cat. no. WNK-803-115

Disconnecting module, 10 pairs, 1-0, white
- cat. no. T-SO-870-500

Telephone connectors

Disconnecting module

Disconnecting module is basis of telephone system. Module is placed on mount frame. Equipped with IDC contacts for termination of wires. There is also possibility of placing on them a set of magazine of gas surge arrestors. The module possesses shorted contacts. Application of insulation plug allows to disconnect any line.

- Case material**thermoplastic ULV94V0
- Connector material** silver plated phosphor bronze
- Wire acceptance** 0.4 - 0.8 mm
- Contact resistance** 5 mΩ
- Accordance with norm** DIN 41611
- Category** 3
- Weight** 0.060 kg
- Dimensions** 124.0 x 19.5 x 40.0 mm
- Colour** white

POWER VS TELEPHONE SYSTEM

Magazine for tri-pole arrestors

Equipping telephone module with gas surge arrestors with thermal protection allows to protect system against dangerous consequences of external overvoltage. At the moment of emergency destructed is only arrestor, providing protection of other elements from destruction. Special contacts fitted on both sides of the magazine provide automatic connection of middle strip with frame.

TECHNICAL DATA OF MAGAZINE

Case material thermoplastic ULV94V0
Contacts material silver plated phosphor bronze
Weight 0.080 kg

TOOLS AND ACCESSORIES FOR INSTALLERS

Fluke DTX-1800 cable analyzer (front and rear views)
- cat. No. T-SO-883-210

Fluke DTX-1800 (DTX-1800 INTL) cable analyzer

DTX-family cable testers are durable and handy measuring instruments designed for the certification, identification of damage and passporting of cable systems, both copper and optical fibre types. DTX-1800 certifies copper cabling as Class F (600 MHz) in less than 45 seconds and category 6 in less than 12 seconds. It meets requirements associated with the accuracy level III and proposed accuracy level IV.

TESTER PROPERTIES:

- **Standards tested:** TIA Category 3 and 5e per TIA/EIA-568B; TIA Category 5 (1000BASE-T) per TIA TSB-95; TIA Category 6 per TIA/EIA-568B.2-1 (Addendum #1 to TIA/EIA-568B.2); ISO/IEC 11801 Class C, D, E, F, EN 50173 Class C, D, E; ANSI TP-PMD IEEE 802.3 10BASE-T; 100BASE-TX; 1000BASE-T; IEEE 802.5 (STP, IBM Type 1, 150 Ohm) Token Ring, 4 Mbps and 16 Mbps
- **Auto-test speed:** 10 s (complete auto-test of UTP cat. 6 cabling)
- **Tests performed:** connection map; length; propagation delay; delay skew; DC loop resistance; Insertion Loss; Return Loss (RL); RL @ Remote NEXT; NEXT @ Remote; Attenuation to crosstalk Ratio (ACR); ACR @ Remote; ELFEXT; ELFEXT @ Remote; Power Sum ELFEXT; PSELFEXT @ Remote; Power Sum NEXT; PSNEXT @ Remote Power Sum ACR; PSACR @ Remote
- **Tone generator:** integrated, 440 Hz ÷ 831 Hz
- **Operating range:** 900 MHz
- **Accuracy level:** IV
- **Display:** 3.7", resolution 240x320, passive colour type with backlighting
- **Operation in active network:** Yes (optional DTX-NSM adapter)
- **Graphic memory of measurements:** 250
- **External memory:** 16 MB
- **USB connection:** Yes
- **RS-232 connection:** Yes
- **Channel cat. 6 type adapters:** Yes
- **Additional features:** incorporated locator of faults in fibre optic cables (VFL), autotest initiation from the remote unit
- **Operating temperature range:** 0 °C ÷ 45 °C
- **Maximum acceptable ambient humidity:** 0 % ÷ 70 %, non-condensing
- **Vibration resistance:** random vibrations, 2 g, 5 Hz ÷ 500 Hz
- **Impact resistance:** drop from a height of 1 m without attached modules
- **Maximum operating altitude:** 4000 m
- **Power supply:** Li-Ion battery, 7.4 V, 4000 mAh
- **Calibration validity:** 1 year
- **Supported languages:** English, French, German, Spanish, Portuguese, Italian, Japanese, simplified Chinese
- **Manufacturer:** Fluke Networks

DC loop resistance test:

- Parameter.....twisted pair wire
- Range0 Ω ÷ 53 Ω
- Resolution0.1 Ω
- Accuracy.....± (1 Ω + 1 %)

Delay skew:

- Parameter.....twisted pair wire
- Range0 ns ÷ 100 ns
- Resolution1 ns
- Accuracy.....± 10 ns

Length measurement for twisted pair wire:

- Range800 m (without remote unit),
150 m (with remote unit)
- Resolution0.1 m
- Accuracy.....± (1 m + 4 %)

TOOLS AND ACCESSORIES FOR INSTALLERS

Modular plug

- Effective protection of cable and plug against mechanical damages.
- Accordance with category 5e.
- Esthetical look.
- Durable fastening of cable in the plug.
- Flexible thermoplastic material ensures high durability and comfort usage.
- Various types of plugs.
- Package contains 100 pcs.

Case material: thermoplastic UL94V0

Contacts material: phosphor bronze

Contacts plating: 1.25 µm gold over 2.50 µm nickel

Part	Colour / type	Catalogue number	Dimensions [mm]			Weight [kg]
			Width	Height	Depth	
Plug	UTP RJ45 for rounded stranded cable	T-SO-855-030	15	15	28	0.003
	STP RJ45 for rounded solid cable	T-SO-855-130	11	15	23	
Boot	grey	T-SO-855-811	10	12	22	0.003

Modular plug UTP RJ45 for rounded stranded cable
- cat. no. T-SO-855-030

Modular plug STP RJ45 for rounded solid cable
- cat. no. T-SO-855-130

Boot for plug WE8W, grey
- cat. no. T-SO-855-811

PATCH CORDS

Patch cords category 5e and category 6 and 6_A, U/UTP, F/UTP and S/FTP

- Designed for cross connections at distribution points as well as connections of terminals with user outlet.
- Compatible with category 5e, 6 and 6_A.
- Sequence 568B.
- F/UTP cables are resistant from mechanical damages, providing continuity of shielding.
- Five standard length options: 0.5 m, 1 m, 2 m, 3 m, 5 m.
- Equipped with special type RJ45 plugs fixed on the cable by means of moulding technology.

MECHANICAL PARAMETERS:

- Cable insulation material PVC
- Plug case UL94V2
- Plug contacts material phosphor bronze
- Plug contacts plating gold over nickel;
- Durability > 750 cycles

ELECTRICAL PARAMETERS:

- Maximum voltage > 125 V
- Maximum current 1.5 A
- Insulation resistance > 500 MΩ

AVAILABLE TYPES OF PATCH CORDS:

- U/UTP cat. 5e and cat. 6 patch cords are available in the following colours: grey, ivory, black, red, green, blue, yellow, orange, brown, purple and pink
- F/UTP cat. 5e and cat. 6 patch cords available in the following colours: grey, ivory, black, red, green, blue, yellow
- S/FTP cat. 6 patch cords available in the following colours: grey, ivory, black, red, green, blue, yellow

We also offer Cross Over, 6_A S/FTP patch cords.

Patch cords category 5e and category 6

DATA TRANSMISSION CABLES

Internal data communication cables category 5e, U/UTP and F/UTP

U/UTP cables are designed for horizontal and vertical internal installations in data communication networks that are not exposed to electromagnetic interference.

F/UTP cables are designed for horizontal and vertical internal installations in data communication networks that are particularly exposed to electromagnetic interference.

5e cables routes are designed for operation at frequencies up to 100 MHz, with a bit rate up to 1 Gb/s.

Cables cannot be used to connect power equipment. Cables are designed for use in an ambient temperature of -20°C to +70°C.

Cables in PVC sheath may be laid at temperatures from 0°C to 50°C.

Cables in sheath made of halogen-free plastic may be laid at temperatures from -10°C to 50°C.

Allowable cable bending radius is 4 x ext. Ø.

Cable pull force should not exceed 20 N per pair.

Standards:

ZN-MADEX-04, ISO/IEC 11801, EN 50173, IEC 61156-5, EN 50288-3-1 (Cat.5e), ANSI/TIA/EIA 568-B.2.

Flammability test under IEC 60332-1

U/UTP 4 pair cable category 5e

T-SO-841-167	U/UTP cable, 4 pairs, solid, cat. 5e, Ultralink, 1000 m

On request it is possible to pack cables in sections of different lengths.

Note:

We can also deliver external cables, such as:

External U/UTP cable 4 pairs, solid, cat. 5e, PE, 305 m

- cat. no. T-SO-841-173

DATA TRANSMISSION CABLES

U/UTP 4 pair category 6 cable

Internal data communication cables categories 6 and 7, U/UTP, F/UTP and S/FTP

U/UTP cables are designed for horizontal and vertical internal installations in data communication networks that are not exposed to electromagnetic interference.

F/UTP and S/FTP cables are designed for horizontal and vertical internal installations in data communication networks that are particularly exposed to electromagnetic interference.

6 category cables routes are designed for operation at frequencies up to 250 MHz, with a bit rate over 1 Gb/s.

7 category cables routes are designed for operation at frequencies up to 600 MHz, with a bit rate over 1 Gb/s.

Cables cannot be used to connect power equipment. Cables are designed for use in an ambient temperature of -20°C to +70°C.

Cables in PVC sheath may be laid at temperatures from 0°C to 50°C.

Cables in sheath made of halogen-free plastic may be laid at temperatures from -10°C to 50°C.

Allowable cable bending radius is 4 x ext. Ø.

Cable pull force should not exceed 20 N per pair.

Standards:

FIBRE OPTIC ENCLOSURES AND ACCESSORIES

FIBRE OPTIC ENCLOSURES AND ACCESSORIES

SPS 19" OPTITEL CABINET FOR FIBRE OPTIC PATCH PANELS

Cabinet OptiTel SPS II 19/45U/800 with standard equipment
- cat. no. WNK-405-123

TECHNICAL DATA:

Max. amount of outdoor cables . . . 8
Useful height. 45 U
Dimensions (w. x h. x d.) 800 x 2096 x 600 mm

Material:

- profile, supporting bars. steel 2.0 mm
- side panels, plinth, plinth's sides . . . steel 1.0 mm
- door safety glass 6 mm

Surface finish: powder painting RAL 7035

Protection degree: IP 20 in accordance with EN 60 529

Catalogue number:

Optitel SPS II cabinet with standard equipment
19/45U/800x600 - **cat. no. WNK-405-123**

SUPPLY INCLUDES:

- frame of the cabinet,
- front glass door,
- removable panels (side and rear),
- separated compartment for patch cords 200 mm width,
- 2 pairs of mounting profiles in 19" spacing,
- cable openings with a brush and foam strips in top and bottom plate of the frame,
- RTR-8 tube distributor,
- earthing strip and cables.

OPTITEL CABINET FOR FIBRE OPTIC PATCH PANELS

SPS 19"

CONSTRUCTION

- 1. Frame's post
- 2. Frame's top plate
- 3. Frame's bottom plate
- 4. Side panel
- 5. Rear panel
- 6. Brush strip
- 7. Foam strip
- 8. Cable entry plate
- 9. Earthing bar
- 10. Adjustable feet
- 11. Mounting profile
- 12. Module of reserve
- 13. RTR-8 tube distributor

SPS 19"

OPTITEL CABINET FOR FIBRE OPTIC PATCH PANELS

ADDITIONAL ACCESSORIES

Cable storage module
- cat. no. WNK-878-016

OptiTel MZ - cable storage module

- Intended for storing reserve tubes of fibre optic cable.
- Standard version includes two cross frameworks; possibility to enlarge the set by four additional cross frameworks.
- Fitted to holes in side walls of mounting profiles; the supply includes assembly elements.

Catalogue number	Dimensions [mm]			Weight [kg]
	Width	Height	Depth	
WNK-878-016	465	215	73	2.05

Material: sheet steel 1.5 mm

Surface finish: powder painting in RAL 7035 colour

Additional cross framework for cable storage module
- cat. no. WNK-878-002

OptiTel KZK - cross framework for cable storage module

- Cross framework comprise additional equipment for cable storage module.
- Delivered with spacer for fitting on cable storage module.

Catalogue number	Dimensions [mm]			Weight [kg]
	Width	Height	Depth	
WNK-878-002	215	215	40	0.35

Material: sheet steel 1.5 mm

Surface finish: powder painting in RAL 7035 colour

OptiTel SZP cable storage drawer with front and rear cable entry
- 19" x 1 U x 200 mm - cat. no. WNK-874-421
- 19" x 1 U x 280 mm - cat. no. WNK-874-431

OptiTel SZP - cable storage drawers

- Intended for managing indoor cable reserve (patch cords and pigtails).
- Available in front and rear cable entry versions.
- Delivered with set of assembly hardware.

Catalogue number	Dimensions [mm]			Weight [kg]
	Width	Height	Depth	
WNK-874-421	483 (19")	44 (1U)	200	1.63
WNK-874-431			280	2.74

Material: sheet steel 1.5 mm

Surface finish: powder painting in RAL 7035 colour

OPTITEL FIBRE OPTIC PATCH PANELS **PSP 19"**

OptiTel PSP 19/1U/12

- Intended for 19" and 21" cabinets and racks.
- Number of adapter ports: 12
- Depth:
 - 200 mm - versions with half extending drawer
 - 280 mm - version with fully extending drawer
- Available front panels for all types of adapters (SC/E2000, ST or another, according to customer's request).
- Possibility of many cables terminating.
- Space inside allows for that the minimum bend radius is exceeded.
- Ergonomic storage for pigtails.
- Tube guiding units ensure the minimum bend radius exceeding
- Drawer makes installation easy and comfortable.
- Flowing regulation of depth of panel installation in cabinet
- Delivered with set of assembly hardware.
- Brackets for 21" standard, should be ordered separately.

Material: sheet steel 1.5 mm

Surface finish: powder painting in RAL 7035 colour

OPTITEL WALL-MOUNTED FIBRE OPTIC DISTRIBUTION BOX

PSN

- Mounted directly on the room's wall, where the line cable is terminated.
- Number of adapter ports: 24 or 48
- Available panel for all types of adapters (E2000, SC or another, according to customer's request).
- Possibility of many cables terminating.
- Equipped with 2 or 4 splice cassettes.
- Top and bottom cable entry.
- The rest of fibre loose tube storage in housing.
- Tube guiding units ensure that the minimum bend radius of pigtails is not exceeded.
- The case can be locked using lock, possibility of opening of the door upward and downward.
- It is possible to dismantle the housing for better access to splice cassettes.
- The distributor is equipped with delimitation lever so that the opened door can be used as montage table (when open downwards).

OptiTel PSN 4/48 equipped with pigtails and E2000 and SC adapters (ordered separately)

Material: sheet steel 1.5 mm

Surface finish: powder painting in RAL 7035 colour

FIBRE OPTIC PIGTAILS, PATCH CORDS AND ADAPTERS

E2000 patch cords

E2000 standard

- Connector with push - pull mechanism.
- Available in Premium version with typical insertion loss 0.09 dB.
- Standard connector in the transmission networks of the largest telecommunication operators.
- According to norm IEC 61 754-15, CECC 86275-801/802.

Connectors

- Remarkable eccentricity of the hole thanks to the precision by production of the ferrule. Hole diameter tolerance from 0 to +1 µm (Premium version from 0 to +0,5 µm).
- Zirconium ferrule ensures very good resistance at the changing temperatures (operating temperature range from -40 °C to +85 °C).
- Assembly of the ferrule with an adhesive protects the fibres against impact strength.
- Machine polishing procedure ensures high quality of end face geometry and high repeatable performance.
- Each connector is adjustable, what ensures outstanding transmission parameter.
- End face geometry is controlled with an interferometer.

Adapters

- Manufactured from high quality plastic.
- The sleeve, manufactured from zirconium dioxide, ensures high precision of the connection and repeatable performance.

Connection type

The push - pull mechanism features:

- Protection cap prevents soiling and scratching of the ferrule end face.
- An integrated protective cap provides eye protection from laser radiation.
- A cap protects the ferrule against damages by mating cycles.
- The push - pull mechanism protects the connector against rotation.

Connector type

- Single mode and multimode connectors.
- Following cables can be equipped with this connector type: 900 um tube or PVC cables with the following diameters: 1.7; 2.0; 2.4 and 2.8 mm.
- Possible polishing procedures: SuperPC, UltraPC and Angle PC.

Application

- Telecommunication, external and access networks.
- WDM networks.
- LAN/WAN networks.
- CATV networks.

E2000 adapters mounted in OptiTel PSN distribution box (adapters and pigtails should be ordered separately)

FIBRE OPTIC PIGTAILS, PATCH CORDS AND ADAPTERS

ST patch cords

ST adapters

ST standard

- Parts manufactured of high quality materials (metals and zirconium ceramics).
- Long term mechanical endurance.
- Stability of the transmission parameters.

Connectors

- Zirconium ferrule.
- Low insertion loss.
- Hole diameter tolerance from 0 to + 1 µm.
- Short boot ensures minimal bending radius.
- Machine polishing procedure ensures high quality of end face geometry and high repeatable performance.

Adapters

- Slotted zirconium ceramic sleeve ensures precise connection.
- High durability.
- Guarantee of the repeatable performance.

Connection type

- Twist-lock bayonet coupling with anti-rotation key.

Application

- Telecommunication.
- LAN/WAN networks.

Available versions

- Single mode and multimode connectors.
- Following cables can be equipped with this connector type: 900 µm tube or PVC cables with the following diameters: 1.7; 2.0; 2.4 and 2.8 mm.

CONNECTING PARAMETERS

Type	ST/PC	
	Type of fibre	multimode
Ferula type	ceramic	
	Ø126 µm (0 to +1 µm)	Ø125 µm (0 to +1 µm)
Adjustable	none	
Min. mating cycles	over 1000 cycles	
Operating temperature	-40 to +85 °C	

TRANSMISSION PARAMETERS

Type	ST/PC multimode		ST/PC single mode	
	typical	max.	typical	max.
Insertion loss	0,2 dB	0,4 dB	0,2 dB	0,35 dB
Return loss	-	-	> 45 dB	> 50 dB

FIBRE OPTIC PIGTAILS, PATCH CORDS AND ADAPTERS

SC standard

- Connector with push - pull mechanism.
- Available in the miniature version.
- Available in duplex version.
- For applications in the telecommunication networks.
- Standard connector in the transmission networks of the largest telecommunication operators.
- According to norm JIS C5973, NNT, IEC, TIA, Bellcore.

Connectors

- Remarkable eccentricity of the hole thanks to the precision by production of the ferrule. Hole diameter tolerance from 0 to + 1 µm.
- Zirconium ferrule ensures very good resistance at the changing temperatures (operating temperature range from -40 °C to +85 °C).
- Assembly of the ferrule by using adhesive protects the fibres against impact strength.
- Machine polishing procedure ensures high quality of end face geometry and high repeatable performance.
- Each connector is adjustable; that ensures outstanding transmission parameter.
- End face geometry is controlled with an interferometer.

Adaptors

- Adaptors have a zirconium sleeve for single-mode applications.
- Adaptors have a zirconium sleeve for multi-mode applications.
- Adapter's sleeve is manufactured from zirconium dioxide, enabling high precision of the connection and high repeatable performance.

Connection type

- The Push - Pull mechanism protects the ferrule before twisting, which guarantees a full protection of the ferrule and connection stability.

Connector type

- Single mode and multimode connectors.
- Following cables can be equipped with this connector type: 900 µm tube or PVC cables with the following diameters: 1.7; 2.0; 2.4 and 2.8 mm.
- Possible polishing procedures: SuperPC, UltraPC and AnglePC.

Application

- Telecommunication, external and access networks.
- WDM networks.
- LAN/WAN networks.
- CATV networks.

FIBRE OPTIC PIGTAILS, PATCH CORDS AND ADAPTERS

Patch cords with FC connectors

FC adapter

FC standard

- For applications in the largest telecommunication networks.
- Standard connector in the transmission networks of the largest telecommunication operators.
- According to norm JIS C5970, NNT, IEC, TIA, Bellcore.

Connectors

- Remarkable eccentricity of the hole thanks to the hole diameter tolerance from 0 to + 1 µm.
- Zirconium ferrule ensures very good resistance at the changing temperatures (operating temperature range from -40 °C to +85 °C).
- Assembly of the ferrule with an adhesive protects the fibres against impact strength.
- Machine polishing procedure ensures high quality of end face geometry and high repeatable performance.
- Each connector is adjustable, what ensures outstanding transmission parameter.
- End face geometry is controlled with an interferometer.

Adapters

- Sleeve of the adapter is manufactured from zirconium dioxide, enabling high precision of the connection.
- High durability.
- Available in SQF and D-shape version.

Connection type

- With anti-rotation key as protection of the ferrule end face against scratching or rotation by mating cycles.

Connector type

- Single mode and multimode connectors.
- Following cables can be equipped with this connector type: 900 µm tube or PVC cables with the following diameters: 1.7; 2.0; 2.4 and 2.8 mm.
- Possible polishing procedures: SuperPC, UltraPC and AnglePC.

Application

- Telecommunication, external and access networks.
- WDM networks.
- LAN/WAN networks.
- CATV networks.

CONNECTING PARAMETERS

Type	FC/PC	FC/APC
Type of fibre	multimode	single mode
Ferrule type	ceramic	
	Ø126 µm (0 to +1 µm)	Ø125 µm (0 to +0.5 µm)

FIBRE OPTIC PIGTAILS, PATCH CORDS AND ADAPTERS

LC standard

- Miniature connector with push-pull mechanism.
- Zirconia miniature ferrule 1.25 mm.
- PC polishing procedures.
- Standard connector type meets the demands of units, used in the telecommunication networks.
- Standard connector in the transmission networks and active components of the largest telecommunication operators.
- According to norm EIA/TIA 568A, FOCIS 10, IEC 11801, Bellcore.

Connector

- Twice smaller than SC or E2000 standard connector.
- Zirconia ferrule ensures very good resistance at the changing temperatures (operating temperature range from -40 °C to +85 °C).
- Machine polishing procedure ensures high quality of end face geometry and high repeatable performance.
- End face geometry is controlled with an interferometer.

Adapter

- Twice smaller than SC or E2000 standard adaptor.
- High packing density.

Connection type

- The Push - Pull coupling mechanism guarantees high protection and stability of the connection.

Connector type

- Single mode and multimode connectors.
- Simplex and duplex connectors.
- Following cables can be equipped with this connector type: 900 um tube or PVC cables with the following diameters: 1.6 and 2.0 mm.

Application

- Telecommunication, external and access networks.
- WDM networks.
- LAN/WAN networks, Fibre to the Desk - solution.
- CATV networks.

CABLE MANAGEMENT

CABLE MANAGEMENT

CABLE MANAGEMENT

CABLE MANAGEMENT

Way of fastening cable clamps on cable management bar

Cable clamps

Intended for fixing:

- on cable management bars (see picture below),
- on mounting profiles.

Material:

Zn coated steel

Scope of delivery:

The cable clamps are sold in sets: 5 pcs. of clamps and fixing accessories.

Note:

It is possible to order on demand cable clamps painted in black (RAL 9005).

Type of cable clamp	Package	Dimensions A x B [mm]	Catalogue number
	5 pcs.	88 x 88	WZ-SB52-00-01-000

Cable management bar

Cable management bar

19" assembly, height: 1 U.
With slots for mounting cable clamps.

Material:

Sheet steel powder painted in light grey (RAL 7035) or black (RAL 9005)

Scope of delivery:

Cable management bar, 8 rubber covers for not used slots, fixing accessories.

Note:

Cable clamps should be ordered separately.

Height [U = 44.45 mm]	Package	Colour	Catalogue number
1 U	1 pc.	RAL 7035	WZ-SB55-00-00-011
		RAL 9005	WZ-SB55-00-00-161

CABLE MANAGEMENT

Cable organizers

- 19" standard
- Height 1 U
- Esthetical look.
- Convenient reconfiguration.
- WNK-811-000, WNK-811-100 and WNK-811-101 cable organizer sets include fixing accessories.

Material: sheet steel, plastic

Surface finish: powder painting

Dimensions [mm]			Colour	Catalogue number

Package: 1 pc.

Cable holder

CABLE MANAGEMENT

Vertical cable management

Designed for vertical organization of cables inside the cabinets: SZB, OTS1, SZB SE, DC.
 Only for cabinets 800 mm wide.
 Fixed to horizontal C-profiles at the cabinet's side walls.
 Equipped with a removable front cover.

Material:
 Sheet steel powder painted.

Scope of delivery:
 Vertical cable management with fixing accessories for assembling into the cabinet.

For cabinet height	Dimensions [mm]		Colour	Catalogue number
	Width	Depth		
47 U	100	111	RAL 7035	WZ-6186-22-01-011

Package: 1 pc.

Vertical cable management for cabinet with a height of 42 U, colour RAL 9005

CABLE MANAGEMENT

PVC cable ducts

Designed for vertical organization of cables inside the cabinets: SZB, OTS1, SZB SE, DC.
 Fixed to horizontal C-profiles at the cabinet's side walls with help of the stiffening C-profile.
 Cable duct and stiffening C-profile are ordered separately.

Material:

Cable duct - tworzywo PCV
 Stiffening C-profile - sheet steel Al-Zn coated

Scope of delivery:

Cable ducts - sold in lengths of 2 m.
 Stiffening C-profile - sold in lengths given in the table below;
 C-profile scope of delivery includes fixing accessories for cabinet installation.

PVC cable ducts

Cable channel systems

Cable channel systems offered by ZPAS are complex solution for copper cabling, optic cabling and supply cable. Modular design systems with a large number of available components provide ease and speed of installation of complex waveforms of cable routes.

SOHO 10" CABLING SYSTEM

SOHO 10" CABLING SYSTEM

SKI2 10" WALL-MOUNTED NETWORK CABINET

WALL-MOUNTED CABINET FOR SMALL NETWORKS

- Designed for indoor applications.
- Usable height of the cabinet is 7 U.
- The cabinet is based on body with steel or glass door. The cabinet includes two mounting angles for installation of 10" appliances. The mounting angles are fixed to the walls of the body.
- Openings in the cabinet's top and bottom plate are covered with knock-out blanking plates.
- Following removal of the knock-out plate, a brush strip supplied together with the cabinet can be placed in one of the cable openings. The other brush strip can be ordered as a supplementary accessory (see page 98).
- The cabinet does not have a rear panel.

TECHNICAL DATA

Material:
Sheet steel, safety glass

Surface finishing:
Powder painted in RAL 7035.
Application of other colours on request.

SCOPE OF DELIVERY

Cabinet in basic configuration (cat. no. WZ-1951-01-...-011) includes: cabinet's frame, front door with a lock that incl. double-bit insert (no handle), rear panel, mounting plate for the full height of the cabinet, blanking plates for cabinet's top plate, set of sliding gland plates for cabinet's bottom plate.

Note: side panels, plinth, roof, lifting eyes and other supplementary accessories should be ordered separately.

TECHNICAL DATA

Material:

Sheet steel

Protection degree:

IP 54 in accordance with EN 60529

Surface finishing:

Cabinet's frame, doors, panels, roof, plinth – powder painted in RAL 7035 (epoxide-polyester paint of coarse-grained structure, applied for internal conditions). On customer's request, it is possible to use special paint with increased resistance to adverse weather conditions and using polyzinc base.

Mounting plate - zinc coated

Mounting bars - Al-Zn coated

On request, the frame, door, side panels, roof and the plinth can be made of stainless steel.

Maximum load capacity:

1000 kg if equipment installed on the mounting plate,

1600 kg if equipment installed on a structure made of mounting bars fixed to the frame,

20 kg if equipment installed on doors,

150 kg if equipment installed on the swing frame.

CABINET DESIGN

Welded framework of the cabinet

- Slotted side framework enables fixing a system of mounting rails or a mounting plate.
- The top plate of the frame is fitted with openings designed for cable entries or for mounting fan units. In the standard version, they are blinded with solid blanking plates.
- The bottom plate of the frame is fitted with one or two openings designed for cable entries. In the standard version, they are blinded with sliding gland plates.

Front door, rear panel

- Cabinets 1000 and 1200 mm wide are equipped with a double-wing door, while cabinets 800 and 600 mm wide are equipped with a single-wing door. A rear panel can be replaced with a rear door in all available widths of the cabinets.
- Easy change of door opening direction (by turning the door wing and the lock).
- Standard door is equipped with a 3-point lock and a stiffening slotted frame used for cable ducts, bundles of cables etc.
- Locking systems: factory-mounted lock with double-bit insert, option of replacement with a lock provided with a swing handle and cylinder insert.
- Possibility of manufacturing doors with a glass panel and perforation.
- Maximum door opening angle is 120°.

Two options of side panels

- Flushed panels - kept within cabinet dimensions.
- External panels - expanding the cabinet by 25 mm on each side; especially recommended for outdoor applications.

Roof

- As a part of supplementary accessories.
- Recommended for cabinets placed outside the buildings.

Lifting eyes

- Lifting eyes are available if requested. They are fixed to the threaded holes in the top of the frame.

Base

- The cabinet is normally placed on either 100 mm or 200 mm plinth.
- It is possible to set the cabinet directly on the cable duct, however this option needs to be discussed with our technical staff.

Sealing gasket

- Doors, panels and solid blanking plates used in the top are sealed with polyurethane foam.

Baying cabinets in rows

- Possibility to bay cabinets in rows.
- Bayed cabinets can be additionally equipped with a partition.

The cabinet with the roof and flushed side panels

The cabinet with the roof and external side panels

The cabinet with a roof, flushed side panels and lifting eyes

Lock with swing handle and cylinder insert

Lock with double-bit insert

Baying cabinets in rows by using mounting plate infill

Fastening appliances in the cabinet

- Mounting plate - fits within the light of the cabinet, easy positioning by means of 2 sliding profiles on both sides; quick fastening using 4 bolts.
- Mounting rails - make it possible to build a required racking system within the cabinet (openings in the rails match the horizontal and vertical openings of the frame).
- 19" mounting profiles.
- 19" swing frame for cabinets 800 mm wide.

SZE2 MODULAR CABINETS

SZE2 cabinet 1200 mm wide, without side panels, intended for buying in rows

ACCESSORIES FOR SZE2 CABINETS

DOORS • ROOF AND SIDE PANELS

Swing handle with cylinder insert for the door's lock

For applying in the cabinet instead of the standard pattern that includes double-bit insert.

Material of the body:

Plastic

Scope of delivery:

Swing handle and cylinder are to be ordered separately.

Product name	Package	Catalogue number
Swing handle without cylinder insert	1 pc.	M1H-01-0024
Cylinder insert for swing handle + 2 keys	1 set	M1H-02-0028

Roof and fixing/spacer bolts

Roof

Each cabinet can be equipped with a roof in two widths:

- roof for cabinet with flushed side panels (roof's width in accordance with cabinet's frame width).
- roof for cabinet with external side panels (the roof's width expanded by 50 mm in comparison with the cabinet's frame).

Roof's height with fixing/spacer bolts: 41.5 mm.

Material:

Sheet steel powder painted in RAL 7035

Scope of delivery:

Roof with 4 fixing/spacer bolts for mounting.

(Assembly screws M12 are delivered with the cabinet.)

ACCESSORIES FOR SZE2 CABINETS

ROOF AND SIDE PANELS

Lifting angle

Eyebolt

Lifting accessories

Fixed to threaded holes in the top plate of the cabinet's frame or (when the roof is used) to fixing/spacer bolts.

Offered in two options:

- 1) eyebolts - galvanised steel, eye diameter: 30 mm, thread for fastening: M12;
- 2) lifting angle for cabinets bayed in rows - galvanised steel angle, lifting hole diameter: 38 mm, two holes for mounting screws M12.

Scope of delivery:

Lifting accessories are sold separately.

Lifting angle is supplied with mounting screws.

Product name	Package	Catalogue number
eyebolt	1 pc.	M1F-00-0106
lifting angle	1 pc.	WZ-1951-68-00-000

TRANSPORT OF SZE2 CABINETS

For larger loads, a set of cabinets should be preferably placed on a single shared welded plinth which reinforces the entire structure during transport. For advice on selection of an appropriate plinth type, please ask ZPAS S.A. design department.

ACCESSORIES FOR SIZE2 CABINETS

CABINET'S BASE

Modular plinth

It consists of 4 corners and 4 or 8 removable side panels. Total weight of the cabinet is carried by plinth corners. It is possible to reach the area under the cabinet by unscrewing the side panels. Plinth can be mounted to the base by optionally using 4 rubber vibro-shock absorbers.

Ordering method:

Plinth includes the following elements: plinth corners with appropriate plinth side panels depending on the cabinet's width and depth.

Plinth side panels

There are three types of plinth side panels available - see the pictures. Each type has the standard height of 99 mm. Side panels can be removed even when the cabinet is loaded with equipment.

Material:

Sheet steel, powder painted in light grey (RAL 7035)

Scope of delivery:

Panel with fixing accessories.

Solid side panel

Perforated side panel

Power supply cable 1.6 + 1.0 m with a door switch		WN-0208-04-04-000

Package: 1 set

The power supply cable with a door switch that automatically switches on and off the light or other devices when the cabinet opens and closes

Door switch set

Mounted at the cabinet's door. Depending on wire connection, pressing the button closes or opens the circuit.

Scope of delivery:

Door switch, mounting bracket, 2 screws

Package	Catalogue number
1 pc.	WZ-1951-41-03-000

ACCESSORIES FOR SZE2 CABINETS

CABLE GLAND PLATES AND BLANKING PLATES

Spare kit of sliding gland plates

Spare kit of sliding gland plates with foam for cabinet's bottom plate

Intended for application instead of standard sliding gland plates.

They create a cable opening with adjustable width.

Sealing foam protects cable isolation lead into the cabinet from any defects, at the same time increasing the cabinet's tightness.

Types, dimensions and openings in the bottom plate of SZE2 cabinet – see page 280.

Material:

Al-Zn coated sheet steel, polyurethane foam

Scope of delivery:

Set of 2 sliding gland plates with sealing foam.

For cabinet width [mm]	Gland plates width [mm]	Package	Catalogue number
800	656	1 set	WZ-1951-81-01-000
1200 or 600	456	1 set	WZ-1951-81-02-000
1000	406	1 set	WZ-1951-81-03-000

Method of fastening sliding gland plates in the bottom plate of the SZE2 cabinet

Supply of all cabinets includes:
1, 2, 3 – sliding gland plates without foam.
Supplementary accessories:
4, 5 – sliding gland plates with sealing foam intended for fastening instead of 2 standard gland plates without foam (1, 2).

ACCESSORIES FOR SZE2 CABINETS

CABLE GLAND PLATES AND BLANKING PLATES

Blanking and cable entry plates for cabinet's top plate

For types, dimensions and spacing of openings in the top plate of the SZE2 cabinet, see page 281.

Available in 5 types:

- Solid blanking plates with a sealing gasket
 - to ensure tight closure of the top plate
- Perforated blanking plates
 - with ventilation openings, 2.5 mm wide
- Blanking plates with a fabric filter
 - with a replaceable fabric filter insert
- Cable entry plates with a brush strip
 - 320 x 50 mm opening for cable entry
- Cable entry plates with a foam strip
 - 320 x 50 mm opening for cable entry

Material:

Sheet steel powder painted in RAL 7035.

Scope of delivery:

Blanking or cable entry plate with mounting elements for fixing inside the cabinet.

Solid blanking plates

Cable entry plates with a brush strip

Perforated blanking plates

Blanking plates with a fabric filter

ACCESSORIES FOR SIZE2 CABINETS

VENTILATING, COOLING AND HEATING

Heater

Compact heat device equipped with fan.

Technical data:

- Power supply 230 V AC 50-60 Hz
- Heating force 200/300/400 W
- Fan capacity 10 m³ /h
- Protection degree IP 20
- Dimensions 71x70x96,5 mm

Features:

- 3 power ranges depending on how connect the power cord,
- independent power supply circuit of the fan.

Scope of delivery:

- heater,
- DIN rail,
- two holders,
- screw clamps for connecting power cords.

Package	Catalogue number
1 pc.	WN-0316-09-00

Thermostat

Thermostatic regulator indicated for controlling fans, heaters, heat exchanger or for attaching signal generator at exceeding preset temperature limits.

Technical data:

- Sensor element:
thermal bimetal
- Temperature range:
0-60 °C, hysteresis ca. 7 °C
- Contact types:
snap action contact
- Power carrying capacity:
6 A (1) 250 V AC
- Radio frequency interference:
N (according to VDE 0875)

Scope of delivery:

- KTS 1141 or KTO 1140 thermostat,
- DIN rail,
- two holders,
- two screw clamps.

KTS 1141 - thermostat normally open

ACCESSORIES FOR SZE2 CABINETS

VENTILATING, COOLING AND HEATING

Example of ventilation of the cabinet with forced air circulation

Example of filter fans

Filter fans and exhaust filters

- Intended for mounting in side panels and door of the cabinet.
- Fastened with latches and screws.
- Enclosure made of ABS material, light grey (RAL 7035).
- Equipped with high quality filter inserts and gaskets.
- Possibility of changing direction of air flow by turning the fan.

Type of fan supply:

230 V AC (50/60 Hz),
On request: 115 V AC (50/60 Hz) or 24 V DC

Protection degree:

IP 54 in accordance with EN 60529

Selection of filter fans and exhaust filters should be consulted with ZPAS customer service.

ACCESSORIES FOR SZE2 CABINETS

VENTILATING, COOLING AND HEATING

Air conditioner and heat exchanger

On customer's request, SZE2 cabinets can be equipped with an air conditioner or heat exchanger (air/air type) fixed on the doors, side panels or in the top plate.

Mode of operation:

Internal cabinet air is sucked up from the top, cooled inside the air conditioner or heat exchanger and returned the cabinet at a high speed towards the bottom. This solution ensures optimum cooling of the entire cabinet.

Protection degree:

Air conditioners and heat exchangers in standard ZPAS offer have IP 54 protection degree.

Heat exchangers

**AVAILABLE TYPES OF AIR CONDITIONERS****Side/door-mounted****PROTHERM**

- basic series of air conditioners
- 330-4000 W cooling power
- designed for mounting on cabinet side panel or door

SLIM

- for applications where flat air conditioner is required
- 500-3000 W cooling power
- designed for mounting on cabinet side panel or on cabinet door

OUTDOOR

- for use outdoors
- 850-4000 W cooling power
- two mounting options: outside or inside a cabinet
- optional built-in heater

Roof-mounted**TOP**

- mounted on cabinet roof
- 330-5200 W cooling power
- most models equipped with triple condensate protection system

Modular**MODULE**

- for cabinet sets, mounted on the side of a cabinet with a depth 600 or 800 mm
- 5800-10000 W cooling power
- all models with electronic control

Selection of the air conditioner or heat exchanger should be consulted with ZPAS customer service.

Air conditioner fixed on cabinet's side panel

Air conditioner fixed on cabinet's top plate

ACCESSORIES FOR SZE2 CABINETS

MODULAR SYSTEM

**ZPAS Modular System**

ZPAS Modular System is intended for designing switchgears based on SZE2 power cabinets. Modular equipment is installed on dedicated structure.

Basic elements:

1. Mounting profiles II (see page 315)
2. Mounting bar UNI (see pages 315, 300)
3. Fixing accessories set (see page 315)
4. DIN rail (see page 316)
5. Assembly angles (see page 316)
6. Module panels 150 (see page 316)
7. Module blanking plates 150, 100, 50 (see page 317)
8. Horizontal and vertical module panels (see page 317)

Switchgears based on this design are featured with IP 30 safeto-touch (for live parts) protection degree. Once closed, SZE2 cabinets are IP 54 protected.

Each switchgear based on SZE2 cabinets is subdivided into bay height modules (BHM). Each module is 150 mm high.

Normally, switchgears equipped with a rail system are composed of 3 mounting zones:

- busbar system zone (3 BHMs),
- apparatus assembly zone (8 BHMs in case of the cabinets 2000 mm high),
- cable entry zone (1 BHMs + 100 mm).

With such a switchgear construction, the cabinets with the below listed dimensions (height x width) can contain the below listed number of modules of modular equipment:

- cabinet 2000 mm x 600 mm – 288 modules (18 mm);
- cabinet 2000 mm x 800 mm – 432 modules;
- cabinet 2000 mm x 1000 mm and 2000 mm x 1200 mm – 576 modules, respectively.

ACCESSORIES FOR SZE2 CABINETS

MODULAR SYSTEM

Mounting profiles II

Mounting profiles are a racking system, and the other components of modular equipment installation sets (i.e. module panels, assembly angles and DIN rails) are attached to this system. The rail location can be smoothly adjusted with reference to the cabinet width.

Material:

Al-Zn coated sheet steel

Scope of delivery:

Mounting profile without fixing accessories (to be ordered separately).

For cabinet height [mm]	Capacity of mounting profile II*	Catalogue number
2000	12	WZ-4881-67-02-000
1800	11	WZ-4881-67-01-000

Package: 2 pc.

* Maximum number of built-in DIN rails

**Mounting bars UNI**

Four mounting bars UNI, whose length is matched to the cabinet depth, are necessary to install mounting profiles II inside SZE2 cabinet.

A detailed description of the mounting bars UNI can be found on the page 300.

**Mounting profile II fixing elements**

A set of fixing accessories for fastening 2 pcs. mounting profiles II to mounting bars UNI.

SZE3 CABINETS

SZE3 CABINETS

SZE3 CABINETS

SZE3 MODULAR CABINETS

Versatile bolted enclosure for indoor applications both in automation and power industry, for installing various devices on a mounting plate or an internal rack. The cabinet has a frame structure, based on closed profiles, perforated in two planes. This gives unlimited possibilities for interior installation and allows to easily connect cabinets in series.

SZE3 cabinet comes in 48 varieties of sizes. For more information please contact our Sales Department to choose the suitable for your need. Other untypical dimensions are also possible.

SZE3 cabinets are also available in a version suitable for outdoor applications (special painting), or in stainless steel.

Cabinet 800 mm wide including mounting plate, without side panels

TECHNICAL DATA

Standard compliance:

Cabinets are made in accordance with PN-EN 62208 standard
Protection degree enclosures: **IP 55** compliant with PN-EN 60529

Material and surface finishing:

Cabinet's frame - galvanized steel sheet

Doors, panels, plinth - steel sheet powder painted in RAL 7035 (epoxide-polyester paint of coarse-grained structure, applied for internal conditions). On customer's request, it is possible to use special paint with increased resistance to adverse weather conditions and using polyzinc base.

Mounting plate, swing frame - galvanized steel sheet and profiles

Mounting bars - aluzinc steel sheet

SZE3 cabinets and accessories can be made of stainless steel.

SCOPE OF DELIVERY

Cabinet in basic configuration includes: cabinet's frame, front door with a lock that incl. double-bit insert (no handle), rear panel, mounting plate for the full height of the cabinet, top panel, set of sliding gland plates for cabinet's bottom plate. Side panels, plinth, lifting eyes, swing frame and other supplementary accessories should be ordered separately.

CABINET DESIGN

Screwed framework of the cabinet

Closed-profile bolted design for high rigidity. Shape of the profiles ensures full symmetry of the cabinet frame, allowing doors and panels to be installed on either side plane. Each profile has a perforation with pitch of 25 mm on two planes, which makes the interior highly configurable.

The material used gives increased corrosion resistance and simple galvanic connection of unpainted parts that are attached directly to the frame. In this way there is a possibility to avoid any additional ground connections.

The perforation is designed for M6 self-tapping screws and special M8 cage nuts.

The perforation modular arrangement in the cabinet frame is compliant with the EN 60917 standard.

Door

Door is made of steel sheet powder coated in RAL 7035. The door can be mounted to the frame at any plane, on four hinges with an opening angle of 150°. With its symmetric design, the door can be mounted for either left or right handing. The door comes with 25 mm perforated stiffening frame as standard. The door has a four-point rod lock as standard. Cabinets with widths of 1000 mm and 1200 mm have a double door; cabinets with widths of 800 and 600 mm have a single leaf door. On request, we can deliver glazed and/or ventilated door, see pages 326–327.

Rear panel and side panels

Simple and quick installation with screws. Due to the frame symmetry, for cabinets of the same width and depth they may be used interchangeably. Rear and side panels are made of steel sheet powder-coated in standard RAL 7035. They have M8 earthing bolts as standard.

Top panel

Full metal blanking plate powder-coated in RAL 7035 with a cast seal.

Bottom plate

Perforated plate with 3 sliding blanking plates (the same as in SZE2 cabinet). The blanking plates are fixed with special cut-in screws that ensure continuity of equipotential bonding (earthing).

Bottom plate and the blanking plates can be removed to achieve a cable grommet virtually as large as the cabinet base.

Mounting plate

The cabinet is fitted with a galvanized mounting plate with a thickness of 3 mm as standard. It can be mounted at any depth of the cabinet. What's important, the mounting plate can be installed as far as the cabinet's back between the rear posts of the frame, all the mounting space in the cabinet can be used completely.

The mounting plate is fitted with guides for easy installation in the cabinet, as standard.

Earthing

All the necessary elements have M8 bolts for earthing them to anywhere in the cabinet frame.

ACCESSORIES FOR SZE3 CABINETS

DOORS

Doors

SZE3 cabinets have solid metal door as standard. If required, the door can be glazed and/or ventilated. The door can be mounted not only on the cabinet's front and back but also on its sides. Tightness is ensured by a seal cast of foamed polyurethane.

The door has M8 earthing bolts. A standard cabinet has a four-point lock with doppelbart insert and no handle. The lock is located outside the sealed zone, so it does not compromise protection degree IP.

Maximum door opening angle: 150°

At the customer's request we can introduce various kinds of modifications, such as cutting out holes for touch panels, adding external hinges to increase the door opening angle, etc.

Material:

- sheet steel powder paint, light grey (RAL 7035),
- galvanized steel stiffening profiles, perforated for installing cable trays, for example,
- brown smoked safety glass,
- door ventilated through plastic ventilation grilles protection degree IP 54.

Scope of delivery:

Complete wing of door with hinges and lock that includes doublebit insert (no handle).

ACCESSORIES FOR SZE3 CABINETS

SIDE PANELS • LIFTING ACCESSORIES

**Side panels**

Panels are bolted to the frame with intermediate elements that position the panel in the frame.

All panels are fitted with seals cast of polyurethane foam, and M8 stud bolts for mounting earthing wires.

If requested, the side panels can have holes for air vents, fans, heat exchangers and air conditioners.

Material:

Sheet steel powder painted in light grey (RAL 7035)

Scope of delivery:

Set of 2 side panels with fixing accessories for mounting into the cabinet.

lifting angle	1 pc.	WZ-6282-69-00-C12

ACCESSORIES FOR SIZE3 CABINETS

CABINET'S BASE

Modular plinth

It consists of 4 corners and 4 or 8 removable side panels. Total weight of the cabinet is carried by plinth corners. It is possible to reach the area under the cabinet by unscrewing the side panels. Plinth can be mounted to the base by optionally using 4 rubber vibro-shock absorbers.

Ordering method:

Plinth includes the following elements: plinth corners with appropriate plinth side panels depending on the cabinet's width and depth.

**Plinth side panels**

There are three types of plinth side panels available - see the pictures. Each type has the standard height of 99 mm. Side panels can be removed even when the cabinet is loaded with equipment.

Material:

Sheet steel, powder painted in light grey (RAL 7035).

Scope of delivery:

Panel with fixing accessories.

**Solid side panel****Perforated side panel****Side panel with brush opening**

ACCESSORIES FOR SZE3 CABINETS

MOUNTING PLATE

Mounting plate

The mounting plate is designed for installing different equipment inside the SZE3 cabinet. Detailed dimensions of the mounting plates are given in the drawing on pages 322-325.

Material:

Galvanized steel sheet, 3 mm thickness

Scope of delivery:

Mounting plate with fixing accessories for smooth adjustment within the cabinet's depth. Mounting plate guides are sold separately. In order to fasten the mounting plate on the back of the cabinet, between the rear posts of the frame, requires two additional lower brackets, ordered separately – see page 332.

TECHNICAL DATA

Material:

Sheet steel

Protection degree:

IP 65 in accordance with EN 60529

Surface finish:

Body, door, blanking plate – Epoxide-polyester thick-texture powder paint in RAL 7035, intended for indoor usage. On customer's request, it is possible to use facade paint with improved resistance to adverse weather conditions and optional use of polyzinc base.

Mounting plate - Al-Zn coated

Note:

On request, the body, door and blanking plate can be made of stainless steel.

DESCRIPTION OF SWN CABINET DESIGN

Body

- The body of SWN is a tight-welded sheet metal structure. Optimised door light ensures maximum use of available space.
- A multi-folded enclosure aperture protects against dust and moisture even when the door is open.
- In the bottom of the body, there is an opening for a gland plate. Dimensions of the opening depend on cabinet dimensions.
- Inside the body there are self-tapping screws for fixing the mounting plate.
- On the rear side of the body there are cut-outs for mounting the cabinet directly on the wall or by using lifting brackets.

Door

- Cabinets are provided with a single-wing door.
- Depending on height, either one or two locks including double-bit insert are used:
 - cabinets up to 400 mm high - one lock in the middle;
 - cabinets from 500 to 1000 mm high - two locks.
- There are hinges fixed to the door; the number depends on cabinet height: from 300 to 600 mm - two hinges, from 800 to 1000 mm - three hinges.
- Interior of the door including sealing gasket and earthing studs.
- Left or right door option.
- Maximum door opening angle 120°.

Mounting plate

- Fixed to rear side of the body.
- In cabinets up to 600 mm high the flat mounting plate is used.
- In cabinets 800 or 1000 mm high, a folded mounting plate is used to maintain appropriate stiffness.
- Mounting plate including fixing points for earthing bar.

Blanking plate - cable entry plate

- Cabinets with cat. no. from WZ-2285-01-01-011 to WZ-2285-01-10-011 includes one blanking plate installed in cabinet's bottom (see picture).
- Cabinets with cat. no. from WZ-2285-01-11-011 to WZ-2285-01-20-011 includes two blanking plates (upper and bottom), which covers whole surface of upper and bottom plate.
- Fixed by self-tapping screws.
- Includes sealing gasket and earthing stud.
- Gland cable entries available on request.

Earthing and potential equalisation

- The door and the blanking plate including earthing studs.
- Earthing bar and potential equalisation bar (for fixing to the mounting plate) and earthing cables are delivered as supplementary accessories.

Blanking plate fixed to the cabinet's bottom

Detailed description of supplementary accessories: page 344

SWN WALL-MOUNTED CABINETS

SUPPLEMENTARY ACCESSORIES

Potential equalisation bar

Fixed to the mounting plate by insulators (fixing points are made during assembly). Threaded holes M5 for fixing wires.

Material:

Copper bar 30 x 4 mm.

Scope of delivery:

Potential equalisation bar with 2 insulators and screws for fixing on the mounting plate.

For cabinets width [mm]	Length of the bar [mm]	Package	Catalogue number
200 - 400	130	1 pc.	WZ-2285-10-01-000
500 - 800	230	1 pc.	WZ-2285-10-02-000

Earthing set

Consists of an earthing bar and 2 earthing cables.

Earthing bar

- Fixed to mounting plate by distance pins (standard mounting plate includes fixing points for earthing bar).
- Threaded holes M5 for fixing wires.

Earthing cables

- Insulated copper wires for joining removable elements of the cabinet with earthing bar or directly with cabinet's body.
- With contact eyes.

Material:

Galvanised steel rail 30 x 4 x 170 mm

Copper cables, full section 6 mm²

Scope of delivery:

Set: earthing bar 170 mm long with distance pins, washers and nuts for fixing to mounting plate, 2 grounding cables 300 mm long, fixing accessories.

Package	Catalogue number
1 set	WZ-2285-13-00-000

WALL-MOUNTED CABINETS

SUPPLEMENTARY ACCESSORIES

Set of wall brackets for wall mounting

Wall brackets are fixed to openings in the rear side of the cabinet horizontally or vertically.
 Diameter of openings: 10 mm.
 Spacing between rear side of the cabinet and the wall: 20 mm.
 1 set = 4 brackets per cabinet.

Material:

Al-Zn coated sheet steel.

Scope of delivery:

Set: 4 wall brackets with screws, nuts and washers for fixing to the rear side.

Package	Catalogue number
1 set = 4 pcs.	WZ-2285-14-00-000

19" rack for SWN cabinets

It is used for mounting 19" devices inside SWN cabinets with a width of 600 mm.
 It consists of 2 mounting profiles or mounting angles and 4 brackets with fixing accessories.
 For installing the rack inside the cabinet, the openings intended also for mounting hinges are used.

Material:

Al-Zn-coated steel sheet

Scope of delivery:

2 mounting profiles or mounting angles, 4 brackets with fixing accessories.

Rack made of 19" mounting angles

Rack made of 19" mounting profiles

PSL MODULAR CONTROL DESKS

TECHNICAL DATA

TYPE I

TYPE II

TYPE III

TYPE IV

- PSL control desks are designed for mounting control apparatus, monitoring systems, measurement devices and visualisation of production processing.
- They are particularly recommended for operation stations, automated processing lines or machinery rooms.
- Equipped with revolving hinge panel which allows for maintenance of mounted devices.
- Manufactured in 4 configurations and 60 dimensions.
- Option of openings in the hinged panel on customer's request.

TECHNICAL DATA

Material:

Sheet steel

Protection degree:

IP 54 in accordance with EN 60529

Surface finishing:

Body of individual segments, doors, rear panels, plinth – Epoxide-polyesther powder paint, light grey RAL 7035, recommended for indoor applications

Mounting plates – Al-Zn coated

Note:

On request, the bodies, doors, panels and plinth can be made of stainless sheet steel.

SCOPE OF DELIVERY:

Desks are segment-based structures (see drawings). Individual segments consist of:

- top segment (higher version) – body, door (revolving hinge panel), rear panel, mounting plate;
- top segment (lower version) – body, door (revolving hinge panel);
- bottom segment – body with cable entry in bottom plate blind with blanking plate, front door, rear panel, mounting plate;
- front segment – body, door (revolving hinge panel), two slotted mounting bars.

The desk is placed on a 100 mm plinth.

Elements of the desk are connected with each other by earthing cables.

GENERAL INFORMATION

In the period of last few years, the increase of telephone-users and density of ducts surrounding cities which are endangered on easy damage, forces the manufacturers of telecommunication links to work out and use ducts under the earth-surface. Together with the increase of transferring wider frequency band, it appeared that there are some difficulties with providing appropriate quality of transmission with using copper wires. Wider pass bands in fast networks, like Gbit Ethernet or ATM, means necessity of assistance the copper wires with complicated electronic systems. That is the reason why fibre optics became alternative solution to copper wires.

Not mentioning creation of brand-new networks, one of the biggest tasks for telecommunication network is protection of already made investments and re-usage of the biggest possible part of already existing cable-networks. This possibility is given by access systems. Access systems enable gradual changing distributive copper wires with fibre optics. This solution allows using existing exchange lines not only for transmission telephone and ISDN services, but also for transmission 2Mb/s flux with using digital exchange line technology.

The technology of access exchange guarantees updating existing transmission network with usage of valuable electronic equipment. In order to lower the costs of modernisation, the most common solution is joining old part of installation (copper wires) with new one (fibre optic cables) in outdoor access cabinets (like SZD).

The main task of outdoor access cabinet is full protection of installed equipment. The cabinet fulfils the requirements of protection against negative influence of environment (rain and snow falls, sun, dust etc) and vandalism. Another very important task of SZD cabinets is providing specified climatic conditions which depend on installed equipment.

The construction of SZD cabinet enables optional arrangement of inside equipment. It makes possible to use SZD cabinets not only in access systems, but also in each case where the protection of outdoor equipment working in extreme conditions is very important. SZD cabinets produced by ZPAS-NET have been already used in telecommunication industry, on ships, platforms, stamping press and intermediate pumping gas stations, heat and power stations, power industry plants, refineries, cement plants, for protection of machinery for outdoor lightning operating etc.

REFERENCES

ZPAS-NET, as the manufacturer of outdoor cabinets, co-operates with well-known companies like: Aster City, Clearwire, Delta Energy Systems, DGT, Eltek Polska, Energis Polska, Ericsson, Keymile, Molex (Norway), Multimedia, Netia, Nokia Siemens, Polkomtel, Sprint, Sunlight Systems (Greece), Teletra Komtrans, Telzas, TP SA.

DESIGN

TECHNICAL DATA

Material:

- Cabinets framework - aluminium profile,
- Side shields and doors - aluminium profile,
- Roof (internal mantle) - 1.5 mm thick aluminium sheet,
- Roof (external mantle) - alternatively stainless steel sheet, Al-Zn coated (aluzinc) steel sheet or aluminium sheet.

Surface finishing:

- Aluminium profiles of the framework and aluminium frames of shield and doors:
Anodised (in EMC version chromate coated and powder painted in RAL 7035)
 - Aluminium profiles of shield and doors:
Chromate coated and powder painted in RAL 7035
 - Internal mantle of the roof:
Natural aluminium
 - Plinth and external mantle of the roof:
Powder painted in RAL 7035
- In EMC version of the cabinet conductivity between each elements of the construction is ensured.

Protection Degree:

Standard cabinets have got protection degree IP 54 in accordance with EN 60529. If required it can be increased up to IP 65.

Note:

ZPAS reserves the rights to implement changes in construction. All technical solutions used in construction of SZD cabinets are reserved in Patent Office of Poland.

Framework

Supporting structure of the cabinet is the framework made of aluminium profiles, which are joint together by adaptors. In profiles there are special ducts, which enable the assembly of swing frame or optional creation of supporting structure for mounting equipment. The framework of the cabinet is in standard set on the plinth. The height of the plinth depends on customer's request: from 40 to 300 mm.

Framework of SZD cabinet set on the plinth

DESIGN

Doors, side shields

Doors and side shields of SZD cabinets are made of aluminium rail-profiles which are fastened together. The aluminium profiles make double ventilation wall. In the cabinet there are mounted two-point rod-latch locks. The door handle is made of zinc and aluminium alloy. On customer's request it is possible to have optional type of patent insert (ABLOY, KABA, EMKA, etc). It is possible to make special opening for temporary cable entry (e. g. from outside power supply unit).

Standard roof for SZD

Standard roof for SZD cabinets is made of two mantles of 1.5 mm thick sheet steel. Between the mantles there is a gap, which enables to carry away accumulated condensation water.

Roof in special configuration

When it is necessary to cool the cabinet not only by ventilating through side shields and doors but also additional cooling system, it is possible to use special roof made of three mantles of sheet steel. This solution creates two air chambers in one of them it is possible to fasten fan units which increase the airflow.

Applying two-chambers roof causes, that the total height of the cabinet is increased by 100 mm.

Additionally, it is possible to fix lifting eyes into the roof.

A part of roof in special configuration

DESIGN

Dimensions of SZD cabinets

The SZD cabinet has a modular design. The main part of the cabinet is made of panels (which are fastened by latches) and aluminium profiles. Both panels and profiles can be cut to any length. This type of design makes it possible to achieve the desired cabinet dimensions. **Every cabinet is designed and manufactured on individual request (together with interior installation – it is possible to create all types of partitions and supporting structures of the cabinet).**

As a standard, the technology allows for the manufacture of cabinets with single or double leaf doors.

A-A section

Note:

The cabinets are available in any height.

For non-standard cabinet sizes, the way of calculating external dimensions is shown in the illustration.

VENTILATION

Fan unit with six cooling fans and thermostat

Ventilation with forced internal and free external air circulation

Fan units are mounted inside SZD cabinet in order to shorten time of carrying away heat dissipation emitted by equipment installed in the cabinet. Fan units cause faster air movement inside the cabinet and in the cabinet's walls. In case of low temperature the system of heaters joint with thermostats is applied. Above solutions enable failure-free operation of access systems.

DIAGRAM OF AIR FLOW

PICTORIAL DIAGRAM OF SUPPLYING FAN UNITS AND HEATERS

DESIGN

1. Fan unit
2. Thermostats
3. 400 W heaters with fan 220 V, 50/60 Hz

AIR FLOW IN STANDARD ROOF

VENTILATION

Ventilation with forced internal and external air circulation

In cabinets which are endangered of strong solar radiation, it is recommended to use ventilation with double air circulation. In this solution, air circulates inside the cabinet and additionally flows between the double walls of the cabinet. Moreover, circulation of external air is forced by fan units mounted in the roof. In case of low temperature the system of heaters joint with thermostats is applied. Above solutions enable failure-free operation of access systems.

VENTILATION

PICTORIAL DIAGRAM OF AIR CIRCULATION IN THE CABINET WITH DIRECT VENTING

Ventilation based on use of heat exchanger and direct venting

In order to intensify the cooling process in cabinets with installed equipment with high heat dissipation, there is solution based on cross heat exchanger. Heat exchanger is a type of radiator, where there are two air flows: warm from the inside of the cabinet (radiator's plates collect heat) and second from the outside of the cabinet (cooled by exchanger). Cross system of the heat exchanger enables to retain tightness of the cabinet and external and internal air flows do not mix together.

Another solution is direct venting of the cabinet, which is used when it is necessary to carry away lots of heat dissipation. In cabinet's roof or on the door there are mounted fans which pull external air (through double wall and filters system). External air goes through appliances which emit heat and is carried away outside by roof or perforations on the doors.

PICTORIAL DIAGRAM OF AIR CIRCULATION IN THE CABINET WITH HEAT EXCHANGER MOUNTED ON THE ROOF

PICTORIAL DIAGRAM OF AIR CIRCULATION IN THE CABINET WITH HEAT EXCHANGER MOUNTED ON THE DOOR

VENTILATION

Cabinet with heat exchanger mounted in the door

Cabinet with heat exchanger mounted in the roof

Cabinet with direct venting

AIR-CONDITIONING

Air conditioner partially flush into the cabinet

Air conditioned SZD cabinets

Air conditioners are used when the required temperature inside of the cabinet is lower than ambient temperature. The power of air conditioners is selected according to pre-set climatic conditions, heat dissipation by active equipment and dimensions of the cabinet. On individual customer's request the air conditioners can be fixed inside or outside of the cabinet. In case of inside installation, they are usually fixed on the doors or side shields, what enables easy service access.

Air conditioners fixed inside of the cabinet

AIR-CONDITIONING

Air conditioners fixed outside of the cabinet

TESTS

Climatic tests

SZD cabinets equipped with access systems of different suppliers (Siemens, Ericsson, DGT, Ascom) have been climatic tested at Laboratory of Telecommunications Accessories and Devices Research in Szczecin. SZD cabinet was placed in climatic chamber, where it was first tested for 12 hours in temperature -33 °C and then for 12 hours in temperature +40 °C.

Below, there are some climatic diagrams.

AVERAGED TEMPERATURES IN ELECTRONIC CHAMBER AND CHAMBER OF ACCUMULATORS' BATTERY

AVERAGED RUN OF TEMPERATURE IN ELECTRONIC CHAMBER AND CHAMBER OF ACCUMULATORS' BATTERY WITH TESTS OF FAILURE POWER SUPPLY OF THE CABINET

Protection degree IP tests

SZD cabinets have been tested for protection degree, IP rated. Measurements have been made in following sequences:

- measurement of IP degree
 - vibration test on the shaker
 - next measurement of IP degree
- Both tests (before and after vibration) proved IP 65 degree

The tests were carried out in two independent laboratories:

- Laboratory of Telecommunications Accessories and Devices Research in Szczecin
- ZPBE Energo Pomiar

POLISH CERTIFICATES OF IP 65 PROTECTION

TESTS

Screening efficiency tests

SEZ cabinet was subjected to screening efficiency tests at the Telecommunication and Acoustic Laboratory of the Institute of Technology in Wrocław. On the basis of measurements, the cabinet's screening efficiency was specified in the magnetic field's frequency range of 100 kHz up to 1000 MHz:

- a) Screening efficiency in the frequency range of 100 kHz up to 30 MHz
 - for horizontal polarisation is included in the following limits: from 15 dB to 26 dB (average value varies from 18 dB to 22 dB),
 - for vertical polarisation is included in the following limits: from 21 dB to 44 dB (average value varies from 32 dB to 40 dB).
- b) Screening efficiency in the frequency range of 30 MHz up to 1000 MHz
 - for horizontal polarisation is included in the following limits: from 55 dB to 5 dB (average value varies from 52 dB to 19 dB),
 - for vertical polarisation is included in the following limits: from 65 dB to 23 dB (average value varies from 59 dB to 29 dB).

CABINET'S SCREENING EFFICIENCY FOR THE HORIZONTAL COMPONENT OF THE ELECTRIC FIELD

CABINET'S SCREENING EFFICIENCY FOR THE VERTICAL COMPONENT OF THE ELECTRIC FIELD

Acoustic tests

The SZD cabinet with specified quantity of fans and heaters (in accordance with the below drawing) have been tested for checking the noise emission of the cabinet.

PLACES OF FANS IN TESTED CABINET

- WW₁, WW₂, WW₃** - exhaust fans, placed symmetrical in the upper part of the cabinet under the roof
- WW₄** - exhaust fan
- WN** - downcast fan
- PN** - fan units mixing air inside the cabinet
- TW** - thermo fans
- G** - heater of transmission shelf
- R** - temperature controllers

Example of sound diffusion in front and rear part of SZD cabinet.

Sound diffusion for 63 Hz

Sound diffusion for 500 Hz

Sound diffusion for 1000 Hz

TESTS

Acoustic tests

THE LEVEL OF BACKGROUND NOISE (THE CABINET SWITCHED OFF)

SUPPLEMENTARY ACCESSORIES

Swing frame

Double-section frame

Detail A:
frame fastening

WM = 456 (19") or 515 (21") - mounting width
WU - useful width
HU - useful height

The frames can be manufacture as single-section or double-section.
 In case of big loading there are used chest-like frame

Chest-like frame

SUPPLEMENTARY ACCESSORIES

Shelves

Shelves for mounting batteries of emergency power supply are made of stainless steel. Dimensions of shelf depend on quantity of mounted batteries are determined by customer's request.

Fixed and pull out shelf

SUPPLEMENTARY ACCESSORIES

Partition and cable entry

The partition divides the chambers of the cabinet. It is made of aluminium sheet. In the partition there can be different types of cable entries: foam cable openings, rubber gland seals, cable entries ROXTEC type.

Cable entry ROXTEC type

Cable entry made of rubber gland seals

Foam cable entry

SUPPLEMENTARY ACCESSORIES

Door switch and door stop

The 3-positioned door switch is mounted at cabinet's door, positions:

- pos. 1 - unstable pushed-in (door closed)
- pos. 2 - stable pushed out (door opened)
- pos. 3 - "service position", pushed in manually, stable (door opened)

Example:

1. Cabinet's door closed
 - option I - open circuit
 - option II - closed circuit
2. Cabinet's door opened
 - option I - closed circuit
 - option II - open circuit
3. Cabinet's door opened "service" position
 - option I - open circuit
 - option II - closed circuit

3-positioned door switch

Door stop and door switch in cabinet with equipment

SUPPLEMENTARY ACCESSORIES

Handles for mounting of cabinet

Often, in case of small cabinets exists necessity to adaptation them to mounting directly on the wall or column. Then to the cabinet we mounted a special mounting handles.

Cabinet adapted for mounting on the column

Cabinet with wall mounting bracket

SUPPLEMENTARY ACCESSORIES

POWER SUPPLY MAINTENANCE SYSTEMS

Systems of guaranteed power supply

ZPAS-NET, a supplier of a full range of solutions, also offers complete systems of guaranteed power supply from highly reputed manufacturers: Telzas, Delta Energy Systems, Eltek Valere, etc.

Power supply systems are designed for uninterruptible supply of direct current to consumers with the rated voltage of 48 V in direct full-float operating mode based on rectifiers and battery packs. The systems can be supplied in the Front Terminal version with all terminals and connectors located on the front panel of the system. In the basic version, the enclosure of the power supply system is suitable for installation in 19" cabinets (racks).

Application:

- professional telecommunications systems
- end-user telecommunications systems
- IT network systems
- industrial automation systems

**DC power supply systems
SDB 65 (SDB 65FT)**

Input parameters:

- Input voltage..... 3 x 230/400 V AC
(-23.5 %; +30.4 %)
- Frequency..... 45–65 Hz
- Maximum phase current..... 2 A (three-phase)
24 A (single-phase)
- Power factor..... ≈ 1

Output parameters:

- Range of voltage..... 48–58 V DC
- Characteristics..... UPI
- Stabilization of output voltage..... ±1 %
- Maximum output current..... 72 A
- Maximum output power..... 3200 W
- Output voltage ripples
(psophometric value)..... < 2 mV

General data:

- Range of ambient temperatures..... -33... +55 °C
- Cooling..... fan-cooled
- Efficiency..... ≥ 90 %
- Protection degree..... IP 20
- Electromagnetic compatibility..... PN-EN 300-386, class B
- Dimensions of the power supply system (H x W x D)..... 133 x 482 x 390 mm
- System weight without rectifier units..... ca. 11.0 kg
- Dimensions of the rectifier unit (H x W x D)..... 81 x 40 x 285 mm
- Weight of the rectifier..... 1.1 kg

**DC power supply systems
SDC 140**

Input parameters:

- Input voltage..... 3 x 230/400 V AC
(-23.5 %; +26 %)
- Frequency..... 45–65 Hz
- Maximum phase current..... 24 A
- Power factor..... ≈ 1

Output parameters:

- Range of voltage..... 48–58 V DC
- Characteristics..... UPI
- Stabilization of output voltage..... ±1 %
- Maximum output current..... 140 A
- Maximum output power..... 6800 W
- Output voltage ripples
(psophometric value)..... < 2 mV

General data:

- Range of ambient temperatures..... +5...+40 °C
- Cooling..... fan-cooled
- Efficiency..... ≥ 91 %
- Protection degree..... IP 20
- Electromagnetic compatibility..... PN-EN 300-386 PN-T-83101
- Dimensions of the power supply system (H x W x D)..... 134 (3U) x 483 x 300 mm
223 (5U) x 483 x 300 mm
311 (7U) x 483 x 300 mm
- System weight without rectifier units.. 27 kg
- Dimensions of the rectifier unit (H x W x D)..... 88 x 85.5 x 273 mm
- Weight of the rectifier..... 2.4 kg

SUPPLEMENTARY ACCESSORIES

POWER SUPPLY MAINTENANCE SYSTEMS

Complete rectifier power supply systems with modules DPS 600B-48-2 19IN-1U

- Max power: 2 x 600 W
- 19" enclosure, 1 U height
- Load protection: 1 x MCB (max 16 A)
- Battery protection: 2 x MCB
- Optionally 5 x fuse protection devices: 2 battery and 3 load protective devices instead of 3 MCB
- PSC3 or PSC1 controller
- Low voltage disconnect (LVD) in the battery circuit

Complete rectifier power supply systems with modules DPS 600B-48-4 19IN-2U

- Max power: 4 x 600 W
- 19" enclosure, 2 U height
- Battery protection: 2 x MCB
- Load protection: 3 x MCB, 5 x fuse
- PSC3 or PSC1 controller
- Low voltage disconnect (LVD) in the battery circuit

Complete rectifier power supply systems with modules DPR 1600B-48

- Max power: 4 x 1600 W
- 19" enclosure, 3 U height
- Load protection: 9 x MCB
- Battery protection: 2 x MCB ≤ 125 A
- PSC3 or PSC1 controller
- Low voltage disconnect (LVD) in the battery circuit

SUPPLEMENTARY ACCESSORIES

POWER SUPPLY MAINTENANCE SYSTEMS

Smartpack S controller

Flatpack S 48 V 1000 W rectifier

1 U compact power supply system with HE technology

The ever-growing speed of telecommunication network calls for a flexible and expandable solution. With its small size, high efficiency, reliability and rich communication capabilities, the Flatpack S system meets the needs of the future. Its short design allows for installing it in most cabinets, making it a great replacement for an obsolete device.

APPLICATION

Telecommunications

- mobile / wireless

- Radio links / base transceiver stations
- LTE / 4G / WIMAX
- Scattered aerial systems
- Microwave
- Broadband

Telecommunications

- stationary

- Telephone exchanges / switches
- Fiber Optic / FTTX
- Microwave
- Cable
- Broadband

FEATURES

- All-in-one system:
 - Smartpack S controller
 - Rectifiers
 - Battery distribution
 - Loads distribution
- 262 mm deep
- 1 U high
- Hot plug rectifier
- Hot plug controller
- Advanced monitoring and control via Ethernet port
- 2R (40 A) distribution options:
 - 7 x 30 A MCB drawer (optionally RGR)
 - 4 x 30 A MCB on the front panel
 - 7 x 15 A MCB on the front panel
- 3R (100 A) distribution options:
 - 2 x 60 A

FLATPACK S 1U x 19" 48 V systems – 2P/3P

Model	1 controller + 2 rectifiers	1 controller + 3 rectifiers
WEJŚCIE		
Voltage	100-250 V AC	100-250 V AC
Configuration of AC connectors	Single-phase 230 V AC, or 2 x 230 V AC	Single-phase 230 V AC, or three-phase (Δ,Y) 230/400 V AC
Power supply connection	2.5 mm ² connectors on the back	
Frequency	45-66 Hz	
OUTPUT

BATTERY DISTRIBUTION		
LVBD	Default	Default
Maximum protection (circuit breaker)	2 x 60 A ¹⁾	2 x 100 A ¹⁾
Connection (rear)	16 mm ² connectors	With M6 screw
LOADS DISTRIBUTION		
Connection from the back	Not applicable	2 x 60 A, M6 screw
Cable entering from the back, connection from the front Screw terminals LVLD optionally	7 x 30 A MCB ²⁾ 7 X 4 mm ² for MCB 1 and 2	Not applicable
Connection from the front screw terminals, clipped	4 x 30 A MCB / 7 x fuse 15 A 4 mm ²	Not applicable
KONTROLA I MONITORING		
Smartpack S	6 I/O and Ethernet	
PARAMETRY MECHANICZNE		
Dimensions (W x H x D)	19"/1U/262 mm Recommended cabinet depth: min. 300 mm	
Weight including the controller and distribution, without rectifiers	5.3 kg	5.2 kg
DESIGN STANDARDS		
Safety	UL 60950-1, EN 60950-1	
EMC	ETSI EN 300 386 V.1.4.1 EN 61000-6-1 (resistance, light industry) EN 61000-6-2 (resistance, industry) EN 61000-6-3 (emission, light industry) EN 61000-6-4 (emission, industry)	
Environmental	ETSI EN 300 019-2-1 Class 1.2 ETSI EN 300 019-2-2 Class 2.3 ETSI EN 300 019-2-3 Class 3.2	

¹⁾ When using only one battery branch, one battery protection can be configured as a load output

²⁾ Loads drawer, access to the connections from the front after pulling the drawer out, cable entering from the back of a powerhouse

SUPPLEMENTARY ACCESSORIES

Thermostat

Thermostats are used for controlling fan units, heaters and heat exchangers, also can be used as a signal generator for monitoring the enclosure internal temperature.

TECHNICAL DATA

- Sensor element: thermal bimetal
- Temperature range: 0 - 60 °C, hysteresis ca. 7 K
- Contact types: snap action contact,
- Power carrying capacity: 6 A, 250 V AC
- Radio frequency interference: "N" (according to VDE 0875)

Connection diagram: see page 189

KTS 1141
- thermostat normally open
Switches on ventilation system (e. g. fans) at selected temperature limit.

KTO 1140
- thermostat normally closed
Switches off off devices (e. g. heaters) at selected temperature limit.

**MPSM-S1
Microprocessor Power Control Panel**

MPSM-S1 is a programmable 19" panel for power supply, control, monitoring, energy saving and recording. It measures voltage, current and power for each socket, as well as temperature and humidity. The device is equipped with an unparalleled set of features that make it indispensable in data communication infrastructure. It has an Ethernet communication module with software for Windows systems. The panel features 8 GB of internal memory (hardware database) that is used for recording measurements, events and alarms. The memory allows for up to 24 months of continuous recording.

MPSM-S1 panel is a Polish product that has been designed and manufactured in our company.

For detailed description of the MPSM-S1 panel see pages 142–145.

SUPPLEMENTARY ACCESSORIES

Monitoring system of climatic conditions and access control in SZD cabinets

On below example we see a system of: access control, climatic conditions supervising system and fire protection. Devices inside the cabinet are protect against flooding. All events can be instant pass on by GSM modem or mobile phone, as SMS message or email on devices administrator address. Driver worked in the cabinet enable to communication with supervising system by interactive network or internet.

System is very adaptable and easy in extension. Thoughtful way of devices connect technology selection, enable a max simplify installation of monitoring devices. Devices can be switch on to bus with any topology by RJ-45. This solution allow to spare time on wires "screw" connection. Bus communicated and supply devices, so there isn't any requirement to lead separate supply to sensors and converters.

The main part of system is software, enable to data gather, visualization and processing. User receive a complex system of remote supervising, operate by internet viewer. Its enable to object monitoring from any place of the world. Building any visualization and selection only interesting measurements, both current and archival. Allow to accommodation of set-ups to clients individually necessities. System also have a complex mechanism of alarm operation. In alarm situation, status will be identified with any measurement and situated in predefinition alarms group, in consequence, in alarm situation on many sensors, will be generate only one alarm.

Mechanism of data access control, gathered by supervising system, separate users rights, both in sense of task in system, and also access to monitoring objects. Archival data can be view by table listing and graph. All data from system can be printed. To additional virtue of system is absence of users quantity license.

SUPPLEMENTARY ACCESSORIES

Insulating base

For additional cold and humidity protection, the cabinet can be set on insulating base filled with foam. The insulating frame shall be ordered separately.

Voltage distribution panels

Cabinets can be equipped with power distribution panels configured according to customers' request.

Heater

Compact heating device including heating element and fan

TECHNICAL DATA

- voltage rating 230 V AC 50-60 Hz
- heating power (3 levels) 200/300/400 W
- fan capacity 10 m³ /h
- protection degree IP 20
- dimensions 71 x 70 x 96.5 mm
- mounting bracket for DIN rail mounting

SUPPLEMENTARY ACCESSORIES

Concrete foundations

In order to provide a complete range of services, ZPAS-NET also offers concrete foundations. These are prefabricated elements either with a monolithic design or connected by means of M10 bolts. In the upper part of the foundations there are M12 anchor bolts welded to the reinforcement. The spacing of the bolts is adjusted to the plinth size of different outdoor cabinets. All parts are moisture-protected. Openings on both sides of the foundations serve as cable entries.

SAMPLE SCREW-FASTENED FOUNDATIONS

SAMPLE MONOLITHIC FOUNDATIONS

Frame for concrete

Foundation frame for concrete to be placed under SZD cabinet. Equipped with positioning handles and templates for laying conduit pipes.

SZD CABINETS IN ACCORDANCE WITH EMC STANDARD

EMC shielded cabinets

EMC shielded cabinets are used when devices which are mounted inside the cabinet require protection in electromagnetic compatibility. Aluminium profiles used in the cabinet are additionally chromated. Special current conductive gasket is used in order to provide conductivity between each element of the cabinet (roof, plinth, side shields, door).

APPLIANCES IN SUBSCRIBERS' ACCESS SYSTEMS

Division of cabinet's interior

In the cabinet's construction there are four autonomous sections:

- 1) Battery section
- 2) Chamber of devices
- 3) MDF section
- 4) Energy section

Battery section

In standard, it is placed in the bottom part of the cabinet and is designed for installing temporary emergency power supply of the system. For additional lower of temperature in summer season, there are used two solutions:

- thermal battery,
- ventilating fans - ventilation of the section through the cabinet's mantle.

APPLIANCES IN SUBSCRIBERS' ACCESS SYSTEMS

Chamber of devices

In standard, it is placed in the central part of the cabinet and equipped with mounting bars in 19" or 21" standard or the swing frame. This section is designed for mounting active devices of subscribers' access system (service of optical fibre and patch panels).

APPLIANCES IN SUBSCRIBERS' ACCESS SYSTEMS

Distribution section

This section is designed for operator. It is equipped with teletechnical links (instillation of copper cables). Additionally, the section can be equipped with support moveable construction which adapts to each type of terminal blocks.

Energy section

This section is intended for power industry plants and designed for input of power supply. It has got fuses and a socket to plug in standby diesel generator in case of energy failure. In this section it is also possible to mount electricity meter and additional a special sight-glass, which enables reading of the meter without opening the cabinet's door.

SZD CABINETS FOR POWER INDUSTRY

SZD Cabinets are used as an enclosure for measuring systems and energy distribution. Enclosures of this type require a special organization of the cabinet interior. Applied in earlier solutions, mounting bars were replaced by mounting boards or systems of special cross bars. Often, on the outside of the cabinets, an energy terminal socket is additionally installed.

FS wiring cabinet
For more information see page 410

SZD CABINETS FOR POWER INDUSTRY

Cabinet for electrical substation earthing

Cabinet for lighting control

SZD CABINETS ADAPTED FOR POWER SUPPLY SYSTEMS

SZD cabinets are also used for outdoor installation of amplifiers for cordless power supply of telecommunication devices. Cabinet's interior is divided into two autonomous parts: battery section (bottom part of the cabinet) and devices section (upper part of the cabinet). Additionally, on customer's request, it is possible to manufacture a special type of roof intended to assembly of electric accessories.

Inside the cabinets there are mounted telecommunication amplifiers with high power, what is consequence of big power losses (heat dissipation). Direct venting, by means of two fans (which capacity is 510 m³/h each) mounted on the roof or on the cabinet's door, provides specific climatic conditions inside the cabinet.

Additionally, the system of fans' control can be used. It is able to switch on the roof fans on pre-set inside temperature threshold. Fans' rotation is lineal regulated and depends on temperature of modems installed inside of the cabinet.

EXTENSION OF OUTDOOR CABINETS

Often after several years since moment of installing the cabinet appears a necessity of installation in enclosures a new equipment. With way on fact that space in cabinets was already used earlier, it state a serious problem for fitters. Going out to opposite of requirement ZPAS company worked out three ways of increasing existing cabinet:

Cabinet before extension

1) Extension of cabinet on sides – This solution consist on mounting to existing cabinet on sides a DOSTAWKA which can be used at will. (MDF section, battery section, chamber of devices, energy section)

Idea of outdoor cabinets Extensions

The Cabinet after extension

EXTENSION OF OUTDOOR CABINETS

2) Cover plate on cabinet – the solution consists on disassembly of doors and shields in old cabinet and putting on from top, new larger enclosure. It covers so far installed equipment and it allows on adding new one. This variant does not require stopping work of installed equipment on time of exchange enclosure

Cabinet before extension

Cabinet during extension

The Cabinet after extension

The Cabinet after extension

EXTENSION OF OUTDOOR CABINETS

3) Extension upwards – the solution consists on disassembly of external mantle and internal roof then putting on and installing top swage

Idea of outdoor cabinets Extensions

The Cabinet after extension

The Cabinet after extension

The Cabinet after extension

CUSTOM SOLUTIONS

SZD cabinets with a glass panel in the door

Mobile cabinet

CUSTOM SOLUTIONS

SZD cabinets with a glass panel in the door, mounting plate, swing frame and air conditioner

Cabinet based on standard SZD type; aluminium doors and side panels were replaced by aluminium sheet.

SZD cabinet for battery charger

OUTDOOR CABINETS MADE OF ALUMINIUM SHEETS

Outdoor cabinets made of aluminium sheets come in two types:

Single-wall cabinet – made of sheet metal with a thickness of 2 mm

Double-wall cabinet – outer jacket and metal sheet frame with a thickness of 2 mm, metal sheet inner cladding with a thickness of 1 mm or 1.5 mm (depending on the cabinet size).

All outdoor cabinets are custom-made. You can order a cabinet in size, with partition of cabinet's interior and supporting structure of your choice.

To ensure appropriate climatic conditions inside an enclosure, we use various types of heat removal systems (ventilating fans, heat exchangers, air conditioners), and the right number of heaters, depending on your needs.

To improve insulation, the cabinet's interior can also be lined with insulating foam.

The cabinets have IP 54 protection degree.

Cabinets completely made of aluminium sheet

OUTDOOR CABINETS MADE OF AL-ZN COATED STEEL SHEET

Cabinet made of Al-Zn coated sheet steel

Cabinet with single walls, made entirely of Al-Zn coated steel sheet, and powder painted. Cabinet doors are protected from sticking posters.

Cabinet with double walls, made entirely of Al-Zn coated steel sheet, and powder painted

OUTDOOR CABINETS MADE OF STAINLESS STEEL SHEET

Cabinet made of stainless sheet steel

CABINETS FOR ELECTRICAL SUBSTATIONS

**AC auxiliaries switchgears****400/230 V FX, FA**

FX, FA auxiliaries switchgears offered by ZPAS are indoor structures, designed for supplying auxiliary demand of MV and LV switchrooms.

FX and FA switchgears are based on SZE2 enclosures. They consist of three or more cabinets with dimensions 2000 x 600-1200 x 600-800 mm.

Depending on customer requirements or equipment provided by the technical design, cabinet construction can be customized to individual needs – both in terms of dimensions and equipment.

A typical configuration of FX and FA switchgears:

- solid or glazed front door,
- access to equipment on one side or both sides,
- terminal strips, busbar trunkings are mounted inside the cabinet on the mounting plate or the system of mounting profiles,
- descriptions made as requested and according to standard of the facility which the switchgears are designed for, - plinth with a height of 100 or 200 mm, solid or perforated.

Auxiliaries switchgear 400/230 V AC is supplied from two or more sources. Circuit-breakers or contactors are fitted in the main tracks in accordance with the project requirements. The basic element of the system is the SZR automation system tailored to customer requirements. For protecting outgoing feeds, fused load break switches, e.g. NH, TYTAN II, circuit breakers or thermal fuses are used. Each outgoing track is led to the terminal block. Switchgears are equipped with measurement of current and voltage of each incoming feed. Meters can be located on switchgear door or inside the cabinet on masking panels. Switchgears are equipped with signalling and emergency circuits incorporated into the station's central signalling system.

RATING

Cabinet factory designation	FX, FA
Primary rated voltage	400/230 V
Rated continuous current of cabinet's auxiliaries	up to 1600 A
Rated frequency	50 Hz
Rated insulation voltage	500 V
Protection degree	IP 54

CABINETS FOR ELECTRICAL SUBSTATIONS

EXAMPLE OF AUXILIARIES POWER SUPPLY SYSTEM BASED ON WIKING EQUIPMENT OF ELTEK COMPANY

AC guaranteed voltage switchgear with modular inverter IBF DC/AC INV222

RAC 230 WIKING guaranteed voltage switchgear is an AC power supply. When working with RDC 220 and BGPW, it provides uninterrupted power supply for telecommunications devices, remote protection devices and data communication infrastructure installed in a grid station.

Comes with:

- IBF DC/AC INV222 modular inverter
- IBF AC/DC FLATPACK2 modular rectifier
- STS 207 with controller
- I/O modules
- manual uninterrupted bypass switch

Basic features:

- modular design
- N+1 to N+N redundancy
- hot-swap modules
- high efficiency
- high MTBF
- reliability
- low cost of ownership

STS 207 module with integrated controller

IBF AC/DC modular inverter

**Main 230/400 V AC auxiliaries switchgear**

Main switchgear is used to power all the devices in the grid station. In addition to power distribution, the switchgear has automatic train stop systems (ATS) for switching power between available power sources.

Comes with:

- power distribution
- ATS
- mimic system
- current, voltage and power measurements
- outgoing circuits protection
- surge protection
- signalling systems

Basic features:

- tailor-made
- robust design
- clear marking system
- easy access
- safety
- reliability
- low cost of ownership

CABINETS FOR ELECTRICAL SUBSTATIONS

FC auxiliaries switchgears 110/220 V DC and guaranteed voltage switchgears 230 V AC and 24-48 V DC

FC auxiliaries switchgears offered by ZPAS are indoor structures, designed for supplying auxiliary demand of MV and LV switchrooms.

FC switchgears are made based on of SZE2 enclosures with dimensions 2000 x 600-800 x 600-800 mm.

Depending on customer requirements or equipment provided by the technical design, cabinet construction can be customized to individual needs – both in terms of dimensions and equipment.

A typical configuration of FC switchgears:

- glazed front door,
- set of 19" mounting profiles in front and rear of the cabinet,
- equipment protected by IP 30 masking panels,
- access to equipment on one side,
- descriptions made as requested and according to standard of the facility which the switchgears are designed for,
- plinth with a height of 100 or 200 mm, solid or perforated.

Constant voltage switchgears are intended for supplying appliances with DC with rated voltage of 110 V and 220 V. The switchgear is supplied with alternating voltage from one or two sources. The main element of this system is a rectifier with external current measurement and a battery pack placed on the outside of the cabinet.

Guaranteed voltage switchgears are intended for supplying appliances of critical internal functions of the station, such as secondary protection circuits, control circuits and emergency signalling circuits. 230 V AC switchgears are equipped with inverters, whereas 24-48 V DC switchgears have power supplies with parameters in accordance with the station design. For protecting outgoing feeds, fused load break switches, e.g. NH, TYTAN II, circuit breakers or thermal fuses are used. Each outgoing track is led to the terminal block. Switchgears are equipped with measurement of current and voltage of each incoming feed. Meters can be located on switchgear door or inside the cabinet on masking panels. Switchgears are equipped with signalling and emergency circuits incorporated into the central signalling system.

RATING

EXAMPLE OF AUXILIARIES POWER SUPPLY SYSTEM BASED ON WIKING EQUIPMENT OF ELTEK COMPANY

DC guaranteed voltage switchgear with MPSU Flatpack2 modular telecommunications power unit

RDC 48 WIKING DC switchgear is a 48 V DC power supply. Depending on your needs, the switchgear is powered from one RGPW section with single- or three-phase voltage. Power station provides 48 V DC supply for telecommunications equipment into the grid station, and charges the batteries connected in parallel. RDC 48 can also be powered directly from the 220 V DC main battery, allowing it to work as a DC/DC converter. Switchgear can also be delivered with 24 V DC modules.

Comes with:

- MPSU Flatpack2 modular power station
- Flatpack2 rectifier modules
- Smartpack2 controller
- I/O modules

MPSU Flatpack2 power unit

Smartpack2 controller display

DC guaranteed voltage switchgear with modular rectifier IBF AC/DC Flatpack2

RDC 220 WIKING guaranteed voltage switchgear is a 220 V DC power supply. It supplies all of the grid station appliances that are designed to work at 220 V DC voltage. Its task is also to keep the BGPW batteries fully charged so they can provide 220 V DC supply for the appliances if 3x400 V AC network power supply fails.

Comes with:

- IBF AC/DC Flatpack2 modular rectifier
- Flatpack2 rectifier modules
- Smartpack2 Industrial controller
- I/O modules

IBF AC/DC modular rectifier

Basic characteristics of both switchgears:

- modular design
- N+1 to N+N redundancy
- hot-swap modules
- high efficiency
- high MTBF
- reliability
- low cost of ownership

CABINETS FOR ELECTRICAL SUBSTATIONS

**FR protection cabinets**

FR protection cabinets offered by ZPAS are indoor structures, designed for installing safeguards, control equipment, signalling equipment and instrumentation as well as control for MV and HV switchrooms.

FR protection cabinets are made based on SZE2 enclosures with dimensions 2000 x 800 x 600 or 2000 x 800 x 800 mm. Depending on customer requirements and equipment provided by the technical design, cabinet construction can be customized to individual needs – both in terms of dimensions and equipment.

A typical configuration of FR cabinets:

- glazed front door,
- symmetrical swing frame and mounting plate or a set of mounting profiles for installing devices behind the swing frame,
- access to equipment on one side or both sides,
- equipment protected by IP 30 masking panels,
- descriptions made as requested and according to standard of the facility which the switchgears are designed for,
- plinth with a height of 100 or 200 mm, solid or perforated.

Protection cabinets we make:

- Protection of 110 kV, 220 kV, 400 kV lines
- Protection of HV transformers
- Protection of coupler

Installed safeguards:

- Distance
- Differential protection
- Overcurrent protection
- Earth-fault protection
- Section protection
- Breaker failure protection
- Bus-bar protection

The standard protection cabinet configuration includes control gear and signalling equipment, instrumentation and control mounted on a symmetrical hinged frame as well as auxiliary relays, circuit protection equipment, power supplies, connectors for connecting external circuits, etc. mounted on a mounting plate or on mounting profiles inside the cabinet.

The cabinets are made with single-sided or double-sided access.

CABINETS FOR ELECTRICAL SUBSTATIONS

FQ meter cabinets

Meter cabinets are made on the basis of SZE2 enclosures. Depending on a project, their dimensions are 2000 x 600-800 x 600-800 mm. The typical configuration is the mounting plate. There is also a solution with a split mounting plate. Its upper part is then rotatable, and the lower part is fixed. The upper one is designed for installation of electricity meters, whereas the lower one for mounting measurement strips. There are also solutions with a swing frame. Electricity meters are then mounted on the frame, and the measurement strips on the mounting plate or the system of mounting profiles. Access may be one-sided or two-sided. Glazed door. Cabinet configuration is tailored to the station design and can always be adapted to the customer's requirements – both in terms of dimensions and equipment.

**Telecommunication cabinets**

FT and SUT telecommunication cabinets are made based on of SZE2 and SZB enclosures. Their dimensions are 2000 x 600 x 600-800 mm. The typical configuration includes front glazed door, a set of 19" mounting profiles in front and rear of the cabinet, equipment protected by IP 30 masking panels. Access is one-sided. Usually it houses equipment for collecting information on the state of the station, and transferring the information to the master system. Cabinet configuration is tailored to the station design and can always be adapted to the customer's requirements – both in terms of dimensions and equipment.

SUT telecommunication cabinet
on the basis of SZB enclosure

CABINETS FOR ELECTRICAL SUBSTATIONS

**FS wiring cabinets**

Wiring cabinets are made based on of SZD enclosures (see page 391) and intended for outdoor use. Electric instrumentation installed inside the cabinets is used for supplying power to and controlling drives of HV and MV power station switches as well as for transmitting data from measuring circuits.

As a standard, the plinth of the cabinet is equipped with a firescreen compartment. In addition, it is possible to deliver the cabinet in an option with a special concrete foundation.

The cabinet has a basic wiring system designed for:

- supplying power to the cabinet's circuits and transferring it to other cabinets;
- maintaining preset climatic conditions inside the cabinet to ensure correct operation of electric devices;
- providing a lighting system;
- supplying power to one- and three-phase maintenance sockets;
- installing electric gear inside the cabinet, as per customer's request and in accordance with specifications prepared for a specific facility.

The basic configuration of the wiring cabinet is made in conformance with assumptions typically adopted for wiring cabinets designed for HV and MV power stations and is available with or without sectionalisation of circumferential circuits.

The basic electric circuits of the cabinet are protected by means of RCCBs with overcurrent protection. The cabinet's heating is provided using two Cirrus 60 heaters, with a power output of 400 W each, controlled by means of a KTO 1140 thermostat with a control range of 0-60 °C. Heating is controlled automatically using the thermostat or manually, by means of a special switch located in the control panel. 40 W light fixtures, one on each side of the cabinet, are powered by door limit switches or manually, by means of a switch located in the control panel. The basic wiring system is designed for the operation in the TN-C-S power system. The wiring cabinet meets the requirements listed in the EN 60439-1 standard.

ELECTRIC SWITCHGEARS

**Switchgears up to 630 A**

Switchgears for currents up to 630 A are made based on our own enclosures and enclosures of all the companies on the market. Our own structures are based on the basic version of the power cabinets manufactured by ZPAS – i.e. SZE2 cabinets. These cabinets are made of single-walled steel sheet and powder coated. Modular equipment is installed on dedicated structure. Switchgears based on this design are featured with IP 30 safe-to-touch protection degree, and IP 64 in case door is closed.

These switchgears utilize 60 mm rails from Wohner, Hager, Eaton, equipment from ABB, Efen, ETI, Hager, Eaton, Schneider, Schrack, Siemens.

The switchgears have three distinguished assembly zones:

- busbar system zone (3 BMHs),
- apparatus assembly zone (8 BMHs in case of the cabinets 2000 mm high),
- cable entry zone (1 BMHs + 100 mm).

With such a switchgear construction, the cabinets 2000 mm high and 600 mm wide can contain modular instrumentation counting 288 units (18 mm), cabinets 800 mm wide – 432 modules, and cabinets 1000 mm wide – 576 modules, respectively.

SWITCHGEAR PARAMETERS:

Switchgear factory designation	RM 630
Primary rated voltage	400/230 V
Rated continuous current of the switchgear	630 A
Rated peak withstand current	14,7 kA
Rated short time withstand current	7 kA / 1 s
Rated frequency	50 Hz
Rated insulation voltage	500 V
Rated short duration power frequency withstand voltage	2,5 kV
Protection degree with the door open	IP 64

ZPAS Modular System - see page 320

ELECTRIC SWITCHGEARS

Switchgears up to 1250 A

ZPAS-NET manufactures switchgears for rated currents up to 1250 A based on the SZE2 and SZE3 enclosures of ZPAS company (see page 274, 320). These switchgears are used for power distribution and include panels for connecting air circuit breakers (incomer panel), moulded case switches and vertical and horizontal strip fused load break switches (outgoing panel). 1250 A switchgears passed type tests at Energopomiar – Elektryka Gliwice according to PN-EN 60439-1:2003+A1 2006.

SWITCHGEAR PARAMETERS:

Switchgear factory designation	SZE-2/SGP 1250
Primary rated voltage	400 V
Rated continuous current of the switchgear	1250 A
Rated peak withstand current	105 kA
Rated short time withstand current	50 kA / 1 s
Rated frequency	50 Hz
Rated insulation voltage	750 V
Rated short duration power frequency withstand voltage	8 kV
Protection degree	IP 54

- outgoing panel with vertical load switches

SZE-2/SGP 1250 electric switchgear
- outgoing panel with horizontal load switches

ELECTRIC SWITCHGEARS

Capacitor bank cabinets

Capacitor banks are used for compensation of the induction reactive power consumed in most cases by induction motors. The purpose of compensation is to reduce losses in transmission networks and induction power consumption, which lowers electricity bills. If your electricity bill shows for "electricity consumption beyond the agreed limit" an above-zero value to pay, then you should use capacitor bank. The higher this value is, the sooner capacitor bank will pay for itself. You can also use your electricity bill to select capacitor bank power. This should be done when the plant load was at the target level during the invoiced period. The bill also gives $tg\varphi$ - maximum in a given billing period. Capacitor bank power is determined from the formula:

$Q_{BAT} = P_{max} (tg\varphi - 0.4 + 0.1)$, where:

P_{max} = 15-minute maximum power read from the bill in kW,

Q_{BAT} = capacitor bank power in kVAr

To select the right power of a capacitor bank, you will also need type of power and level of voltage and current distortion. This information can be obtained through measurements. Type of capacitor bank is selected based on load variation rate and distortion level. A capacitor bank often pays for itself just after a few months. Since the lifetime of a properly selected unit is at least a dozen years, this is certainly money well spent, money that will come back to you even 20-fold. Installing capacitor banks does not require you to give notice to your electricity supplier, and does not increase active energy consumption.

When set up correctly, a capacitor bank works autonomously and automatically. It only requires periodic inspections (at least once a year) which involve dust removal and visual inspection of devices and current circuits.

ZPAS-NET produces two types of capacitor banks for automatic compensation:

1. BKZN basic version for networks with small harmonic interference of SH/ST < 25 %,
2. version with BKDZN protective chokes for networks with harmonic interference of SH/ST < 50 %.

For the production of banks we use Alpivar capacitors of Legrand. The capacitors are made with insulation class II in the housing made of self-extinguishing polyurethane resin. Each capacitor bundle is triple-protected by:

- self-extinguishing metallized polypropylene tape,
- electrical fuse,
- overpressure disconnecter.

The maximum allowable capacitor voltage is $1.18 U_n$, and the maximum allowable current is $1.5 I_n$. Operating temperature $-25/+55$ °C. Capacitors have internal discharge resistors with discharge time of 3 min. Alpivar capacitor loss power is 0.3 W per 1 kVAr.

The capacitor banks we produce are automatic; thus, switching on individual capacitor stages is done via electromechanical contactors controlled by Alptec power factor controller. Cabinets are equipped with compensation panels and have the typical and uniform dimensions, which simplifies installation and expansion of the cabinets.

Our range of capacitor banks is presented in the tables below; however, we also create tailored-made configurations.

ELECTRIC SWITCHGEARS

Automatic transfer switch system

Automatic transfer switch (ATS) devices are used to increase supply reliability for important takeoffs. Their task is to detect excessive decrease or loss of the primary power supply voltage and switch to backup power.

There are ATS systems with overt and covert backup. In ATS systems with overt backup, after detecting primary power failure, reserve power switch is turned on, whereas in systems with covert backup, breaker switch of the coupler.

In terms of ATS operation time, one can distinguish:

- slow ATS devices with a sufficiently long time of operation (above 0.4 s) to suppress residual voltage of rundown motors,
- fast ATS devices with a sufficiently short time (below 0,25 s) to prevent too large difference between vectors of the mains voltage and residual voltage.

There is short ATS cycle when excitation takes place from the moment of opening the primary power switch, and full ATS cycle when excitation takes place from the moment of voltage loss for the primary power supply.

ATS devices are usually installed in auxiliaries networks of utility power plants and industrial power plants, industrial switchrooms that power important takeoffs, as well as in power grid switchrooms.

OUR PROPOSALS

Controller-based ATS systems

We also offer you controller-based ATS systems. We use controllers of most companies present on the market. ATS system status is visualised on control panels, matrix panels and on panels lined on the switchgear door. In the controller version, the ATS system can perform any type of ATS and any switching scenario. Acting on the ATS system status can be performed using switches located on the switchgear door, as well as the touch control panel.

Example of a controller-based ATS system with touch panel, matrix panel and lined panel

ELECTRIC SWITCHGEARS

ATS systems based on dedicated control panels

We also offer you precise ATS systems based on dedicated control panels for specific cases, network-to-network, network-to-generator, etc. These panels are designed for installations where power reliability is essential. These panels have high measurement accuracy and are highly reliable.

ATS system for multiple incoming feeds, based on the control panels of Energotest-Energopomiar, made for the Wielopole power station

Relay-based ATS systems

We offer you slow relay-based ATS systems in network-to-network version in overt or covert backup configuration, and a network-to-generator for overt backup. Our ATS system can control both contactors and circuit breakers equipped with motor drives, and can be supplied with or without them.

Installing the system is possible in two variants:

- on the mounting plate (e.g. in SWN cabinet made by ZPAS or in any switchgear that has enough space on the plate),
- on 19" frame using a PS-3U panel made by ZPAS.

The systems provide for signalling the presence of voltage across individual power lines and signalling current power line that is supplying takeoffs. Supply is switched from the primary power supply to the backup and then returns to the primary one, once the set delay time has elapsed. The delay is set separately for backup switching and return switching. Switching to backup network or power generator supply is triggered by voltage loss in the primary network or voltage asymmetry in at least one phase of the primary network. For the network-to-generator configuration, also UPS is provided to power the devices that control the ATS system in the event of voltage loss in the primary power supply (in the version where the system is integrated with the PS-3U panel, UPS is not installed inside the panel).

Relay-based ATS system mounted in a cabinet

CABINET PREFABRICATION

Control cabinet made according to the Customer's design

All enclosures manufactured by ZPAS-NET (made of aluminium profiles) and ZPAS S.A. are provided with electrical equipment according to in-house designs or solutions developed by other design offices according to customers' specifications. We also offer prefabricated products based on generally available enclosures supplied by other manufacturers.

We deliver switchgear, control cabinets, cross-connection cabinets, wiring cabinets, metering cabinets, automatics cabinets and, in cooperation with ZPAS S.A., a complete range of power engineering structures for any application in line with our customers' wishes. In addition to SZE-2/SGP 1250 and SZEW/PE 1600 types, we also manufacture switchgear based on equipment and enclosures supplied by Hager, Moeller, Schrack, ABB and Siemens, for max. 2500 A.

For our switchgear we manufacture input, coupling and output bays with stationary and withdrawable circuit breakers, with knife switches and fuse switches (the latter offered in box and strip versions), as well as horizontal and vertical terminal bays. We deliver output bays equipped with contactors and inverters. We build multipanel switchgear with guaranteed power supply, equipped with SZR systems (in relay and controller versions). We manufacture control cabinets equipped with controllers used for supervising manufacturing processes. We use controllers supplied by Siemens, GE Fanuc, Wago, Beckhoff, Phoenix Contact and other types.

We provide cabinets dedicated for power distribution purposes which can be used in the following applications: cross-connection cabinets, wiring cabinets, control cabinets, lighting cabinets, battery cabinets, protection cabinets, telemechanics cabinets, central signalling system cabinets, metering cabinets, etc. We also offer telecommunication cabinets accommodating telecommunication equipment, provided with a power supply system, ventilation, heating and signalling systems to notify access status, power supply and climatic conditions. The products are made using SZD-type outdoor enclosures. SZD enclosures are also used in the manufacture of wiring cabinets for electric power stations. As a result, the enclosures have a long operating life and optimum climatic conditions for electrical devices, which increases their efficiency and reliability.

We offer equipment for power cabinets for all industries and various types of applications: from power distribution switchgear or wireless power supply solutions, through power supply to motor-driven consumers complete with production process automation, to control cabinets, signalling cabinets, wiring cabinets, etc., with traditional control systems or controllers, with visualisation of manufacturing/technological processes using mimic boards (by our own production) and screen displays. In our power systems we use equipment offered by the majority of European manufacturers, depending on our Customers' preferences, including Apator, ABB, Moeller, J. Müller, Legrand, Hager, Schrack, Schneider, GE, Pokój, Phoenix Contact, Wago, Weidmüller, Dehn, Relpol, Finder and many more.

We always make sure that our products are state-of-the-art, reliable and perfectly safe. As part of our ongoing commitment to client satisfaction, we are pleased to implement any solutions suggested by our Customers.

REFERENCES FOR DISPATCH AND CONTROL DESKS

We have thirty years' experience in the production of control and dispatch desks. Throughout the years, we have manufactured hundreds of them. Our desks are mainly designed for power plants, heat and power generation plants, power distribution companies, sugar factories, integrated mills, railway companies, cement plants, chemical plants, gas works, coking plants, hard and brown coal mines and many other sectors of industry and business.

Our product portfolio includes universal modular desks and consoles made on special orders according to the customer's documentation or design developed by us. The product range also incorporates a series of types of standard PSL control desks with a modular design, intended for production lines, tooling centres etc. Each console may be delivered together with complete electric equipment and accessories. Assembly on site is also available on request.

SAMPLE COMPLETED PROJECTS

- **ABB**
Gas compressor plants in: Kondratki, Włocławek, Ciechanów, Szamotuły, Zambrow; Gas mines in: Dzików, Wilków, Kuryłówka, Palikówka, Tarnów; Heat and power generation plants in: Gorzów, Jaworzno III (blok 6), Zgierz, Władysławowo, Siekierki, Turów, Gdańsk, Rokita, Będzin

operation dispatch room; control room of the carburisation section in the heat and power generation plant in Katowice
- **Zespół Elektrowni Wodnych Niedzica (hydroelectric power stations)**
control rooms for the power station's blocks
- **Zielonogórskie Kopalnie Surowców Mineralnych S.A. (a mining company)**
- **ZSA MERA – PNEFAL Sp. z o.o. - Warsaw**

GENERAL DESCRIPTION OF DESKS

In the area of control and dispatch desks, ZPAS-NET mainly offers products with shape and functionalities adjusted to the needs of a particular facility in which they are to be installed. Such consoles are manufactured according to the documentation supplied by the customer or prepared by our design department. Quite often our consoles are a part of complex orders incorporating matching electrical accessories, mimic boards and on-site assembly.

Because of their round-the-clock use, our desks are made of top-quality materials which guarantee high durability and visual attractiveness. To this aim, our designers co-operate with design offices, architects and ergonomics specialists.

CONTROL DESKS DESIGNED FOR INDUSTRIAL FACILITIES

Control desks can be made entirely of sheet steel. Console shape and dimensions should be tailored to a particular facility and appliances in accordance with customers' individual needs and requirements.

DISPATCH AND DISPATCH/CONTROL DESKS

In the case of dispatch or dispatch/control desks which also perform a function of an operating workstation, the design comprises a base, a desktop, and – if necessary – additional tops.

Desktops are made of a wide range of materials, from wood-like boards to synthetic materials – depending on particular needs and standard requested by the customer. In simple designs which do not call for an application of expensive technologies, double-sided laminated or MDF boards are typically used, in a wide range of colours of the finishing laminate elements. Acrylic materials, such as Paracor or Corian, enable a wider range of applications.

Desktops can also be made of mimic panels which allow quick and easy changes of visual matrix diagrams and arrangements of installed instruments.

Desktops can be equipped with tops of various shapes and dimensions making it easy to install monitors, push buttons, meters, displays or other types of devices.

COLOUR SCHEMES

Metal elements of consoles can be painted, galvanised or made of plain stainless steel, without any extra surface finish. We use epoxy and polyester powder paints, textured, in all colours from the RAL catalogue.

DESIGNS AND PRESENTATIONS

SAMPLE CONFIGURATIONS OF DISPATCH ROOMS

With our experience in industrial design, ergonomics and interior design, we are able to built complete dispatch centres, including desktops and video walls, from designing and preparing graphic presentations through manufacturing and on-site installation.

For examples of dispatch centres see pages 477-479.

PDM DISPATCH AND CONTROL DESKS

GENERAL DESCRIPTION

The new line of dispatch and control desks produced by ZPAS-NET is based on an innovative design approach incorporating a modular structure.

The main assumption in the process of designing new modular desks was to develop and define a standard which – due to its modular construction – would enable a wide range of available combinations of system elements.

This solution, compared to traditional one-piece designs, costs less and can be delivered to the end customer within a shorter time. Now a potential customer can choose between a number of standard modules which – assembled together – make up the finished product.

An appropriate selection of elements makes it possible to adjust desktop colour to the overall colour scheme of a given room or to specific customer requests.

Moreover, the structure itself, based on a central frame, makes it possible to use different finishing materials, which gives customers a possibility to choose between more economical and more luxurious versions.

In terms of industrial design, the main idea of new modular consoles is based on the development of several interchangeable elements marked by innovative shape and construction properties.

Modular structure enables to adjust consoles to virtually every dispatch/control room.

PDM DISPATCH AND CONTROL DESKS

COMPONENTS

**PC module**

A two-tier 19" cabinet designed for installing the central unit of the system or other types of electronic devices. The upper part of the cabinet is used as a support for the operating desktop, while the lower (rear) part is designed for placing monitors. Two PC modules are designed for one workstation.

**Cylinder with 8 drawers**

A central unit which makes it possible to arrange sets at any desired angle.

It can be connected to:

- the PC module,
- the shield joining the cylinder with the PC module

**Half-cylinder with 4 drawers**

A side element for closing the set.

It can be connected to:

- the PC module,
- the shield joining the cylinder with the PC module,
- the other half of the cylinder (central module)

**15° wedge**

The wedge enables bending sets by 15°. If more than one wedge is used, then the bending angle can be increased.

It can be connected to:

- the PC module

**Side wedge**

An end element (without drawers).

It can be connected to:

- the PC module.

PDM DISPATCH AND CONTROL DESKS

COMPONENTS

Rear shield

A shield for covering the rear space between the cylinder and the PC module.

It can be connected to:

- the PC module,
- the cylinder as the central element of the console

**Desktops**

Desktops, sides, tops and other elements of consoles can be made of modern synthetic materials - depending on customers' needs and the required standard. Given the fact that they are used round-the-clock, consoles must be made of high-quality materials ensuring long durability and visual attractiveness.

Desktops of the proposed modular control and dispatch desk are made of the following materials:

- Chipboard, laminated on both sides, with edges protected by PCV strip matching the colour of the desktop.
- MDF board, laminated, with increased resistance to abrasion, with edges protected by PCV strip matching the colour of the desktop.
- Modern synthetic materials, for example Paracor/Plexicor, Corian, SSV

PDM DISPATCH AND CONTROL DESKS

OVERALL DIMENSIONS OF COMPONENTS

An appropriate configuration of the typical components described above allows to create a virtually unlimited number of operator workstations.

STRAIGHT-LINE DOUBLE-STATION DESK

SINGLE-STATION DESK

- PC cabinet (width x height x depth): 750 x 600 x 600 mm; operational height of the PC cabinet: HU = 10 U (U = 44.45 mm)
 - Central cylinder: d = 1200 mm, h = 730 mm
- Other dimensions are specified in the drawing. Based on overall dimensions, it is possible to configure consoles according to customers' specific needs, intended applications and room dimensions.

PDM DISPATCH AND CONTROL DESKS

Single-station desk

Straight-line double-station desk

Arch-shaped single-station desk

"Broken-line" double-station desk

SAMPLE CUSTOMISED PROJECTS

Single-station desks

Desks made up of standard 19" metal cabinets, a side element and an MDF board desktop with increased mechanical resistance and quality.

Furniture control desk

The product consists of a metal supporting structure, as well as desktops and cupboards made of laminated chipboard. The sides of the desk are equipped with covers. In the back section there is a computer shelf and cupboards with sliding doors.

SAMPLE REALISED PROJECTS

Regional Power Dispatch Facility in Wrocław

A PDM-type modular control desk installed in the medium-voltage dispatch room.

Regional Power Dispatch Facility in Wrocław

An ARCUS-type modular control desk installed in the low-voltage dispatch room.

PDM modular desks installed at the Plant Dispatching Centre in Wrocław

SAMPLE REALISED PROJECTS

Regional Power Dispatch Facility in Katowice

A set of dispatch/control desks made according to an original architectural design. The scope of delivery also included a mimic board which is seen at the back of the photograph.

Control desk supplied to GAZPROM Russia

A set of dispatch/control desks made according to an original architectural design. The operating part of the desktop is made of Corian, while the narrower rear part is designed for installing LCDs.

SAMPLE REALISED PROJECTS

**“WARTA” S.A. waste treatment plant
in Częstochowa**

Desk made according to an original architectural design.

MODERN ACRYLIC FOR DESKTOPS FINISHING

Desktops, sides, top segments and other elements of control desks can be made of modern materials such as Corian, Staron or HI-Macs.

- The materials are acryl-mineral composites which are excellent for producing solid and hygienically clean surfaces. Manufactured in the form of boards, they provide a variety of colours with different shades and patterns. Desktops are usually made of boards 6 mm thick.
- Their homogenous structure can be easily cut, milled, planed, drilled, shaped and connected at will to meet specific requirements, which makes it possible to realise even extremely complicated projects.
- All joints and connections are made with two-ingredient glues, mixed in appropriate ratios at a temperature not lower than 15 °C. Gluing durability is at least 30 MPa.
- Corian, Staron and HI-Macs materials are pleasing to the touch and they feel warm. Their smooth surface makes them very easy to clean.
- They do not absorb odours or liquids, nor they attract static electricity. There are no contradictions as to their contact with food. They are classified as fire retardants.
- They are resistant to the majority of chemical agents, high temperatures and mechanical damage (cracks, scratches). Any signs of wear and tear can be easily removed without a trace.
- A wide selection of more than forty colours and textures (pastel, uniform, grainy or striated) offers exceptional design and production possibilities.

Desktop cover with Corian type material and Copper strip used for reduction of electrical tention.

Sample realised projects	462
Comprehensive control room projects	477

GENERAL DESCRIPTION OF MIMIC BOARDS

Mimic panels allow to graphically represent technology processes, diagrams of power networks, water supply and distribution network, gas grids, plans and other individually arranged solutions. With the application of modern, complex and automated technologies, mimic boards serve as a visualisation tool effectively supporting control and management processes. Thanks to the use of modules incorporating light components, it is possible to instantly visualise expanding and changing processes and to reflect the operating condition of devices by means of LED signalling with an option of control from front panel devices.

ZPAS-NET is a leading producer of dispatch mimic boards in Poland. Mimic matrix boards are mainly produced for the power sector, for electric power stations, heat and power generation plants, sewage treatment plants, the mining industry, chemical industry, water supply systems, monitoring systems of industrial facilities, etc. Virtually all local and regional power dispatch centres in Poland are equipped with our mimic boards.

Assembly and commissioning of mimic boards at customers' facilities are performed by teams of specialists. Our experts also expand, modernise, develop and modify existing boards. We offer quick and continuous maintenance services. ZPAS-NET keeps abreast of changing market requirements, launching innovative solutions dictated by emerging needs related to the visualisation of power networks and industrial processes.

Mimic boards are available in two dimensions:

STM, with 25 x 25 mm raster, and DTM, with 24 x 24 mm raster.

DTM boards are perfectly suited for incorporating analogue indicators without the necessity to use additional covering elements. The basic lighting components of mimic boards are LED modules (with one or many LEDs). There are also other elements fixed in the board's surface, including pushbuttons, switches, controllers, digital displays, analogue and digital meters, signal boxes, analogue and digital clocks, monitors, visual screens, etc. Updating and changing of board images is quick and easy thanks to special caps placed on the frames.

Self-latching caps used in the DTM and STM systems allow for expansion according to individual needs. The matrix surface takes one of four forms: straight, radial (polygonal), broken-type and cabinet-type (wall-mounted). Thanks to specially profiled edges, it is possible to finish boards without visible divisions between individual panels. Cicolac, the material used to make board panel elements, is highly flexible, extremely resistant to temperatures and lightweight. In addition, it has hygiene and fire retardation certificates issued by Polish Scientific Institutes. The material makes it possible to obtain products which are very resistant, flexible and visually attractive. Mimic boards with diagrams are easily adjustable and expandable depending on user needs; flexibility is the main advantage of the design offered. All clean caps can be inserted quickly and easily into any point on the board. Panels with devices and caps can be easily installed in control desks, rotary frames and control cabinet doors.

Brown coal mines: Adamów, Bełchatów, Sońnica, Turów...
- **SUGAR FACTORIES**
Lublin, Łubna, Opole, Opole Lubelskie, Ostrowy, Ropczyce, Włostów, Wrocław...
- **MONITORING BOARDS**
Swimming pool in Gostyń, National Library in Warsaw, Renaissance Tower building in Warsaw, Polish-German Federation building, Polkomtel building, ELPRO in Berlin, Hotel Port Okęcie, Hotel Poznań, Hotel Zakopane, Huta Zawiercie (a steel plant), KDM in Warsaw, Okęcie Airport in Warsaw, Wrocław Airport, PFC Poznań, Supreme Court in Warsaw, Telekomunikacja Polska S.A. in Warsaw.
- **POWER DISTRIBUTION BOARDS**
PKN Orlen (crude oil refiner)

DESIGN OF MIMIC BOARDS

FREE-STANDING BOARDS

Flat board
 - with evenly aligned segments
 - flat front panel

Arch-shaped board
 - segments arranged tangentially to the board's arc
 - front panel profiled according to the board's arc
 - minimum radius of the arc $R = 6500$ mm

Broken-line board
 - segments arranged at an angle $n \times 15^\circ$
 - flat front panels of segments, connected by means of angle connectors

Mimic board in the shape of a triple arm stand

Designed specifically for small control rooms or dispatch centres where, due to inadequate space or for reasons of economy, it is not possible to put up a simple or split structure. The mosaic of the board is mounted on each arm of the star shape. Boards made in this version require at least three operators.

Double-sided board

Designed for small control rooms or dispatch centres. The mosaic of the board is mounted on both sides of the structure (in the front and at the back). Boards made in this version require at least three operators.

WALL-MOUNTED CABINET-TYPE BOARDS

DESIGN

- 1. Frame
- 2. Fixing brackets
- 3. Gas shock-absorber
- 4. Front section with a matrix panel

ELEMENTS OF THE SUPPORT STRUCTURE OF FREE-STANDING BOARDS

DESIGN

1. Lower frame
2. Upper frame
3. Angle sections
4. Connecting rails
5. Front channel section
6. Connecting sections
7. Mounting brackets
8. Truss panel made of plastic frames with 24 mm or 25 mm grid units (material: Cyclocac plastic)
9. Aluminium roller shade
10. Side cover
11. Pins
12. Feet

MATRIX ELEMENTS OF MIMIC BOARDS

Matrix boards are available in two systems:

- DTM 24 x 24 mm, made of M24 and M12 modules,
- STM 25 x 25 mm, made of M25 and M12,5 modules.

M24

M25

M12

M12,5

FRAME

An element of the self-supporting board structure, forming the central frame of the board's front panel into which caps are inserted.

FIXING CATCH

Mounted inside the frame, used to fix the board to the support structure.

M12

M12,5

M24

M25

FRAME EXTENSION

Mounted inside the frame, designed for cap fixing.

CABLE BUNDLE SUPPORT

An element cooperating with the clip, protecting conductors extending from the lighting modules in the rear section of the board.

M24

M25

M24

M12

CLIP

An element used to fix cable bundles on the inside of the front panel. An element cooperating with cable bundle support.

M25

M12,5

CAP

An element forming the front section of the board, featuring matrix elements plotted by screen printing.

MATRIX ELEMENTS OF MIMIC BOARDS

**LED CONNECTOR**

Used to fix LEDs via single-roll strips to the exclusion of PCB.

**FRAME**

Used to mount various meters and other devices on the board's front panel.

**M24****M25****PCB HOLDER**

An element used to fix the PCB in the frame.

SIDE COVERING PANEL

Fixed on the external side walls of the board's frames.

**ILLUMINATED ELEMENTS**

Mounted in caps. Designed for the diffusion of light emitted by LEDs.

**ANGLE CONNECTOR**

Used for joining elements of the board's front panel at an angle.

The signalling elements in STM and DTM mimic boards are LEDs. In order to ensure high effectiveness of visualisation, high-luminosity LEDs are used. A variety of LED types and dimensions are employed, depending on particular signalling requirements, e.g. red, green, yellow, blue, single- and multi-colour.

Upon customer request, LEDs are equipped with current-limiting resistors, separation diodes or other matching circuits depending on the type of controller used. Within the matrix, LEDs can be extended to the terminal strips, terminal plates or plates with ends adjusted to a particular controller type.

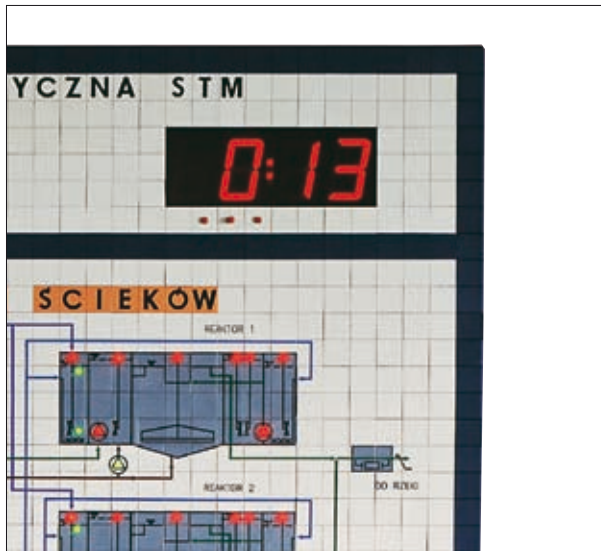

DEVICE ASSEMBLY

ZPAS-NET mimic boards offer a possibility of installing meters, indicators, displays, switches, controllers, etc., however in consideration of the fact that customers use a wide variety of different devices, their installation in the mimic boards is always tailored to individual needs and requirements.

Since the majority of devices is designed for assembly on thin front panels made of sheet metal, some devices must be provided with special clamping rings or support brackets (particularly if the weight of a given device may cause front panel deformation).

If the dimensions of a device do not correspond to a multiple of the board's module, we offer a range of adaptor elements which allow for construction of a special frame helping to adjust the device to the module. Controllers and switches are usually mounted by means of adaptor plates with front sections covered with the same surface patterns as the front sections of the boards. Details concerning installation methods are individually agreed with the customer.

FRONT PANEL COLOUR SCHEMES

NOTE:

The background colour of the board can be freely selected, however on account of proven ergonomic properties, the following colours are recommended:

grey

light green

beige

KSD SIGNAL BOXES

KSD-type signal boxes are designed for signalling status of the facility. They are mounted in matrix frames; caps of the signal boxes are flushed with the surface of the front panels of STM boards and control desks. Sets of signal boxes enclosed in aluminium frames can also be fixed in metal, wood-like or other plates (e.g. cabinets, desktops and top segments).

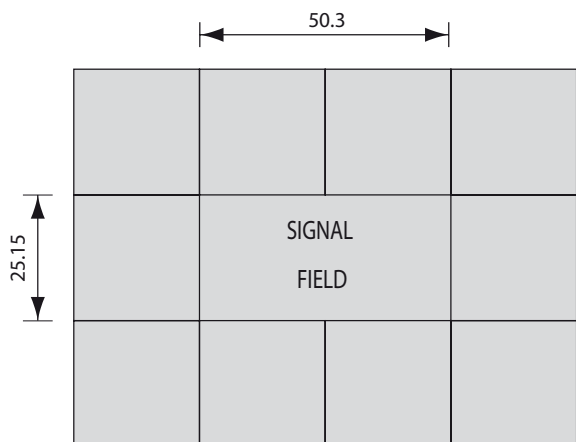

TECHNICAL DATA

- Control voltage 18-24 V DC
- Power consumption..... ca. 80 mA
- Colour of illumination red, green, yellow
- Dimensions 50.3 x 25.15 mm
- Outlets rack and panel connector, terminal strip or other types, based on individual arrangements

DESIGN

Each box incorporates three basic elements: a main body, a LED plate and a cap (non-transparent white). The surface of the cap has an inscription, sign or symbol plotted by screen printing or engraved. Another possibility is the use of transparent caps with inscriptions made on mat film or tracing paper placed underneath. Signal boxes are made as single units or in multiple sets in any configuration.

KCS-1 CENTRAL SIGNAL BOX

KCS-1 central signal box with accessories. Central module of the box, relaying strip, indirect strip, power unit and sound signalling buzzers are installed on the TS-35 rail; control buttons and KSD signal boxes (visual signalling) are extended to a sample element of the front panel of the matrix board.

KCS-1 central signal boxes are complete central audiovisual signalling systems designed for power industry applications or other industry sectors. The main task of central signal boxes is to inform the operating staff of an electric power station, a switching station or a production process control unit of the actuation of protective devices, breakdowns or irregularities in the operation of equipment and other undesirable events. Thanks to their modular structure, KCS-1 boxes enable operators to control any number of input channels.

The central module of each box is provided with in-built programming functions (individually for each channel):

- emergency function with memory and delay time,
- repeater function (signalling device),
- function of engine or pump operation control,
- NOT-operation function of the input status,
- buzzer activation and deactivation,
- protection against accidental information deletion,
- blackout detection,
- interference removal system.

Input signals include voltages fed to relay coils, monitoring the achievement of boundary values of technical parameters, the flow of operating media, engine or pu

Input signals:

- **sound signalling** – two piezoelectric buzzers placed directly on the TS-35 strip next to the central unit and NO-contacts of relays (with an option of connecting an additional warning horn or buzzer).
- **visual signalling** – KSD signal boxes designed for mounting in the front panel of the matrix board. Sets of KSD boxes, placed within an aluminium frame, can also be installed in 19" panels, in dispatch desktops or tops. As independent elements, they can be used in the so-called distributed signalling systems.

COMPREHENSIVE CONTROL ROOM PROJECTS

Bełchatów DIRE Control Room

In November 2011, on behalf of Energotest Sp. z o.o., ZPAS-NET Sp. z o.o. finished the project "Modernization of non-unit switchrooms Econtrol – comprehensive modernization of the DIRE control room" (gross value – PLN 2 127 214.00).

According to the order, ZPAS-NET was expected to deliver materials and equipment, carry out all required works and provide the agreed as-built and take-over documentation (test, trial and check reports). The deliveries and works included:

- a) constructing and fitting out control room and employee welfare rooms:
 - rebuilding the walls and changing the location of the door,
 - delivery and installation of window and door joinery,
 - making new façade finish,
 - delivery and installation of Gustafs wall panels,
 - delivery and installation of suspended ceilings,
 - delivery and installation of furniture (office, kitchen, lounge),
 - delivery and installation of sanitary system.
- b) Delivery, installation and commissioning of the access control system.
- c) Delivery, installation and commissioning of aerial satellite and radio television.
- d) Delivery, installation and commissioning of lighting fixtures, including DALI system.
- e) Delivery, installation and commissioning of mechanical ventilation system and air conditioning.
- f) Delivery and installation of matrix board.
- g) Delivery and installation of dispatcher control panel, including electrical equipment and phone wiring system.
- h) Delivery of wiring, and installation and commissioning of the entire system (power supply, IT network).

As part of the task, we also conducted all the necessary tests and examinations.

COMPREHENSIVE CONTROL ROOM PROJECTS

National Power Dispatch Centre (KDM)

In February 2009, ZPAS-NET completed the project consisting of the provision of equipment to dispatching centres at the main seat of PSE-OPERATOR in Konstancin-Jeziorna. The scope of works included design, architecture, interior layout and equipment, as well as technical infrastructure (structural wiring, process power supply, voice communication systems, IT network systems and visualisation systems). Works were carried out at three dispatching centres:

- KDM – National Power Dispatch Centre,
- CNOS – Control Centre for Network Facilities,
- CNOT – Control Centre for ITC Facilities.

Architectural solutions employed at KDM are also worth noting. The colour scheme adopted for the interiors, incorporating a dark blue dispatching panel (the dominating feature), uses sea green wall panels and malachite green Corian finishing elements of window sills and dispatching desks, to create a distinctive ambience of the facility, referring to the interiors of the Nautilus, a Captain Nemo’s ship.

Technical solutions adopted for audio and video signal transmission, keyboard, mouse and USB are based on KVM extenders. Dispatching system workstations are accommodated in technology cabinets located in server rooms. Dispatching stations and terminals are interconnected using multi-mode optical fibers. The solution helped achieve extra free space in dispatch desks and increase the comfort of work by reducing noise and temperature levels.

Visualisation: Krzysztof Dracz

COMPREHENSIVE CONTROL ROOM PROJECTS

Electric power station in Opole

In December 2010, ZPAS-NET completed a project comprising the supply and assembly of technical equipment and interior design elements for the central control building at PGE Elektrownia Opole. According to the order, ZPAS-NET was expected to deliver materials and equipment, carry out all required works and provide the agreed as-built and take-over documentation (test, trial and check reports). The deliveries and works included:

- fitting out and providing equipment for staff facilities,
- supplying the power generator, UPS and switchgear complete with cabling – uninterrupted power supply comprising two primary power supply circuits in the 19" industrial version and modular inverter (output power 90 kVA),
- supplying a video wall and large-size screens:
 - 10-screen DLP video wall (10 modules of 50" LED displays) with a total resolution of 7000x2100,
 - LCD monitors CD 46",
- delivering racks and server cabinets complete with cabling,
- delivering control desks, support frames and furniture,
- delivering monitors, computers, printers and similar equipment:
 - LCD monitors 46",
 - LCD monitors 24",
 - LCD monitors 21",
 - video signal amplifier KVM,
- delivery of cables, assembly and commissioning of the equipment.

During the implementation of the main project, ZPAS-NET completed another order for Elektrownia Opole:
 – "Communication system for blocks 1-4 supporting the transmission of signals from the blocks to the mimic system in the Central Control Room at PGE Elektrownia Opole S.A."

MULTIMEDIA KIOSKS

480-507

Info kiosk design	482
Special features of ZPAS multimedia kiosks	483
SIRIUS multimedia kiosk	484
TAURUS multimedia kiosk	486
VENUS multimedia kiosk	488
CETUS multimedia kiosk	490
SMART wall-hung multimedia kiosk	492
SMART wall-standing multimedia kiosk	494
SMART free-standing multimedia kiosk	496
Optional multimedia kiosks components	498
Examples of infokiosk applications	505

INFO KIOSK DESIGN

The multimedia kiosks are housed in enclosures which are highly resistant to damage. The inside part of the info kiosks is equipped with cooling and heating systems, as well as surge protection. The housing is made of suitable materials, fully protecting the devices and wiring inside against unauthorised access. Info kiosks designed for outside applications are provided with a high degree of leaktightness, so that no humid air or precipitation is able to penetrate inside the kiosk and damage the computer equipment. The special design of info kiosks makes it possible for people in wheelchairs to use them.

According to standards observed in products of this type, info kiosks are operated using a touch screen. All the hardware parameters of the computer and monitor are customised to meet customer's requirements. A standard version of the info kiosk is provided with a LCD panel, stereo speakers and a Nettop computer with excellent technical parameters.

Optionally, the kiosk can be operated using a special vandal-proof keyboard with an extra trackball option.

On the ZPAS Group website you can find multimedia kiosk configurator that allows you to configure the kiosks included in our standard offer.

Since ZPAS is a manufacturer, not a distributor, of info kiosks, it is possible to order equipment with any monitor size and non-standard enclosure types.

SPECIAL FEATURES OF ZPAS MULTIMEDIA KIOSKS

1. Stainless steel sheet housing, powder painted with a structural paint. Outdoor kiosks are painted with façade and UV-resistant paint.
2. The Infokiosk housing is covered by a 5-year warranty.
3. The electronic components are covered by a 2-year warranty.
4. Vandal-proof construction.
5. 19" vandal-proof SAW or IR overlay.
6. Rounded, safe edges.
7. Software that allows the user to define a start site that will be displayed upon the Infokiosk start-up. When idle, the software will automatically return to the start site. The start site can be saved on the local drive of the device and the user can select any website for this purpose.
8. Displaying websites, including the start site, that contain all state-of-the-art technologies used on the Internet, by means of the installed Internet browser or dedicated software. Should new technologies appear, the browser can be updated free of charge.
9. Defining settings that influence the security of the Infokiosk's operation (blocking cookies, movies and VB or Java scripts).
10. The devices include software that allows to update the content displayed within the Infokiosk.
11. The kiosk content can be remotely updated without interrupting its operation.
12. Defining Internet websites that can or cannot be accessed.
13. A selection of applications (*.exe files in Windows system) which the user can run by pressing a selected key.
14. Possibility of using a screen saver, also in the form of a slide or video show. After a given time of idle operation, an application will close all open windows, delete temporary Internet files, clear browser history and start displaying selected websites. Touching the screen, moving the mouse or pressing a key on the keyboard will stop the show and display the start site.
15. Hiding the menu bar.
16. Safe operation of the Infokiosk is ensured by:
 - a) the possibility of setting the maximum resolution of the screen.
 - b) the possibility of blocking critical Windows shortcuts, such as CTRL+ALT+DEL, Windows-Logo, ALT+TAB, Shift+F10, CTRL+ESC, ALT+ESC
 - c) system monitoring in terms of memory capacity. If memory is too low, the system is restarted in order to ensure proper operation of the device.
 - d) system monitoring (WatchDog software), which controls the operation of the management software and, if necessary, reinitializes it.
17. Infokiosk operation by means of a touch screen. Screen keyboard software available for Infokiosks without external keyboards.
18. An application that automatically closes windows working in the background or windows that are found idle.
19. Limited access to settings and configuration - password protection.
20. Automatic shut-down at a defined hour.
21. Camera support - optional.
22. Registering user activity and generating statistics.
23. Displaying homepage with the possibility of display settings modification (three modes available: static – bmp, animated – flash, full screen – a website displayed on the whole screen with the possibility of quick return e.g. by means of a home button at the bottom).

SIRIUS MULTIMEDIA KIOSKS

- Designed for use indoors. However, you can adapt the kiosk for outdoor use.
- In the wall-mounted housing with a high resistance to damage.
- The ideal solution in areas where there is no possibility of using a free-standing kiosk.
- Access to the inside part of the info kiosk through the openable front frame, closed with a lock.
- The inside part is equipped with cooling and heating systems, as well as surge protection.
- Operation via touch screen or keyboard with trackball.
- Wide range of accessories: Wi-Fi adapter, camera, UPS, barcode reader, etc.
- Operating system: Windows 7 Professional or Windows 7 Home Premium, other system available on customer's request.
- Kiosk colour tailored to the needs of the customer.
- Customised kiosk design in line with the needs of the customer.
- Dimensions (Height x Width x Depth):
 - without keyboard - 640 x 533 x 200 mm
 - with keyboard - 640 x 533 x 269 mm

SCOPE OF DELIVERY

- housing,
- nettop computer,
- 19" monitor,
- service mouse,
- service keyboard,
- 19" SAW touch overlay and/or vandal-proof keyboard with or without trackball,
- speakers,
- Kiosk Application for configuring a kiosk and monitoring its functioning to ensure proper operation,
- additional equipment on customer's request.

- It has a masking panel that can be painted or veneered according to customer needs.
- The inside part is equipped with cooling and heating systems, as well as surge protection.
- Operation via touch screen.
- Face of the infokiosk has a space for your ad or logo, and can also feature LED backlight.
- Wide range of accessories: Wi-Fi adapter, webcam, UPS, etc.
- Operating system: Windows 7 Professional, Windows 7 Home Premium or any other you choose.
- Masking panel made according to your needs.
- Infokiosk can be tailor-made if requested.
- Dimensions (Height x Width x Depth):
1740 x 654 x 81 mm

SCOPE OF DELIVERY

- enclosure,
- nettop computer,
- 21" monitor,
- service mouse,
- service keyboard,
- 21" touch overlay,
- speakers,
- infokiosk software,
- additional equipment at customer request.

WALL-STANDING MULTIMEDIA KIOSK **SMART**

SMART FREE-STANDING MULTIMEDIA KIOSK

- Designed for indoor applications.
- Enclosure with high damage-resistance.
- It has a masking panel that can be painted or veneered according to customer needs.
- The inside part is equipped with cooling and heating systems, as well as surge protection.
- Operation via touch screen.
- Face of the infokiosk has a space for your ad or logo, and can also feature LED backlight.
- Wide range of accessories: Wi-Fi adapter, webcam, UPS, etc.
- The infokiosk front plate is inclined at an angle of 85° relative to the floor.
- Since it is possible to screw in a side module, you can have the infokiosk featured with devices that require more space, such as: barcode readers, card readers, bank note acceptors, coin validators, etc.
- Operating system: Windows 7 Professional, Windows 7 Home Premium or any other you choose.
- Masking panel made according to your needs.
- Infokiosk can be tailor-made if requested.
- Dimensions (Height x Width x Depth):
1733 x 654 x 544 mm

SCOPE OF DELIVERY

- enclosure,
- nettop computer,
- 21" monitor,
- service mouse,
- service keyboard,
- 21" touch overlay,
- speakers,
- infokiosk software,
- additional equipment at customer request.

FREE-STANDING MULTIMEDIA KIOSK SMART

Kiosk with a side deposit module

Kiosk with a side module containing a barcode scanner, proximity payment module and a printer

OPTIONAL MULTIMEDIA KIOSKS COMPONENTS

SAW touch overlay

The SAW touch overlay is made of an optical glass surface with piezoelectric transducers installed in its corners. The transducers are concealed under the monitor frame. As a result, the user has no access to them; consequently, it is impossible to damage them. As opposed to resistive and capacitive overlays, the SAW overlay has no additional layers of foil or metal than could be damaged. The SAW touch overlay is the dedicated solution, but not the only one. On special request, we can fit a kiosk with a different type of touch overlay.

PARAMETERS

- Standard size..... 19" 4:3
- Resolution (interpolated)..... 4096 x 4096
- 4 mm of tempered glass or 6 mm of optical glass
- Hardness of glass surfaces 7 on the Mohs scale
- Endurance > 70 mln touches
- Positioning accuracy < 1%
- Touchpoint density..... ≥ 100 000 touchpoints/cal2
- Light permeance..... ≤ 90%
- Temperature rangeability..... -20°C ~ +70°C
- Storing range -40°C ~ 85°C
- Relative humidity range 5% ~ 90%
- Electric range:
 - Voltage 5 V DC
 - Power from USB or PS/2 port, max. ripple power 200 mV rms
 - Full Duplex Interface USB 2.0 (Full Speed) Plug&Play
- Certificates..... CE, FCC, RoHS

IR touch overlay

- Touch overlay for outdoor and indoor use.
- Multi-touch overlay (two points simultaneously)

PARAMETERS

- Size..... 19"
- Type..... INFRARED
- Supply..... DC+5 V (max. 110 mA, standard 97 mA)
- Operating temperature..... -40°C to 80°C
- Humidity..... 90% at 40°C
- Interface..... RS-232 and USB 2.0
- Resolution 4096 x 4096
- Response time <12 ms

OPTIONAL MULTIMEDIA KIOSKS COMPONENTS

Vandal-proof keyboard

IP 65 METAL KEYBOARD

- 65 keys
- Size of the front panel: 300 x 100 mm
- USB connection
- Key travel: 2.5 mm
- Certificates: CE, FCC, ROHS, IP65, IK07

IP 65 METAL KEYBOARD WITH TRACKBALL

- 65 keys, trackball
- Size of the front panel: 330 x 100 mm
- USB connection
- Key travel: 2.5 mm
- Two mouse keys
- Certificates: CE, FCC, ROHS, IP65, IK07

Note:

At customer's request, we can fit another keyboard with more keys, for instance, other type of pointing device (e.g. touchpad), etc.

Loudspeakers

2.0 speaker system with an elegant, modern design and high quality sound. Magnetic shielding ensures no interference with other equipment. Small size of the system allows you to fit it even in the small Infokiosk housing.

PARAMETERS

- Number of speakers 2 pcs.
- Number of satellite speakers..... 2 pcs.
- Woofer.....No
- Power of satellite speakers..... 5 W
- Speaker frequency 80 Hz–20 KHz
- External power unitNo
- Nominal Impedance..... 4 Ohm

OPTIONAL MULTIMEDIA KIOSKS COMPONENTS

Wireless Network Card

Wireless long-range USB network card allows you to connect your PC or laptop to a wireless network, giving access to a high-speed Internet connection. Owing to the Align™ 1-stream technology based on the 802.11n standard, the adapter provides a better wireless signal as compared to devices using the 802.11g technology. Thanks to the pluggable antenna with 4 dBi gain, the strength and the range of data transmission is increased. The pluggable antenna with 4 dBi gain provides excellent work efficiency over long distances and in difficult conditions. The device receives a wireless signal going through even two building floors.

FUNCTIONS

- wireless data transmission speed up to 150 Mb/s,
- two operation modes: ad-hoc and infrastructure,
- Quick Secure Setup function enables the WPS decryption to secure data transmission,
- WEP 64/128 decryption, compatible with the 128-bit WPA standard, MCI, IV Expansion, Shared Key Authentication, compatible with the IEEE 802.1X standard.

SOFTWARE SPECIFICATION

- Standards IEEE 802.11n, IEEE 802.11g, IEEE 802.11b
- Frequency range: 2.4-2.4835 GHz
- Output Power: 20 dBm
- Modulation: OFDM/CCK/16-QAM/64-QAM

Webcam

Webcam with the CMOS 8.0 Mpix sensor with a maximum resolution of 1280 x 720 pixels. Connected with the USB 2.0 interface cable. 360° rotatable, 75° inclination angle. Saves images in JPEG format and video in WMV format.

PARAMETERS

- Video mode.....1280 x 720 pixels
- Interface.....USB 2.0
- Power supply USB

Note:

At customer's request, we can fit a webcam with different parameters.

OPTIONAL MULTIMEDIA KIOSKS COMPONENTS

UPS

UPS is the device that provides continuous supply for electrical and electronic equipment.

**PARAMETERS**

- Product description:
 - Capacity: 650 VA or 390 W
 - Typical operation time: 25 min.
- Input characteristics:
 - Voltage range 192 ~ 263 V
 - Frequency: 50/60 Hz (+/- 3 Hz) auto-sensing
- Output characteristics:
 - Battery supply, output voltage: simulated sinewave – 230 V (+/- 5%)
 - Battery supply, output frequency: 50/60 Hz (+/- 1 Hz)
 - Typical switchover time: 4 ms
 - Overload protection: AC supply – fuse, Battery supply – internal current limiter
 - Protection against voltage spike: 405 J (L-N)
- Battery information:
 - Maintenance-free lead-acid battery, easy to replace 12 V, 7 AH x 1
 - Typical recharge time: 8 hours
- Sockets on the device:
 - 6 grounded sockets: 3 sockets providing surge protection and battery supply, and 3 sockets providing surge protection only
 - RJ11/RJ45 input/output surge protection
 - USB port for computer connection
- Control and management:
 - Ability to manually trigger the device auto-test
 - Automatic recharging
 - Automatic reboot
 - Schedule stop function
 - Power Panel® Personal Edition computer software for management and controlling the behaviour of the system

Other accessories

At customer's request, we can equip multimedia kiosks with such components as barcode reader, magnetic card reader, printer, optical drive, bank note acceptors, coin validators, etc.

OPTIONAL MULTIMEDIA KIOSKS COMPONENTS

“KIOSK APPLICATION” configurator

An application that allows you to quickly configure the content of your Infokiosk and lets you activate mechanisms that control its operation. The software has been created as an administration panel that helps to fully configure all mechanisms of your Infokiosk.

WatchDog Application

This application controls the operating system and reinitialises the Infokiosk software if it gets blocked. The application is continuously running in the background and if any application starts to overload the operating system, it checks whether it works correctly. When not working properly, it reinitialises the Infokiosk.

Infokiosk statistics

The Infokiosk Statistics software has been created for the purpose of reporting the kiosk's activity. It allows to generate charts based on log files saved on the Infokiosk's workstation. It also includes the feature of automated report creation and can e-mail the reports to an e-mail address provided.

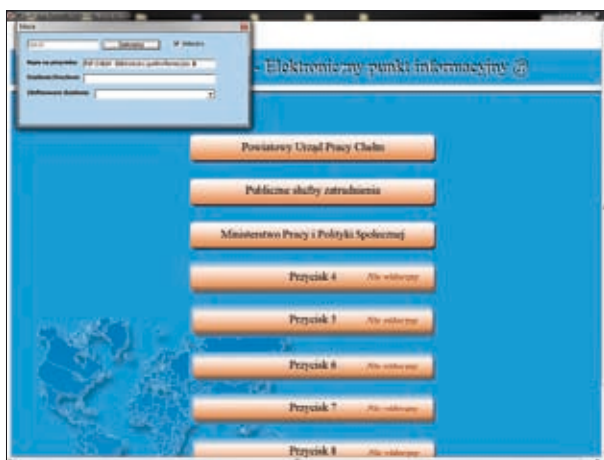

Virtual keyboard

The Virtual Keyboard is a tool used wherever a standard keyboard cannot be used. The main advantages of such a keyboard are impregnability and additional protection against the unauthorized use aimed at taking control of the computer.

Screen saver controller

The “Screen saver controller” is an application that checks periodically open windows and, if not attended by the user, clears unused content. When the Infokiosk is not in use, the Controller activates a slide show and reinitialises the selected software.

Start menu editor

The “Start Menu Editor” is an application that allows users to quickly create graphical menus. The procedure for creating your own menu could not be easier. What you do is you enter description of buttons and assign them to web addresses to which they should refer.

Side Menu

This is an application that activates the side menu and displays defined and configured keys, which the user can access at any time. It is very useful when defining an additional key for a home page or an email program.

OPTIONAL MULTIMEDIA KIOSKS COMPONENTS

“KIOSK APPLICATION” configurator**“Safe browser” software**

Such software allows to browse website content by means of a properly secured web browser. Such a solution significantly decreases the risk of installing malicious software and virus infections in your Infokiosk.

Allowed applications configurator

Allowed Applications Configurator is an application that allows to define a list of allowed Windows applications. Consequently, applications not included in the list will not be run. The mechanism of the Configurator can be used as an additional means of protecting the computer against unwanted content that may be installed on the computer as a result of connecting the Infokiosk to the Internet. Using it, the Infokiosk administrator may increase their control over the processes taking place in it.

Screen Shots

This mechanism periodically makes and saves screen shots that show the Infokiosk operation. Most often, administrators use it as an additional tool to control the device operation. The user can define times when screen shots will be saved, as well as when screen shot archives will be deleted.

Restarts or shutdowns

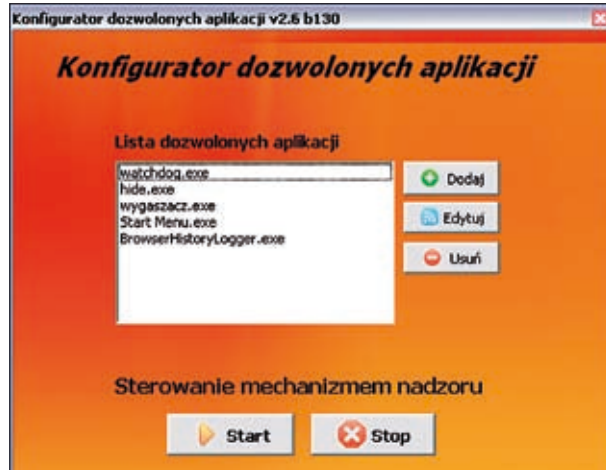

The “Restarts or Shutdowns” option allows to automatically shut down, restart or start-up the computer at an hour defined by the user. This option, in connection with the possibility of automatic computer start-up, allows to quickly define a time schedule for the Infokiosk operation.

Web Filtering

Configurator for managing the list of websites, which can be displayed in the Infokiosk. Websites not entered by the administrator in the list will be blocked. This solution allows you to quickly secure a kiosk before opening unwanted content.

Infokiosk Maintenance System

This mechanism is activated automatically after Infokiosk start-up. It periodically checks the availability of the Infokiosk home page, and when no connection is detected it displays specially crafted web page with an appropriate message. Therefore, standard browser message that the user could interpret as a Infokiosku malfunction will never appear on screen.

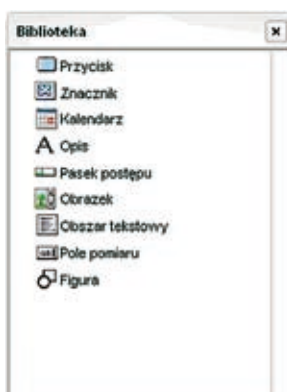

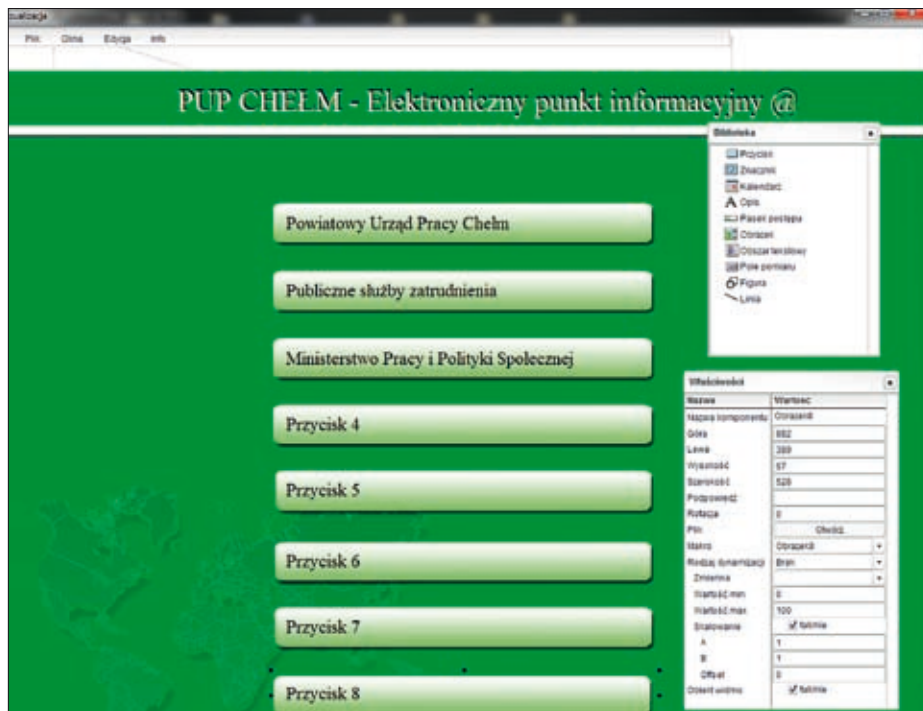

OPTIONAL MULTIMEDIA KIOSKS COMPONENTS

Advanced Visualisation Software

This software allows the user to create an advanced start menu. As opposed to the option available in the Infokiosk Configurator, the user may freely arrange the keys and graphical elements. The application also allows to arrange the start menu as a tree structure. In order to create such a menu, the user needs to arrange the images, animations and other visualisation components, using the drag&drop method.

The basic components of the visualisation can be selected from the Library window. A very interesting feature of this software is the possibility of inserting swf vector animations into the visualisations, which will make your Infokiosk even more attractive and interesting to use.

EXAMPLES OF INFOKIOSK APPLICATIONS

Smart Infokiosk with veneered masking panel

Smart Infokiosk with stainless steel sheet masking panel

Smart Infokiosk with perforated masking panel and backlit logo

EXAMPLES OF INFOKIOSK APPLICATIONS

Standard version of the "Taurus" Infokiosk

Infokiosk for people with disabilities

Wall-mounted kiosk for Radmot company

Version for Castle Museum in Łańcut

EXAMPLES OF INFOKIOSK APPLICATIONS

Version for Bank Zachodni WBK

Outdoor infokiosk for Astronomical Observatory in Olsztyn

Version for the Polish Police

Infokiosk for The Scientific Information Centre and Academic Library in Katowice

Version for Michelin

INDEX OF NAMES OF PRODUCTS AND SOLUTIONS

CETUS multimedia kiosk	490	Doors and side panels	109
Cleaning foam	122	Doors single/double-wing	286
Closed-circuit cooling	174	Doors single/double-wing	326
Cold air deflector	179	Drawer for keyboard	116
Cold aisle	166	Drawer with keyboard	115
Compact data center	213	Drawers	115
Comprehensive control room projects	477	DSR 19" - colocation cabinet	64
Concrete foundations	386	Duct for hot air, vertical	179
Consoles with KVM switch	197		
Consoles	196	E	
Control cabinets	403	Earthing	304
Control desks PSL	348	Earthing	338
Control room projects	477	Earthing bar set	304
Cooling in closed-circuit	174	Earthing bar	120
Cooling	311	Earthing bar	338
Copper cabling components	219	Earthing bar	344
Cover for splice cassette	250	Earthing cable set	120
Covers for installations boxes	228	Earthing cable set	305
C-profile for stiffening PVC cable ducts	263	Earthing cable set	338
C-profiles	117	Earthing cables	344
Crimp tool for plugs	235	Earthing elements for SU, SD2, SJ2, SJB cabinets	94
Cross bar CLASSIC	299	Earthing set	344
Cross bar	119	Earthing	120
Cross cable stripper	235	Earthing	344
Cross framework for cable storage module - OptiTel KZK	244	Electric meter box	295
Cross profile for SU, SD2, SJ2, SJB cabinets	94	Electric switchgears	412
		Electrical sockets	226
D		Electronic lock	210
Data Box - cold/hot aisle	166	Elements for baying cabinets	310
Data Box aisle panel	171	Elements for baying DC server cabinets	121
Data Box aisle roof	171	Exhaust filters	312
Data Center - compact	214	Extension of outdoor cabinets	394
Data communication cables	239	Eyebolt	290
DC 19" - server cabinets	163		
Deflector	179	F	
Desktop elevation kit for SJB cabinet	74	Faceplates for keystones	225
DIN rail	316	Fan control	187
Dispatch and control desks	429	Fan kit for SU, SD2, SJ2, SJB cabinets	93
Dispatch workstations	429	Fan units	182
Distribution boxes	234	Fans	312
Document drawer	116	Fasteners for SRK open rack	101
Document pocket	116	Fasteners for SRX open rack	99
Door stop	378	Feet for cabinets and racks	108
Door stop	287	Fibre optic adapters	252
Door switch	307, 378	Fibre optic enclosures and accessories	241
Door system for Data Box aisle	170	Fibre optic patch panels - OptiLAN PSP 19"	249
Door, ventilated	186		

INDEX OF NAMES OF PRODUCTS AND SOLUTIONS

Fibre optic patch panels OptiTel PSP 19"	245	K	
Fibre optic patchcords	252	KCS-1 central signal box	461
Fibre optic pigtails,	252	Keyboard	499
Fibre optic wall-mounted distribution boxes - OptiLAN PSN	251	Keystones and sockets	229
Fibre optic wall-mounted distribution boxes - OptiTel PSN	247	Keystones, cat. 5e	229
Fire extinguishing system for a single cabinet	158	Keystones, cat. 6 and 6A	230

Mounting plate infill	336	Patch panels 10"	269
Mounting plate	293	Patch panels, cat. 3	231
Mounting plate	331	Patch panels, cat. 5e and 6	222
Mounting profile II fixing elements	315	Patch panels, cat. 6 and 6A	224
Mounting profile, 19"	297	Patchcords, fibre optic	252
Mounting profiles for SU, SD2, SJ2, SJB cabinets	92	PD roof fan units	183
Mounting profiles II	315	PDM dispatch and control desks	433
Mounting profiles system, 19"	296	PDU-1 - switched power distribution unit	146
Mounting profiles	117	PDU-2 - switched power distribution unit	147
MPSK G0 - microprocessor panel for fan control MPSK G0	187	Perforated cable tray	264
MPSM-S1 Power Control Panel	142	Perforated steel door	110
Multimedia kiosks	481	Pigtails, fibre optic	252
N		Plinth corners	105
Network card	500	Plinth side panels	105
O		Plinth simple	104
Open racks	95	Plinth with levelling option	104
OptiLAN PSN - fibre optic wall-mounted distribution boxes	251	Plinth with pull out stabiliser	104
OptiLAN PSP 19" - fibre optic patch panels	249	Plinth, modular	329
OptiTel - fibre optic enclosures, patch panels	241	Plinth, modular	291
OptiTel KZK - cross framework for cable storage module	244	Plinth, welded	292
OptiTel MZ - cable storage module	244	Plinth, welded	330
OptiTel PSN - fibre optic wall-mounted distribution boxes	247	Plinths for network/server cabinets	104
OptiTel PSP 19" - fibre optic patch panels	245	Pockets	116
OptiTel SPS 19" - cabinet for fibre optic patch panels	242	Potential equalisation	338
OptiTel SZK, STZK - cable storage boxes and frames	248	Potential equalisation bar	304
OptiTel SZP - cable storage drawers	244	Potential equalisation bar	338
OTS1 19" - network/server cabinet for on-site assembly	56	Potential equalisation bar	344
Outdoor cabinets adapted for power supply systems	393	Potential equalisation	304
Outdoor cabinets custom solutions	397	Power Control Panel MPSM-S1	142
Outdoor cabinets EMC	387	Power distribution unit PDU-1, remotely switched	146
Outdoor cabinets for power industry	391	Power distribution unit PDU-2, remotely switched	147
Outdoor cabinets for subscribers' access systems	388	Power distribution units	146
Outdoor cabinets SZD	355	Power generators	154
Outrigger	297	Power strips 10"	269
Outriggers	118	Power strips 16 A	130
OVERSEE - monitoring system for equipment operation conditions	206	Power strips 16 A, 32 A, 3 x 16 A, 3 x 32 A, monitored (Watchdog over IP)	138
		Power strips 3 x 16 A	134
		Power strips 3 x 32 A	136
		Power strips 32 A	132
		Power strips and power distribution units	129
		Power supply	129
		Power VS telephone system	231
		Precision air-conditioning cabinets	191

INDEX OF NAMES OF PRODUCTS AND SOLUTIONS

Protection cabinets	408	Shelf II/2U - fixed	111
PSL control desks	348	Shelf II/2U - pull out	111
PSN - fibre optic wall-mounted distribution boxes OptiLAN	251	Shelves fixed on four 19" mounting profiles - adjustable depth, 19" assembly	113
PSN - fibre optic wall-mounted distribution boxes OptiTel	247	Shelves fixed on four 19" mounting profiles - fixing to the side openings	112
PSP - fibre optic patch panels OptiLAN	249	Shelves fixed on six 19" mounting profiles - fixing to the side openings	114
PSP - fibre optic patch panels OptiTel	245	Shelves fixed on two 19" mounting profiles - 19" assembly	111
Pull out stabiliser for cabinet plinth	104	Shelves with adjustable depth	113
Punch down tool for telephone connectors	235	Shelves	111
PW fan units - 19" assembly	182	Shelves	376
PWD roof fan units	183	Shielding	338
PWS2 roof fan	184	Side and row heat exchangers	292
R		Side panels	328
Rack 19"	117	Side panels and doors	109
Rack for SWN cabinets, 19"	345	Side panels for plinth	105
Rack SRC 19"	97	Side panels	289
Rack SRD 19"	96	Simple plinth	104
Rack SRK 19"	100	Single-phase power strips 16 A	130
Rack SRX 19"	98	Single-phase power strips 32 A	132
RJ45	237	SIRIUS multimedia kiosk	484
RN 19" - wall-mounted network frame	90	SJ2 19" - wall-mounted network cabinet, single-section	86
RNO 19" - wall-mounted network frame	91	SJB 19" - network cabinet for office applications	74
Roof for Data Box aisle	171	SJB 19" Silent - network/server cabinet	76
Roof for SRK open rack	101	SJK 19" - wall-mounted network cabinet, for light equipment	88
Roof for SRX rack	99	SKI 10" - wall-mounted cabinet	268
Roof	288	Slide door system for Data Box aisle	170
S		Sliding gland plates with foam for cabinet's bottom plate	308
Safety and security for server rooms	160	Small Office / Home Office	268
Sample configurations of dispatch rooms	430	SMART multimedia kiosk	492
Sample realised projects of mimic boards	462	SOHO 10" cabling system	267
SAW touch overlay	498	Solid side panels, 2 pc.	110
SD2 19" - wall-mounted network cabinet, double-section	84	Solutions for small business	214
Self-adhesive insert of DSR divider	127	Spare kit of sliding gland plates with foam for cabinet's bottom plate	308
Separate air-conditioning units	190	Speed controller ARO 0.6	186
Server cabinets DC 19"	163	Splice cassette	250
Server room cabinet installation concepts	161	Spray paint	122
Server rooms	161	SRC 19" open rack	97
Set of elements for baying cabinets	310	SRD 19" open rack	96
Set of elements for baying DC server cabinets	121	SRK 19" open rack	100
Set of fasteners for SRK open rack	101	SRX 19" open rack	98
Set of fasteners for SRX open rack	99	Steel rear, shortened door with 3U module panel	109
Set of wall brackets for cabinet wall mounting	345	Structured cabling components	219
Shelf 10"	269	STZK - cable reserve frames	248
Shelf I - fixed	112	SU 19" - wall-mounted network cabinet, single-section, with removable side panels	82
Shelf I - pull out	112	Supplementary accessories for wall-mounted cabinets	92
Shelf II/1U - fixed	111	Support for cable bar	302
		Supports for mosaic faceplates	228
		Swing frame	294
		Swing frame	119
		Swing frame	333

INDEX OF NAMES OF PRODUCTS AND SOLUTIONS

Swing frame	375	V	
Swing handle for the door	288	Vane for air flow guide	178
Switched power distribution unit PDU-1	146	Ventilated door	186
Switched power distribution unit PDU-2	147	Ventilating	311
Switchgears up to 1250 A	413	Ventilation	182
Switchgears up to 630 A	412	VENUS multimedia kiosk	488
SWN wall-mounted cabinets	340	Vertical bar CLASSIC	300
System lighting set	306	Vertical cable management	262
SZB 19" - network cabinet	42	Vertical hot air duct	179
SZB DO - management cabinet system	60	Vertical masking panels	126
SZB SE 19" - server cabinet	50	Vertical masking panels	177
SZBk 19" - cabinet compatible with EMC requirements	70	Vertical module panels	317
SZD outdoor cabinets	355	Vibro-shock absorbers	106
SZE2 industrial cabinets	274	Voltage distribution panel	156
